Offline compare

Track A prints power_compare without the browser

The idea

- Load tiny_power.json; print chip_ptot, ir_drop_sink, marker_count, ok

Why offline

- Print power_compare metrics offline without the browser

Commands

- Python3 -c "from solvers import power_compare; print(power_compare())" in common/

What to compare

- Load tiny_power.json; print chip_ptot, ir_drop_sink, marker_count, ok

Next

- Complete the quiz for this part
- Continue to the wrap module
