Why ECO loop

Engineering change orders map fixes to failing checks

The idea

- GOLDEN: eco_count=2, fixes_all=true

ECO list

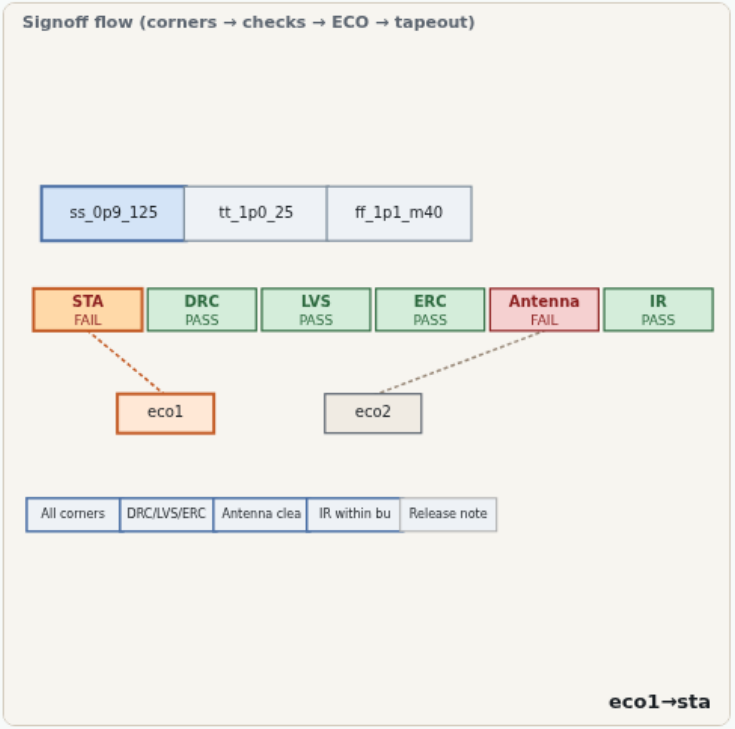

ECO list

Buffer ECO

ECO PLAN

Buffer ECO

Step 2 / 5 · eco1 · module03-01-eco-loop

Explanation

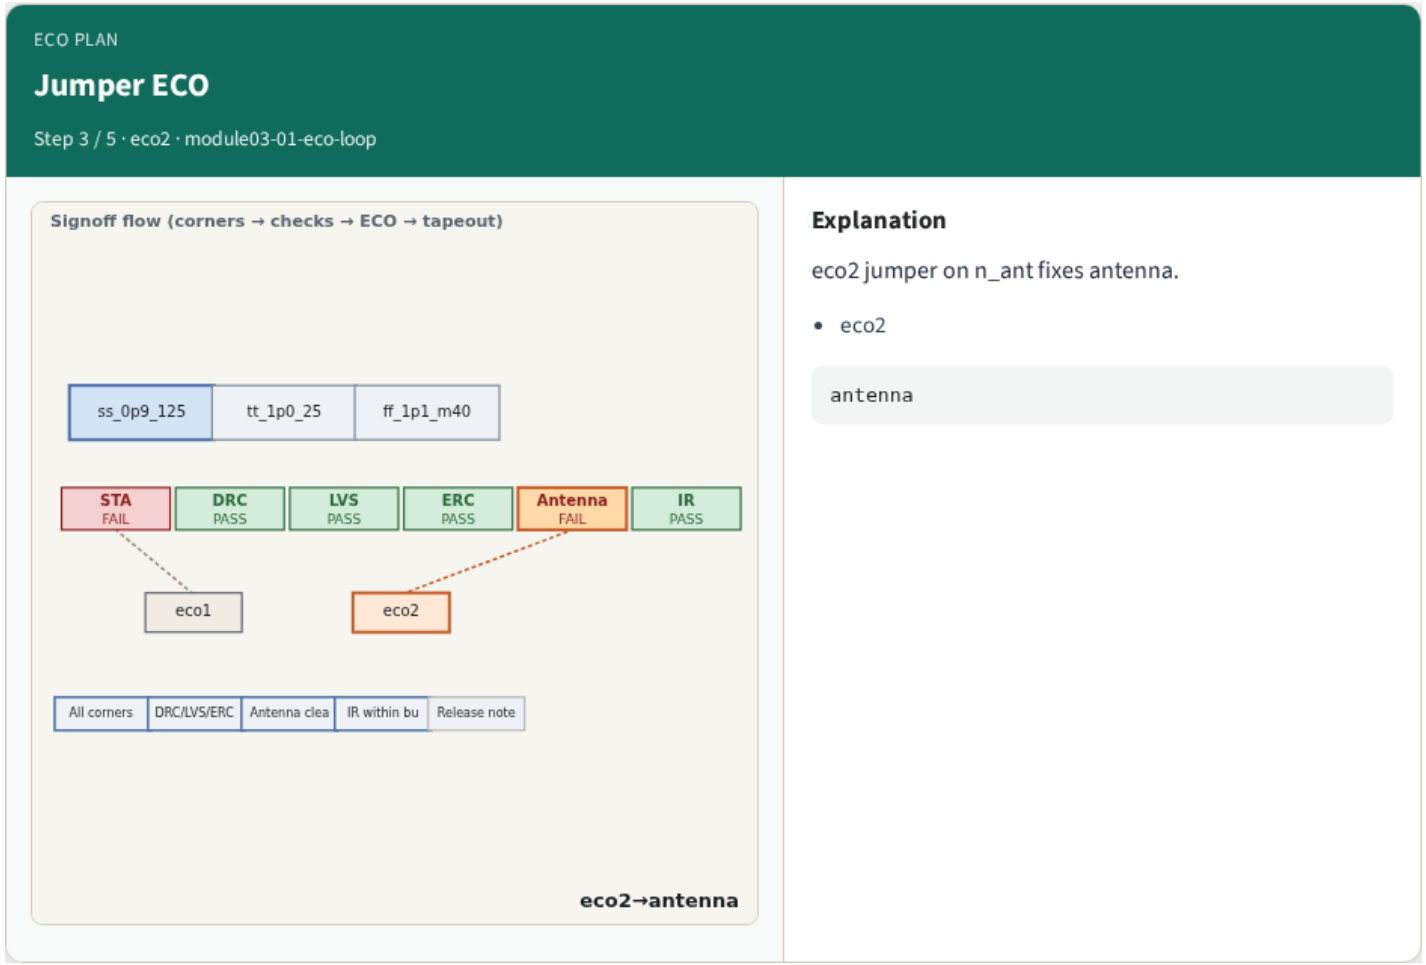

eco1 buffer on n_crit fixes STA.

- eco1

```
sta
```

Buffer ECO

Jumper ECO

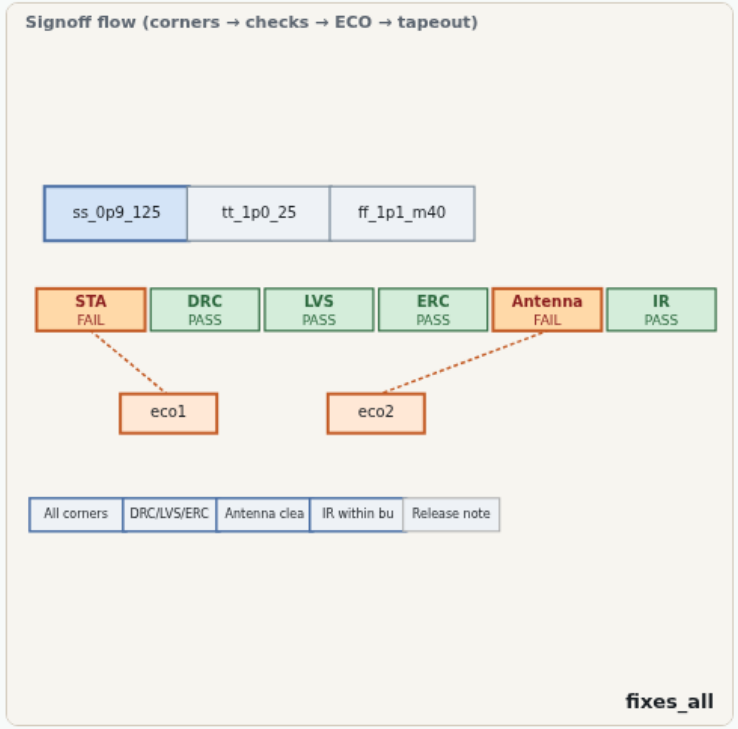

Jumper ECO

Covers all

ECO PLAN

Covers all

Step 4 / 5 · cover · module03-01-eco-loop

Explanation

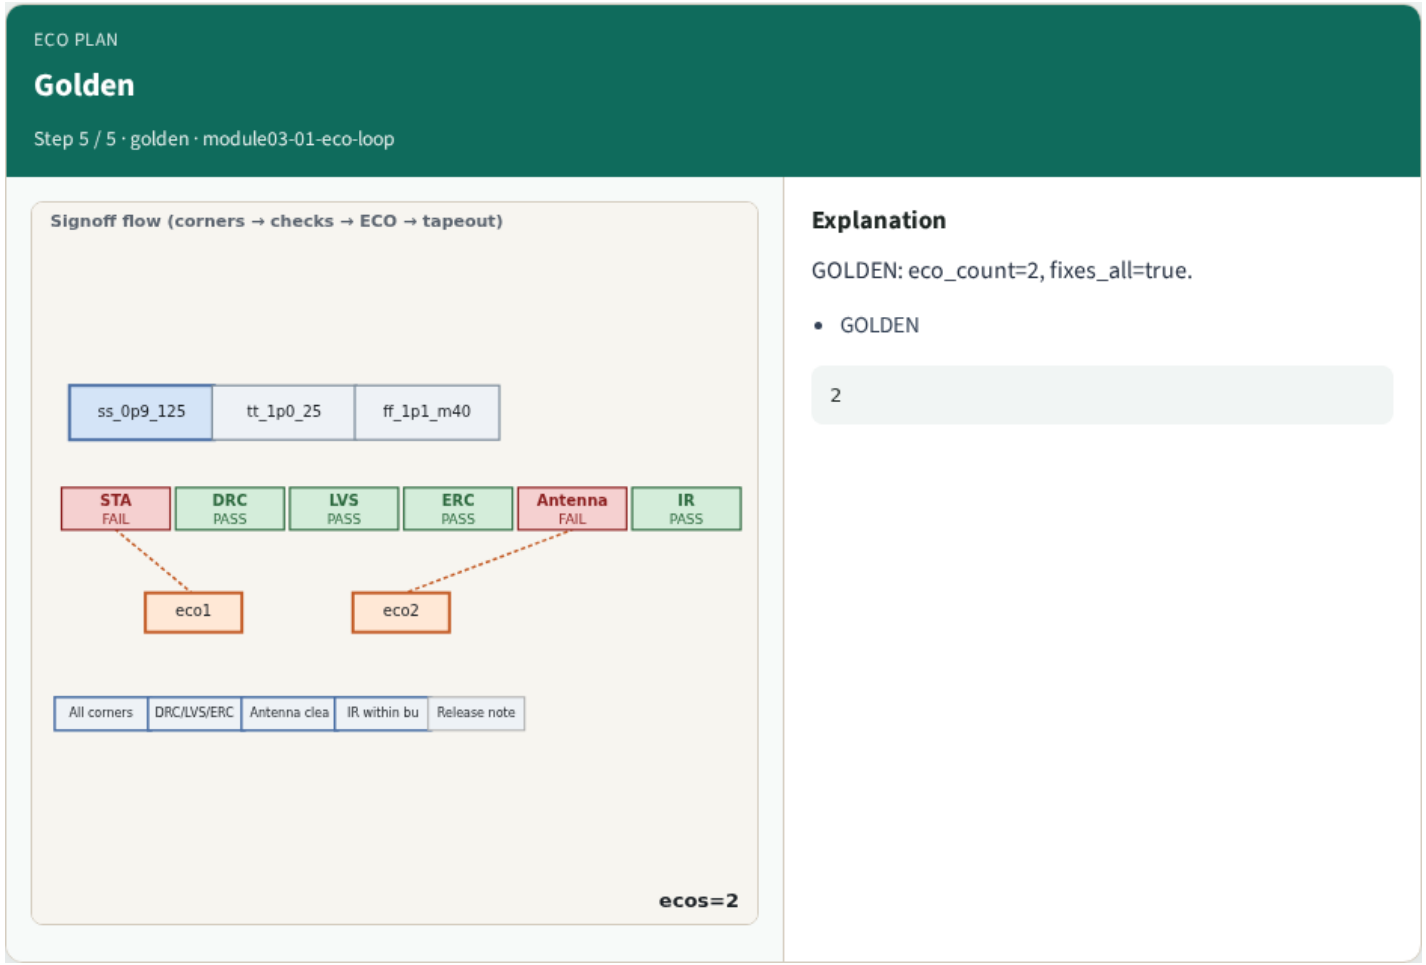

Both fails covered by ECO fixes.

- cover

```
all
```

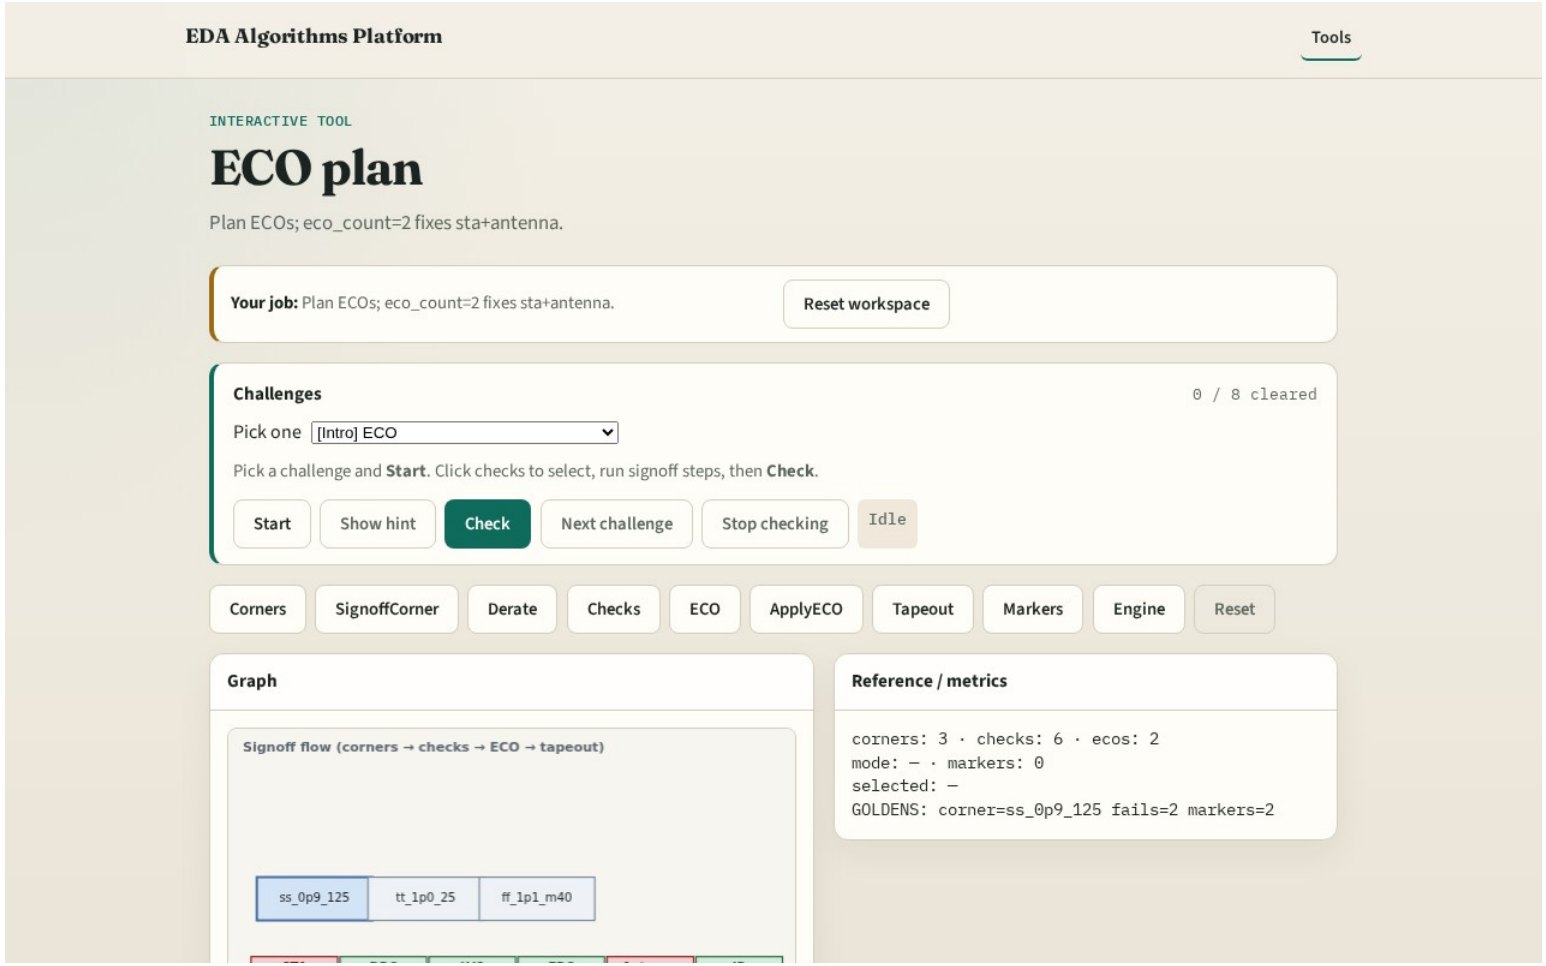

Covers all

Browser lab track

Browser lab starter

Implement track

- Call eco_plan(); assert eco_count==2 and fixes_all

Pitfalls

- ECO missing a fail
- Double-counting ECOs

Your turn

- Next: apply ECOs
