Why strash

Strash merges structurally identical AND(a,b) and retargets fans

The idea

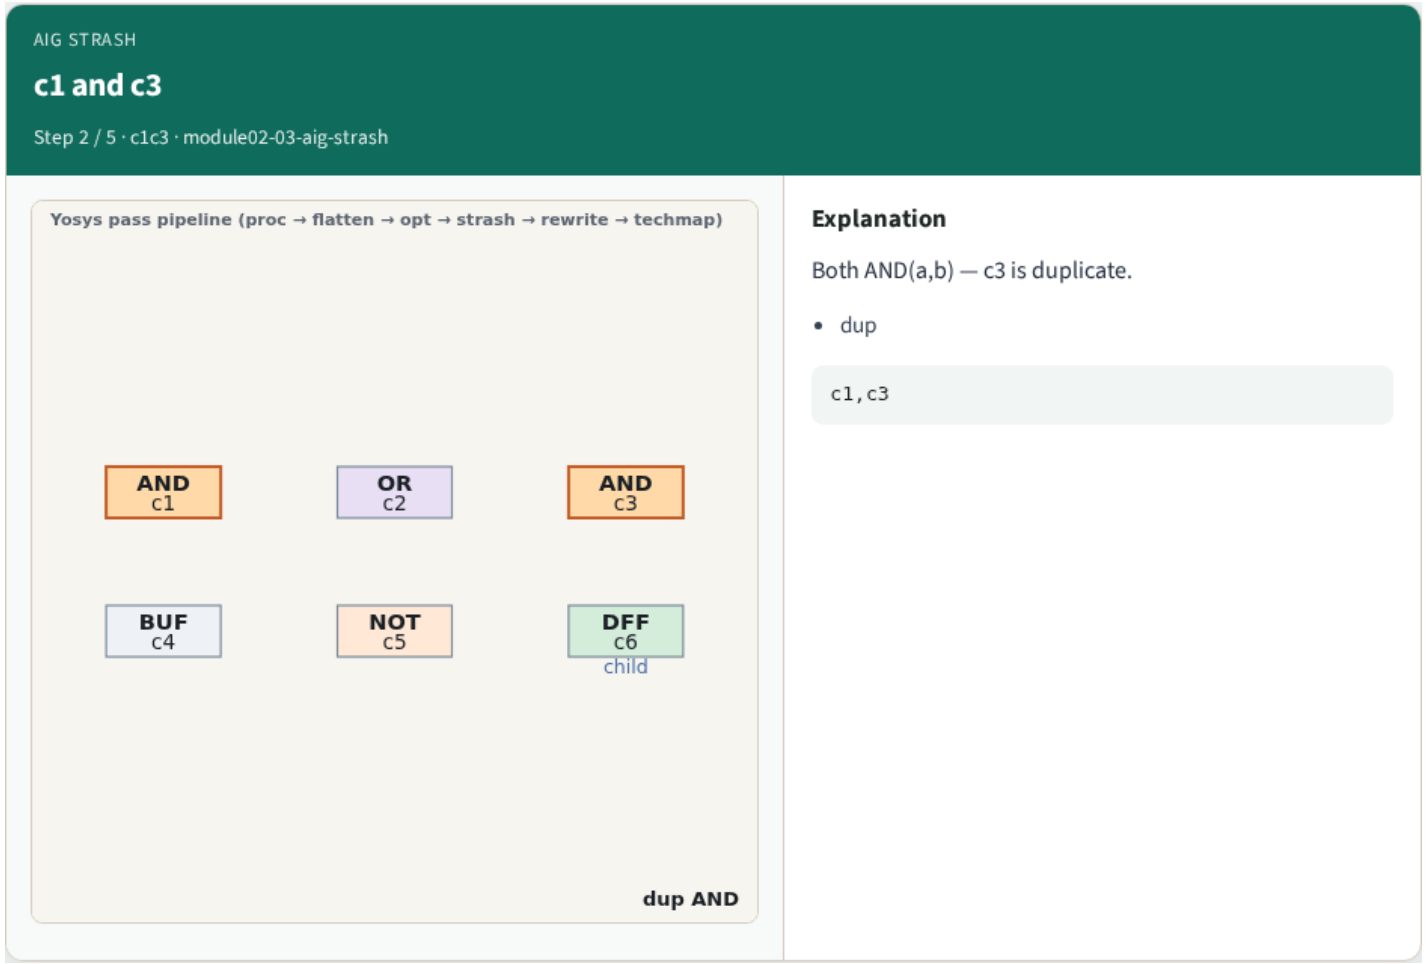

- GOLDEN: after_strash_cells=4, merge n3→n1

Hash key table

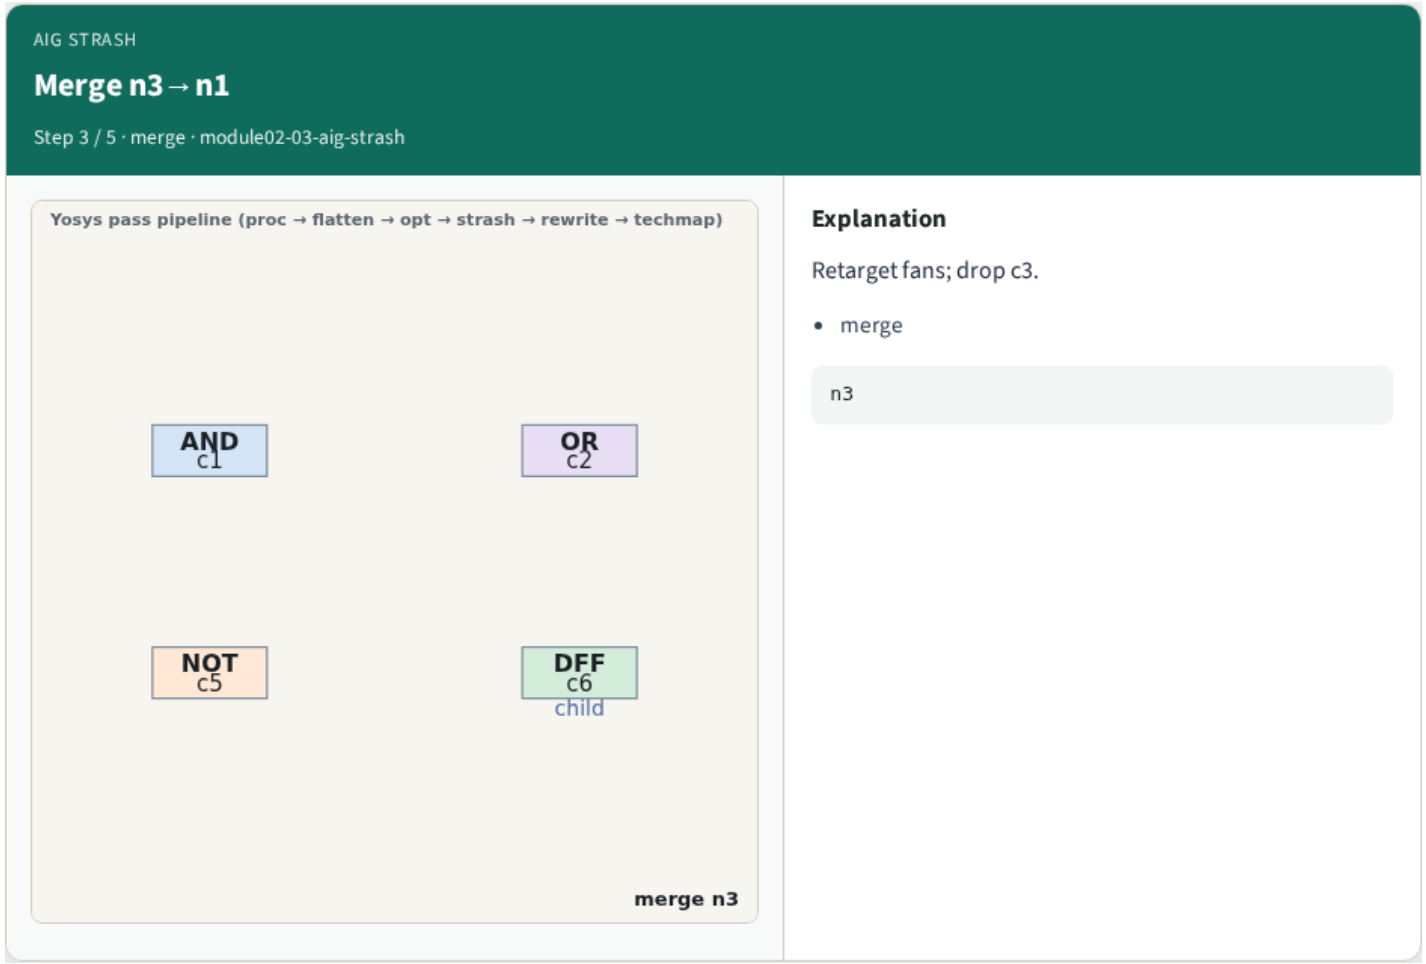

Hash key table

c1 and c3

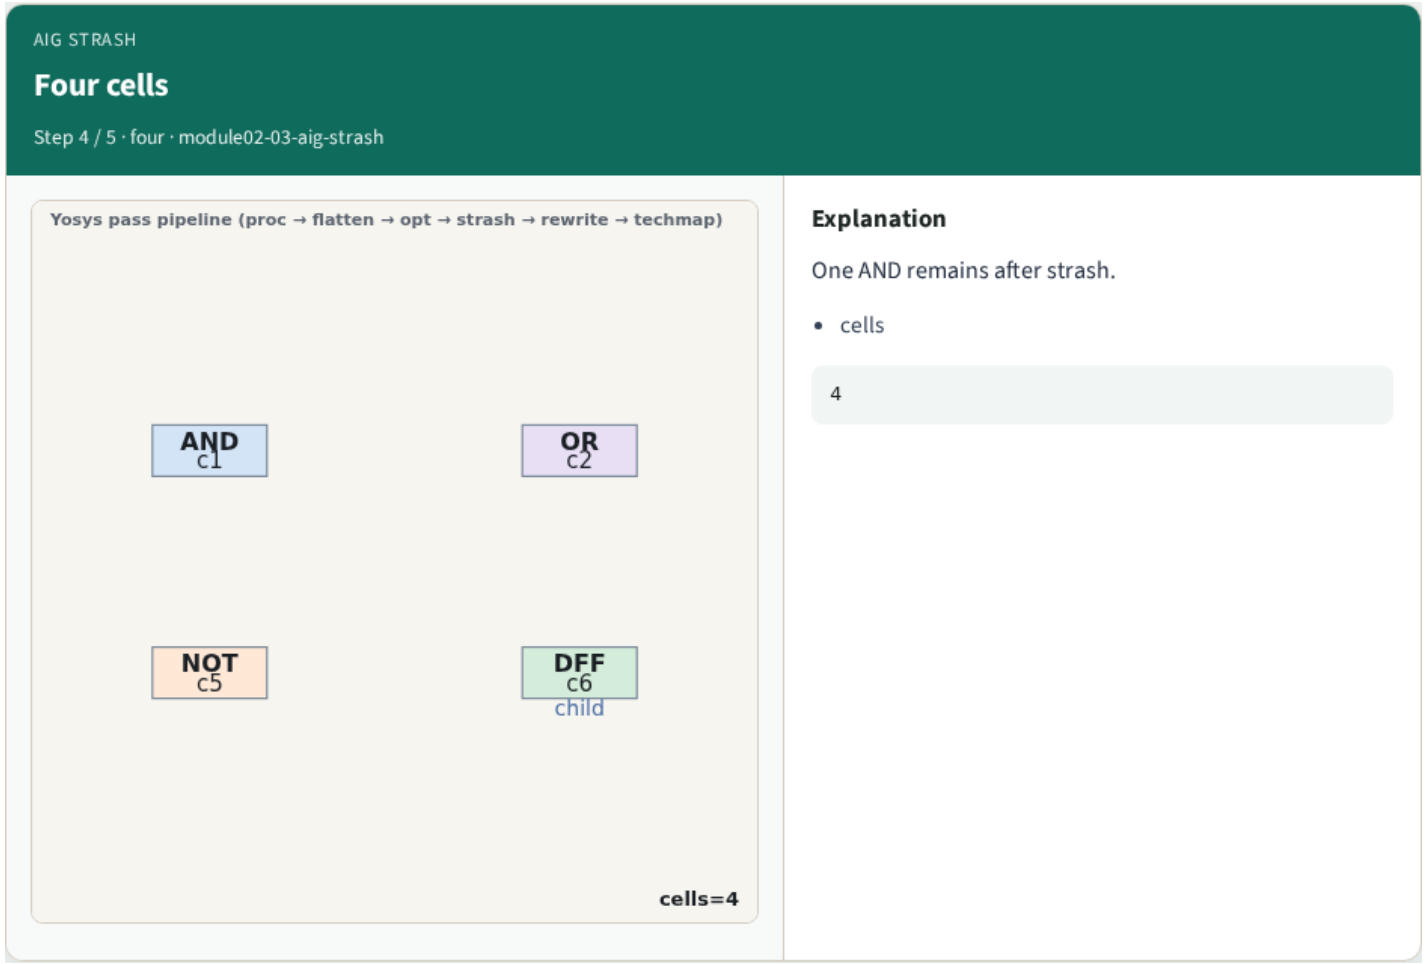

c1 and c3

Merge n3→n1

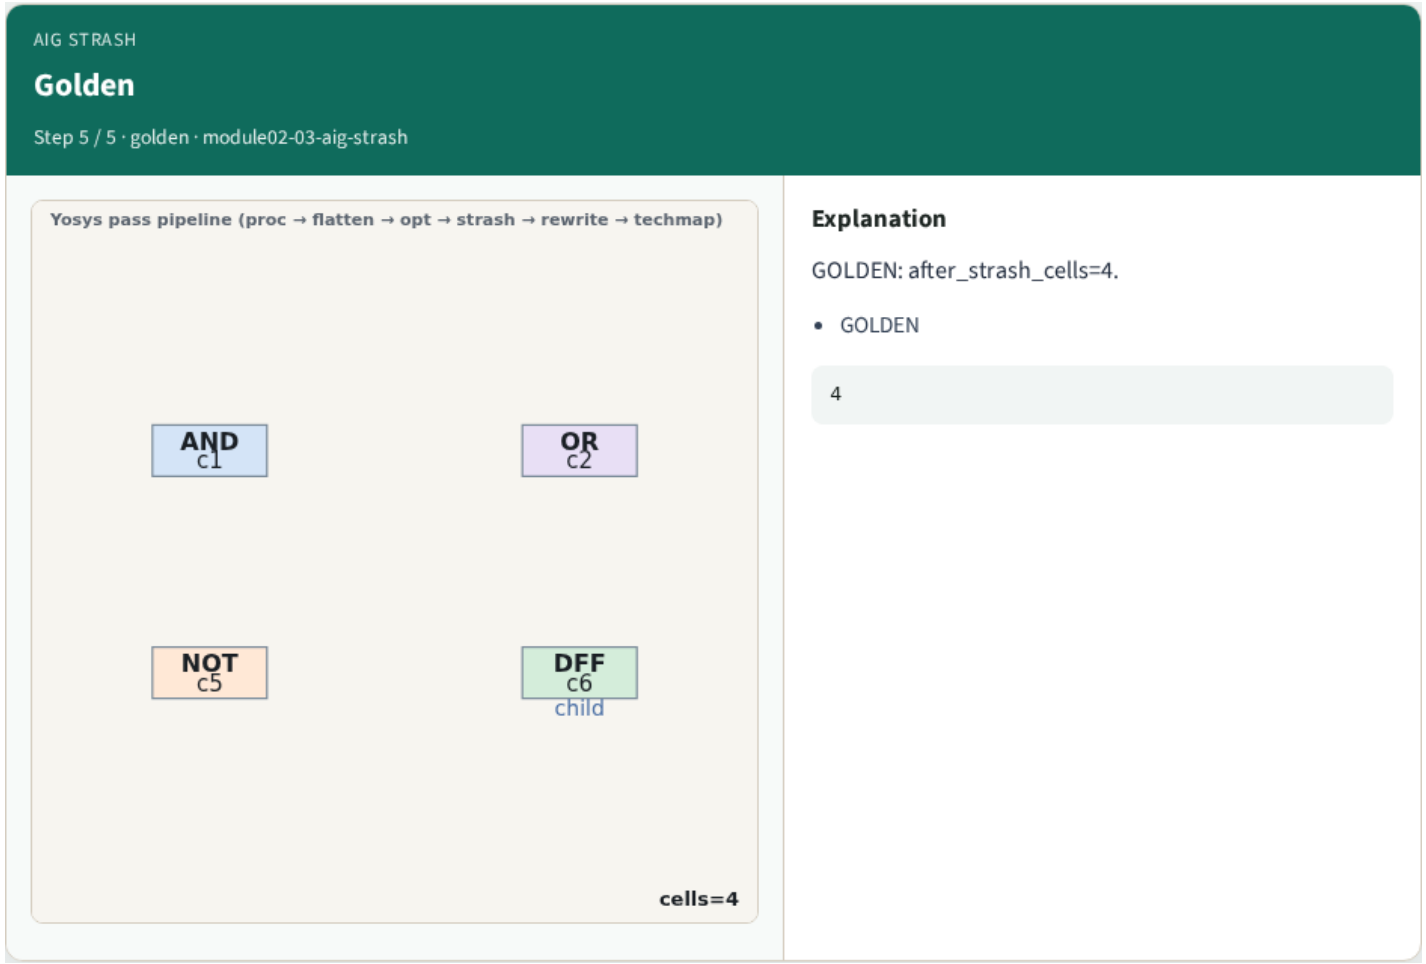

Merge n3→n1

Four cells

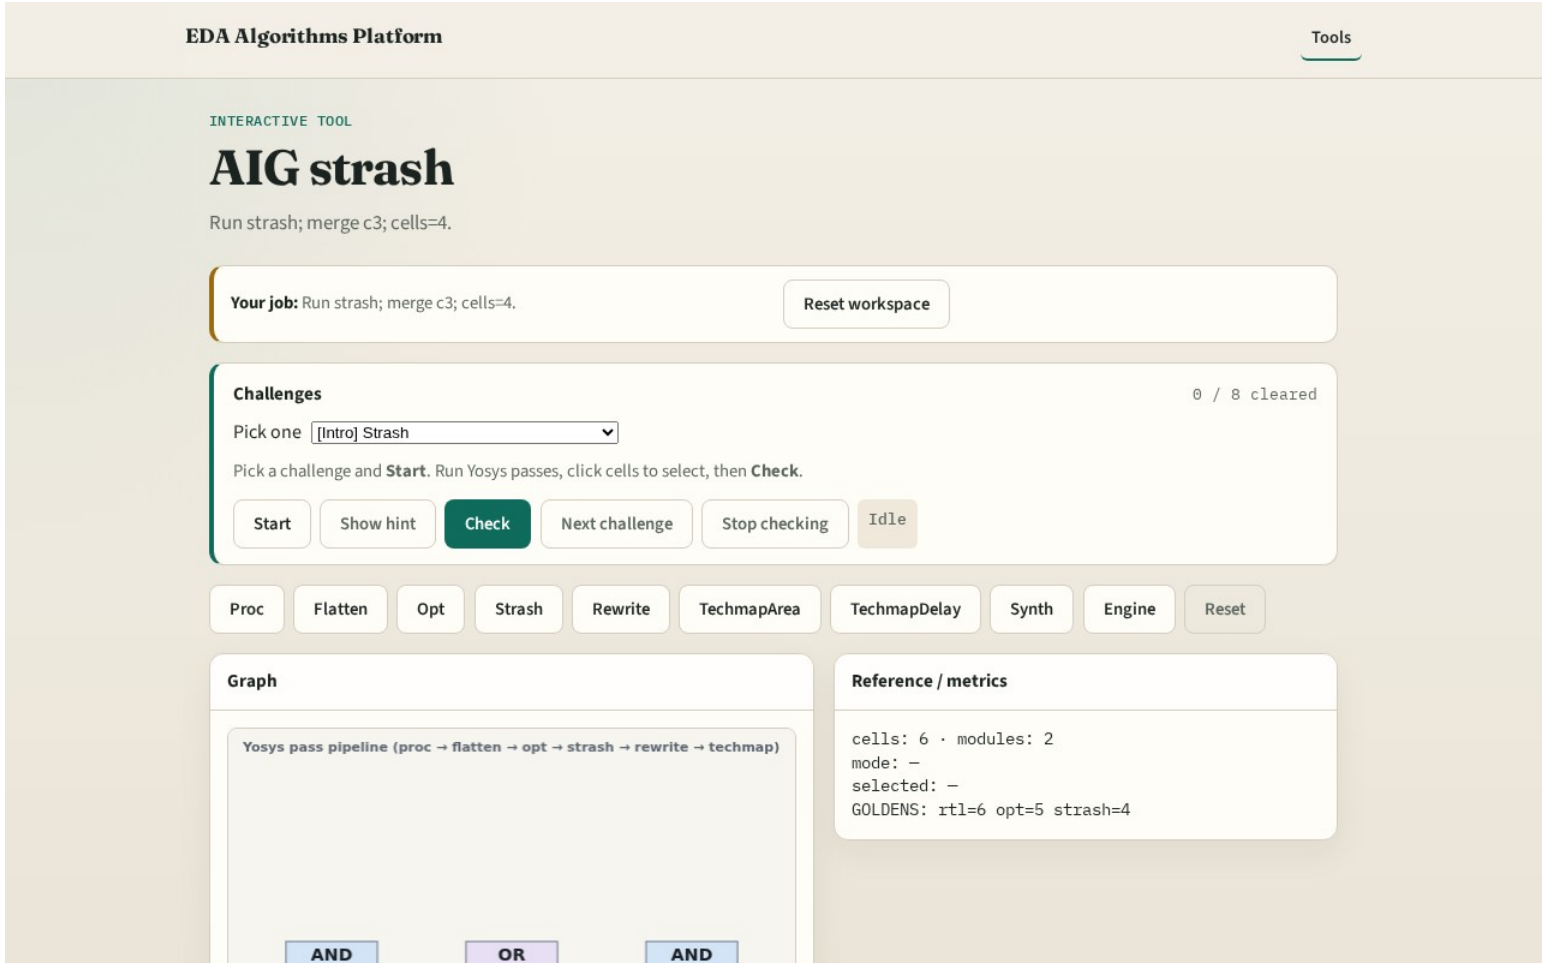

Four cells

Browser lab track

Browser lab starter

Implement track

- Call pass_aig_strash(); assert cell_count==4

Pitfalls

- Merging unlike cells
- Forgetting fan retarget

Your turn

- Next: rewrite
