Why yosys

Real Yosys is a pass engine you drive with a .ys script or an interactive shell , not a toy button

The idea

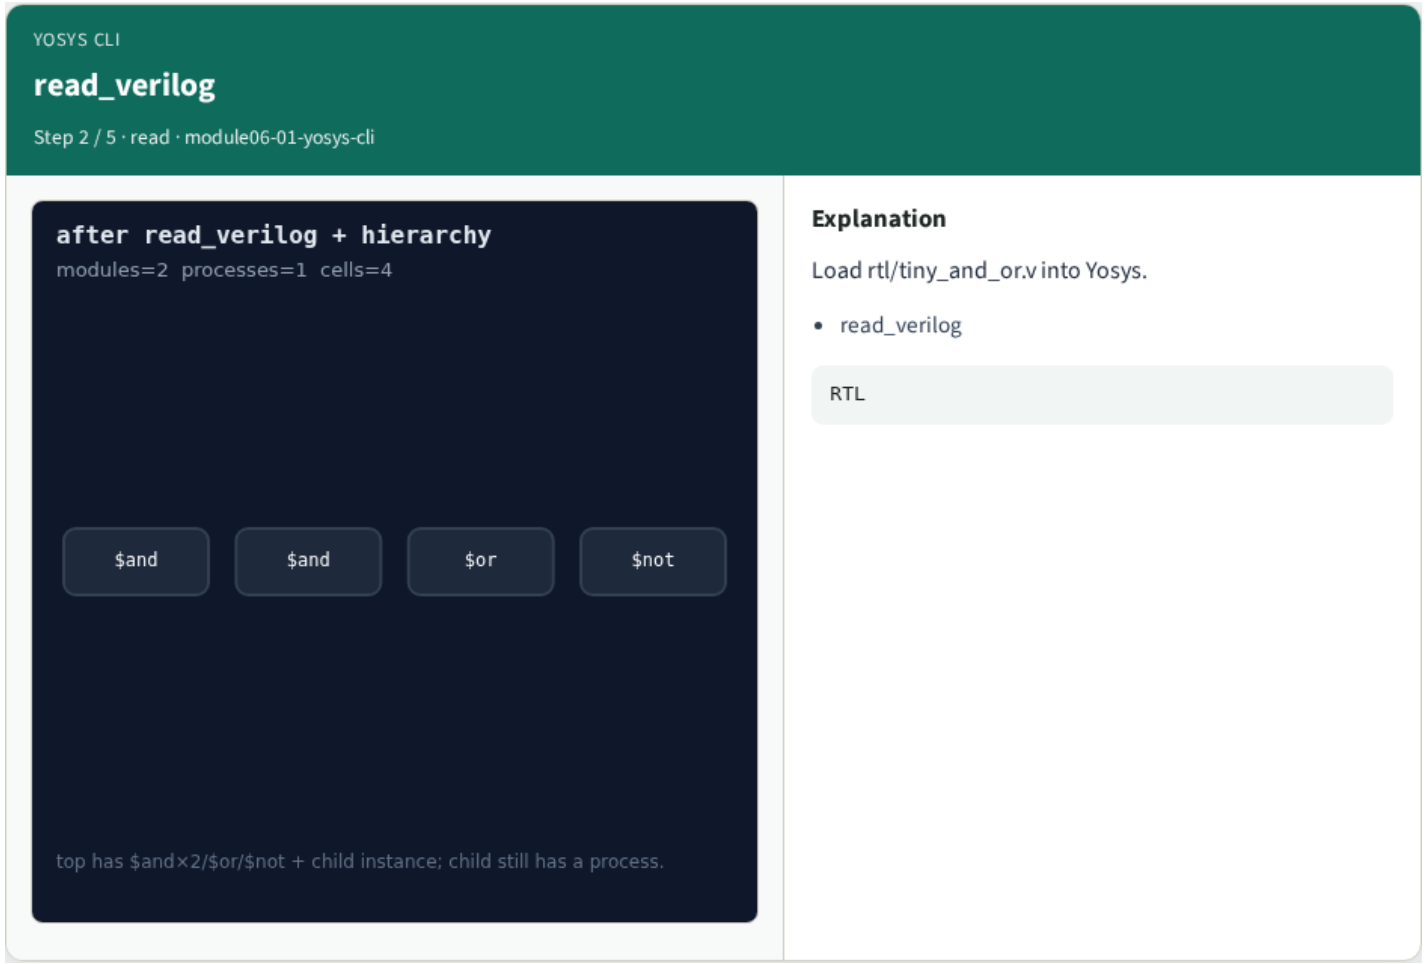

- GOLDEN: first three cmds = read_verilog, hierarchy, proc; invoke with yosys -s script.ys

Empty design

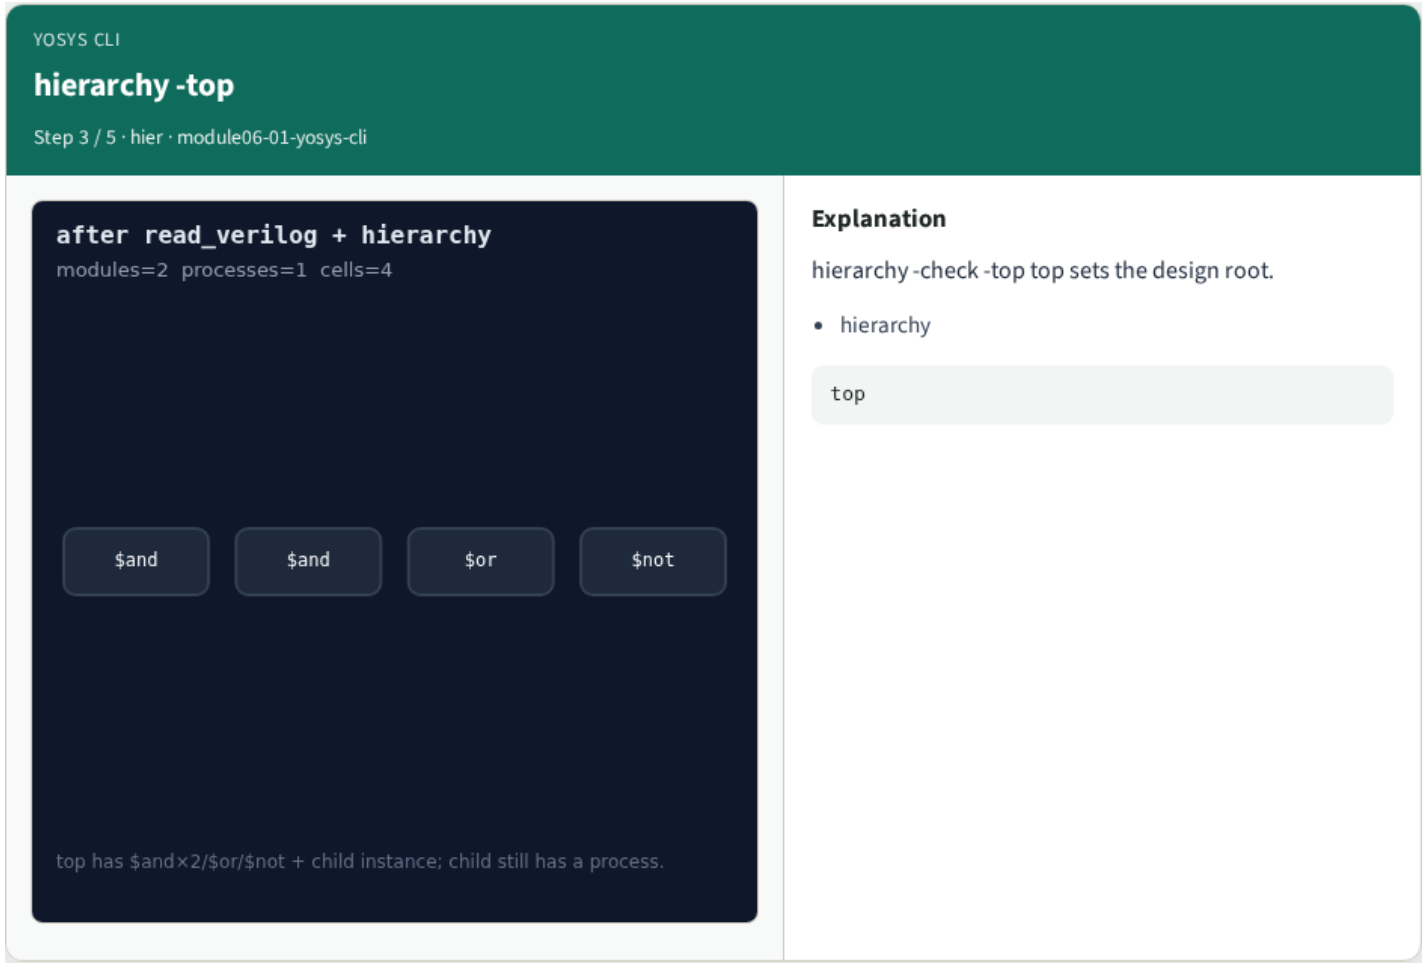

Empty design

read_verilog

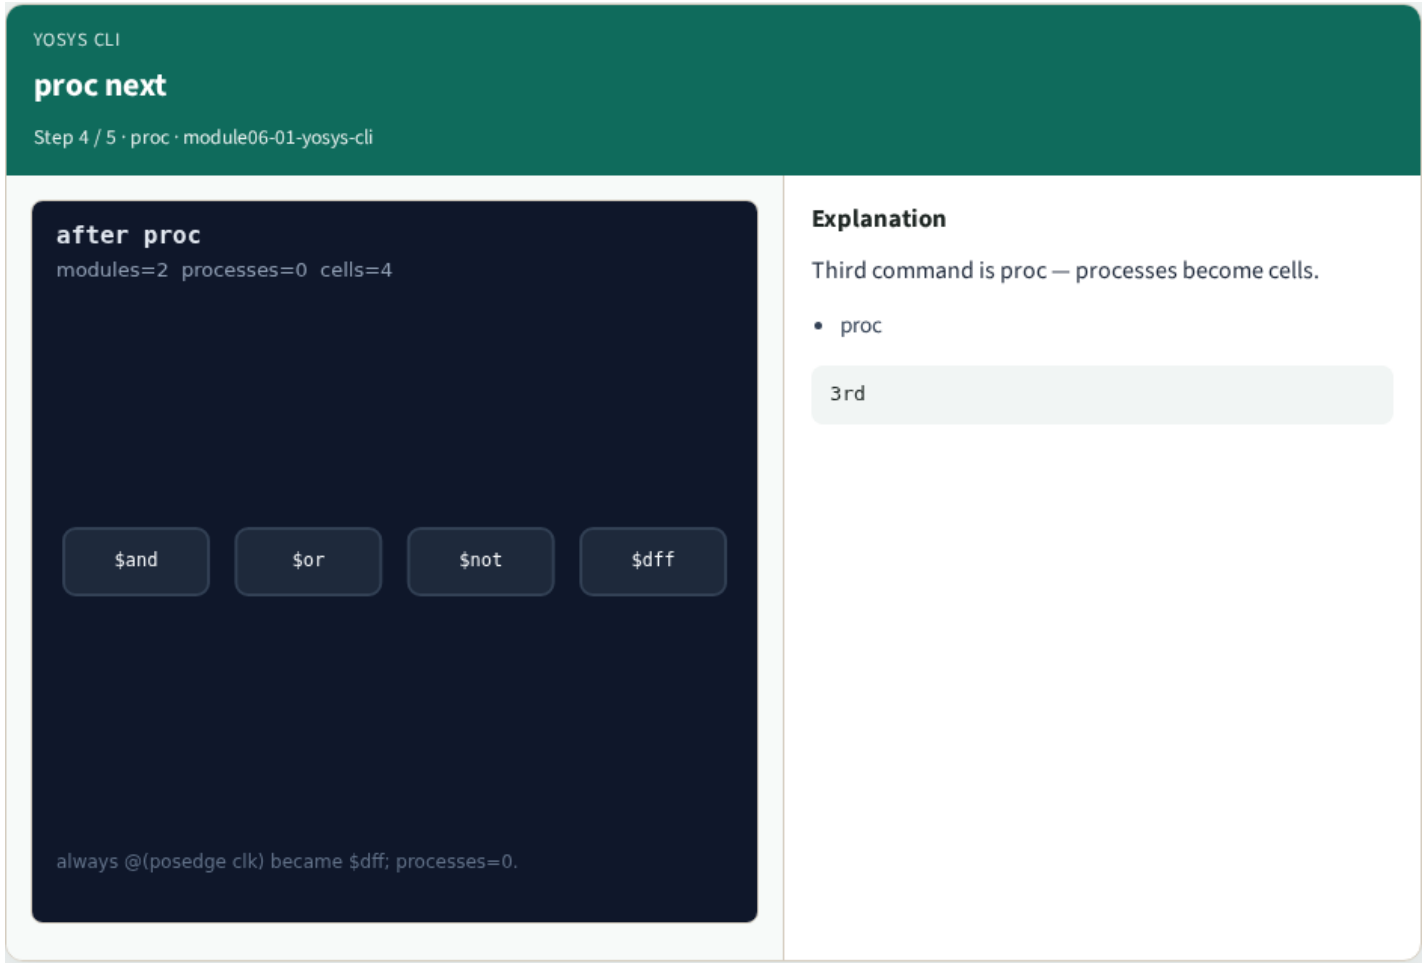

read_verilog

hierarchy -top

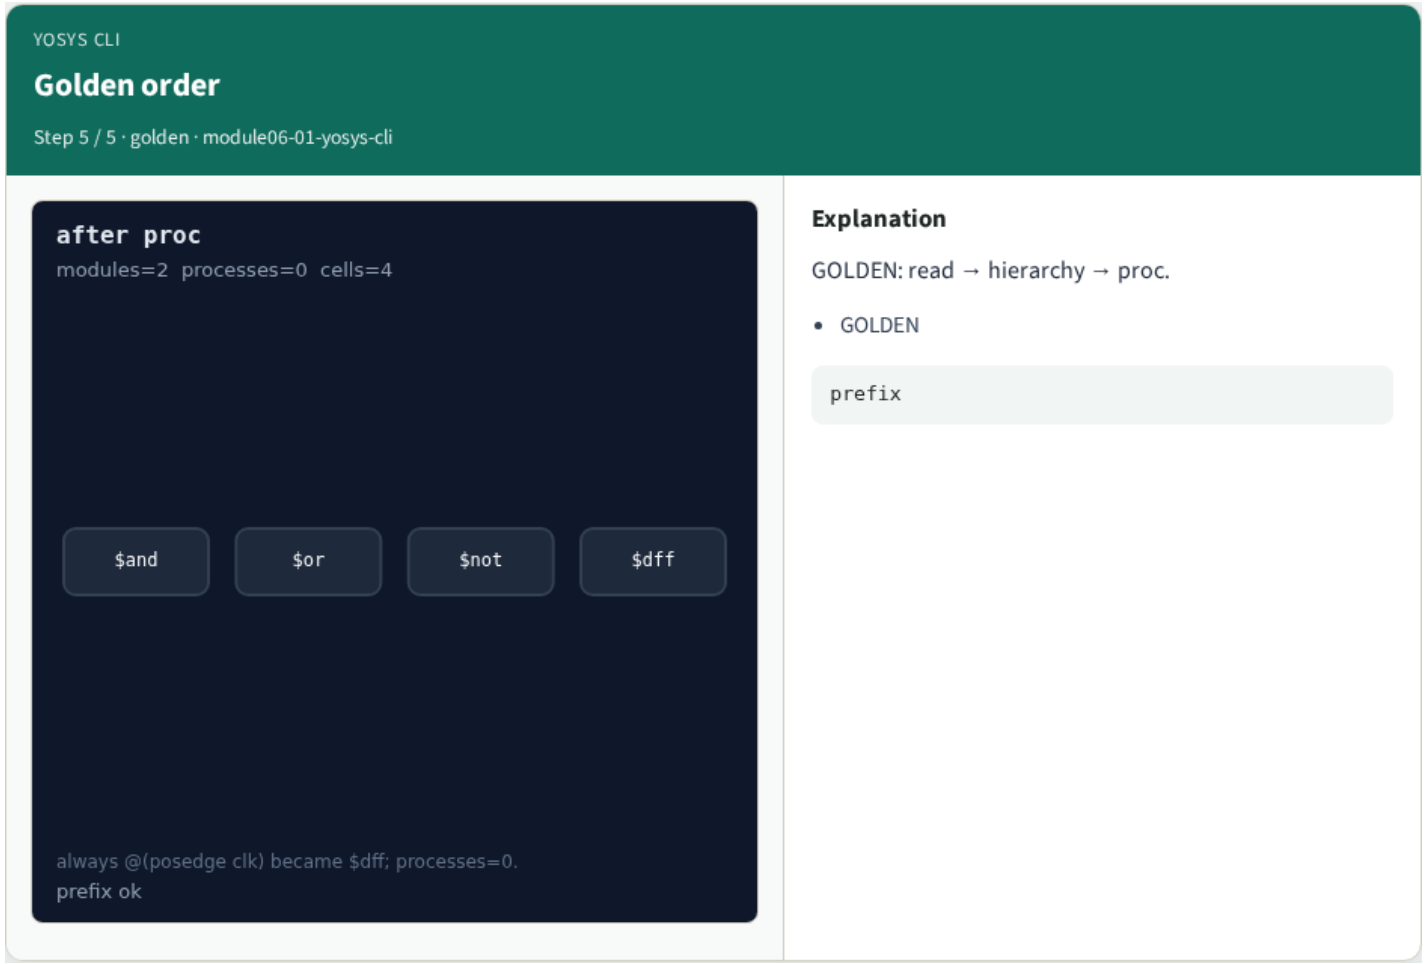

hierarchy -top

proc next

proc next

Golden order

Golden order

Browser lab track

- Open **yosys-cli**
- Open **yosys-cli**
- Append read_verilog, hierarchy, proc in order

Implement track

- Call pass_cli_check(['read_verilog','hierarchy','proc']); assert ok

Pitfalls

- Starting with proc
- Skipping hierarchy -top

Try these

Try these — try these

```
cd courses/learn_yosys/common
python3 -c "from real_solvers import pass_cli_check;
print(pass_cli_check())"
```

Pseudocode

Pseudocode — try these

```
recipe ← []; append read_verilog; hierarchy; proc; ok ← prefix
matches golden
```
