Why order

Scan order must include every flop exactly once

The idea

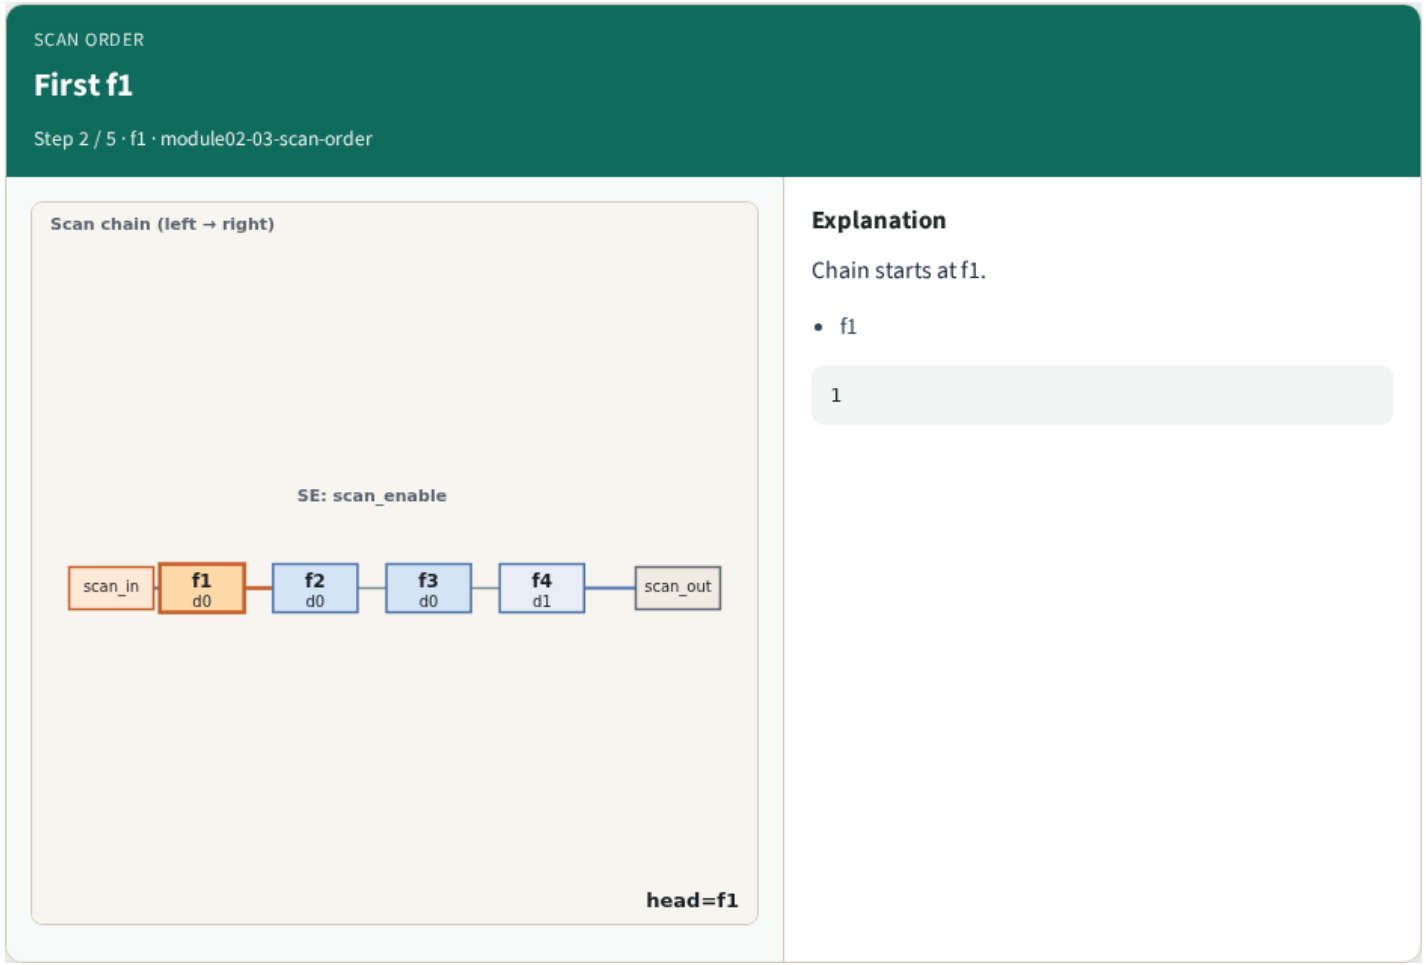

- GOLDEN: order f1→f2→f3→f4; covers_all=true

Order list

SCAN ORDER

Golden

Step 5 / 5 · golden · module02-03-scan-order

Scan chain (left → right)

Explanation

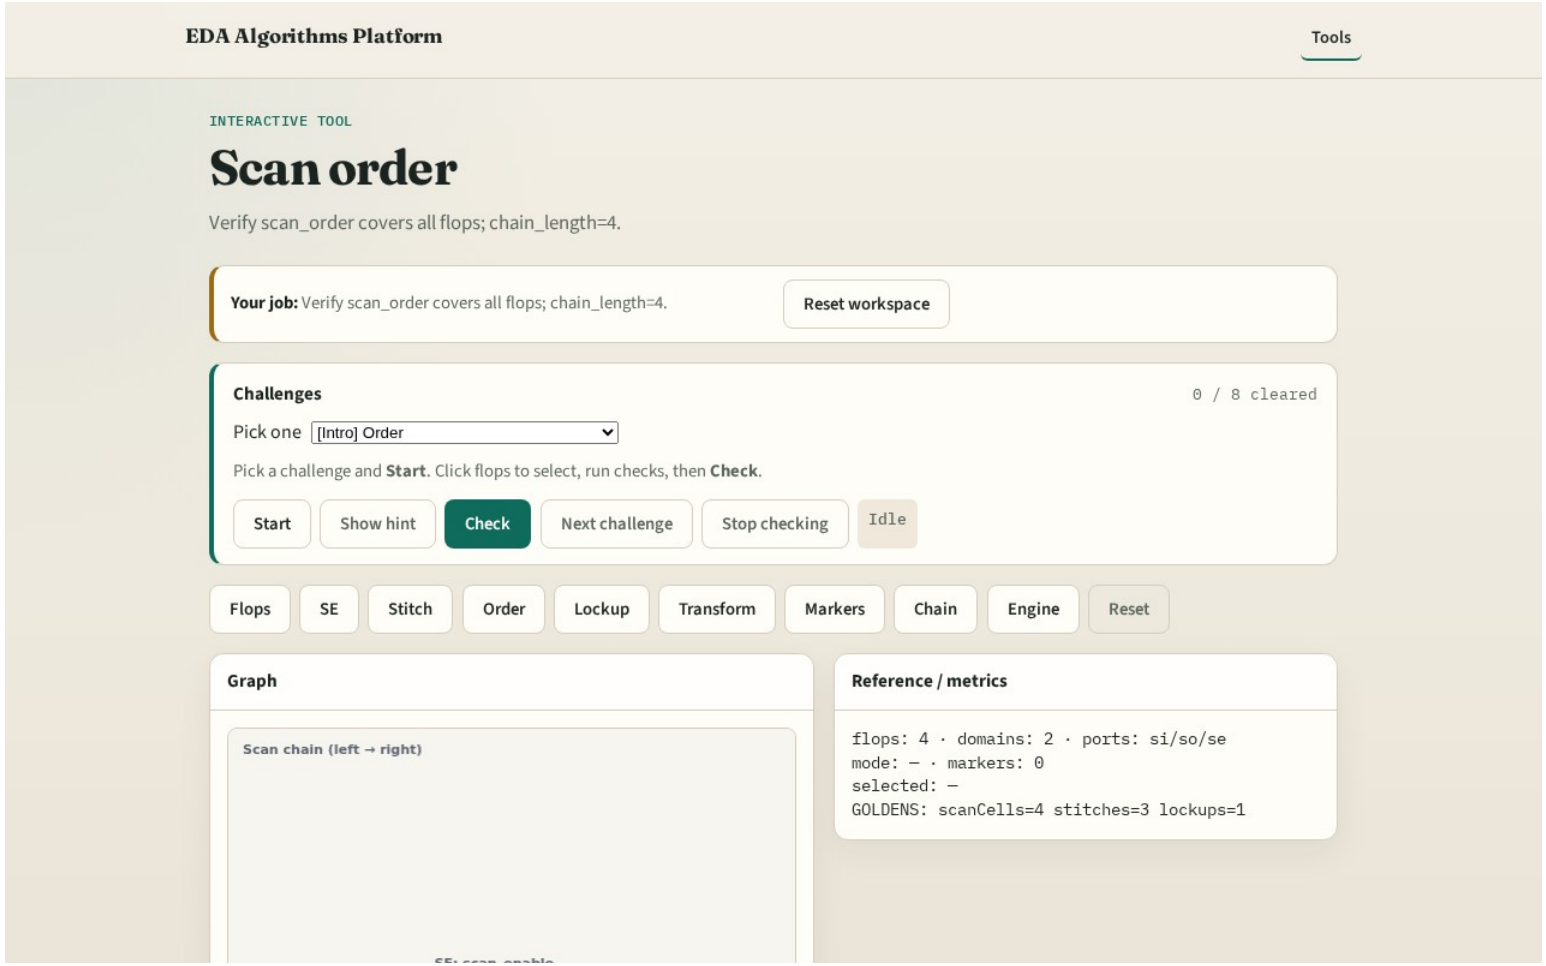

GOLDEN: chain_length=4, covers_all=true.

- GOLDEN

```
4
```

Golden

Browser lab track

Browser lab starter

Implement track

- Call scan_order_check(); assert length==4 and covers_all

Pitfalls

- Duplicate flop in order
- Missing f4

Your turn

- Next: lockup latch
