Offline compare

Track A prints yosys_compare without the browser

The idea

- Load tiny_yosys.json; print rtl_cells, after_opt, nand_area, report_cells, ok

Why offline

- Print yosys_compare metrics offline without the browser

Commands

- Python3 -c "from solvers import yosys_compare; print(yosys_compare())" in common/

What to compare

- Load tiny_yosys.json; print rtl_cells, after_opt, nand_area, report_cells, ok

Next

- Complete the quiz for this part
- Continue to the wrap module
