Sequential

A full pass chains cleanup and mapping like a tiny ABC script

The idea

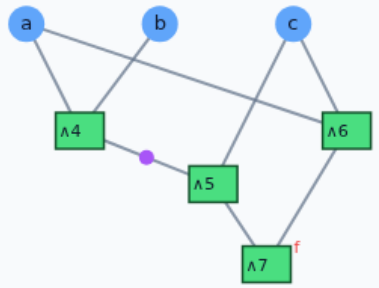

- Sequential_synth returns stats, strash size, rewrite, cuts, mapping, tradeoff

Pipeline

SEQUENTIAL SYNTH

Pipeline

Step 1 / 5 · pipe · module04-01-sequential-synth

Explanation

One click runs the full toy flow.

- stats→map

```
ABC-ish
```

Pipeline

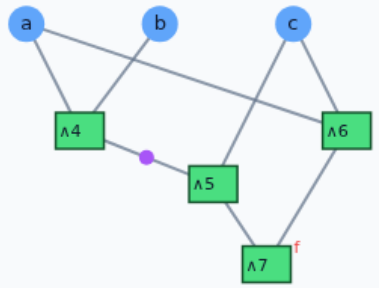

Stats

SEQUENTIAL SYNTH

Stats

Step 2 / 5 · stats · module04-01-sequential-synth

{"pi":3,"and":4,"po":1,"total":7}

Explanation

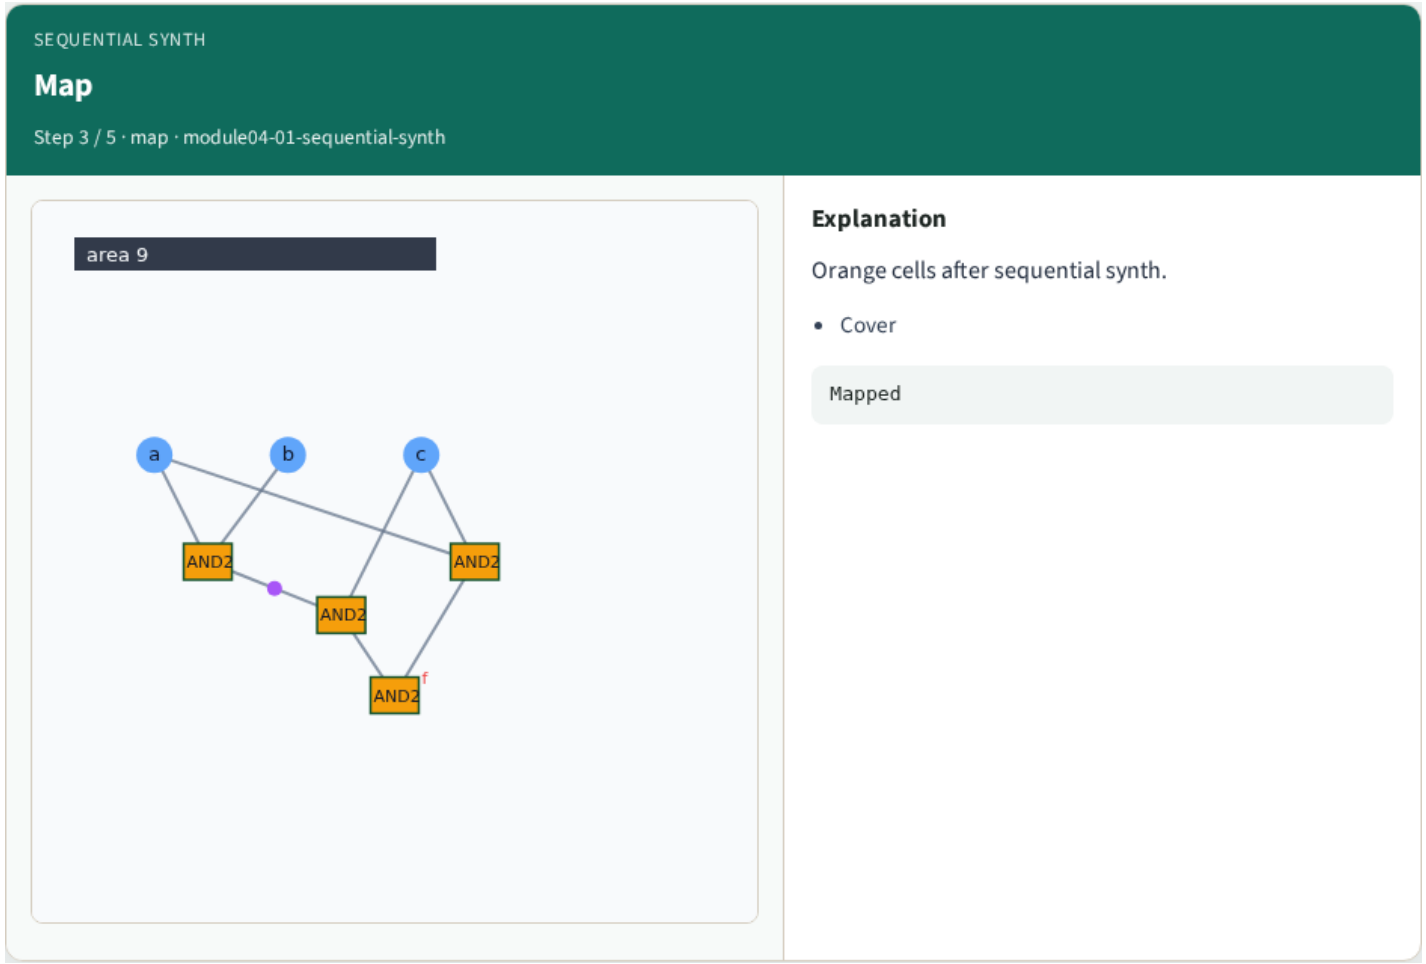

PI/AND/PO match goldens.

- aigStats

```
AND=4
```

Stats

Map

SEQUENTIAL SYNTH
Map
Step 3 / 5 · map · module04-01-sequential-synth
area 9
a
b
c
AND2
AND2
AND2
AND2
f
Explanation
Orange cells after sequential synth.

Done

SEQUENTIAL SYNTH

Done

Step 5 / 5 · done · module04-01-sequential-synth

Explanation

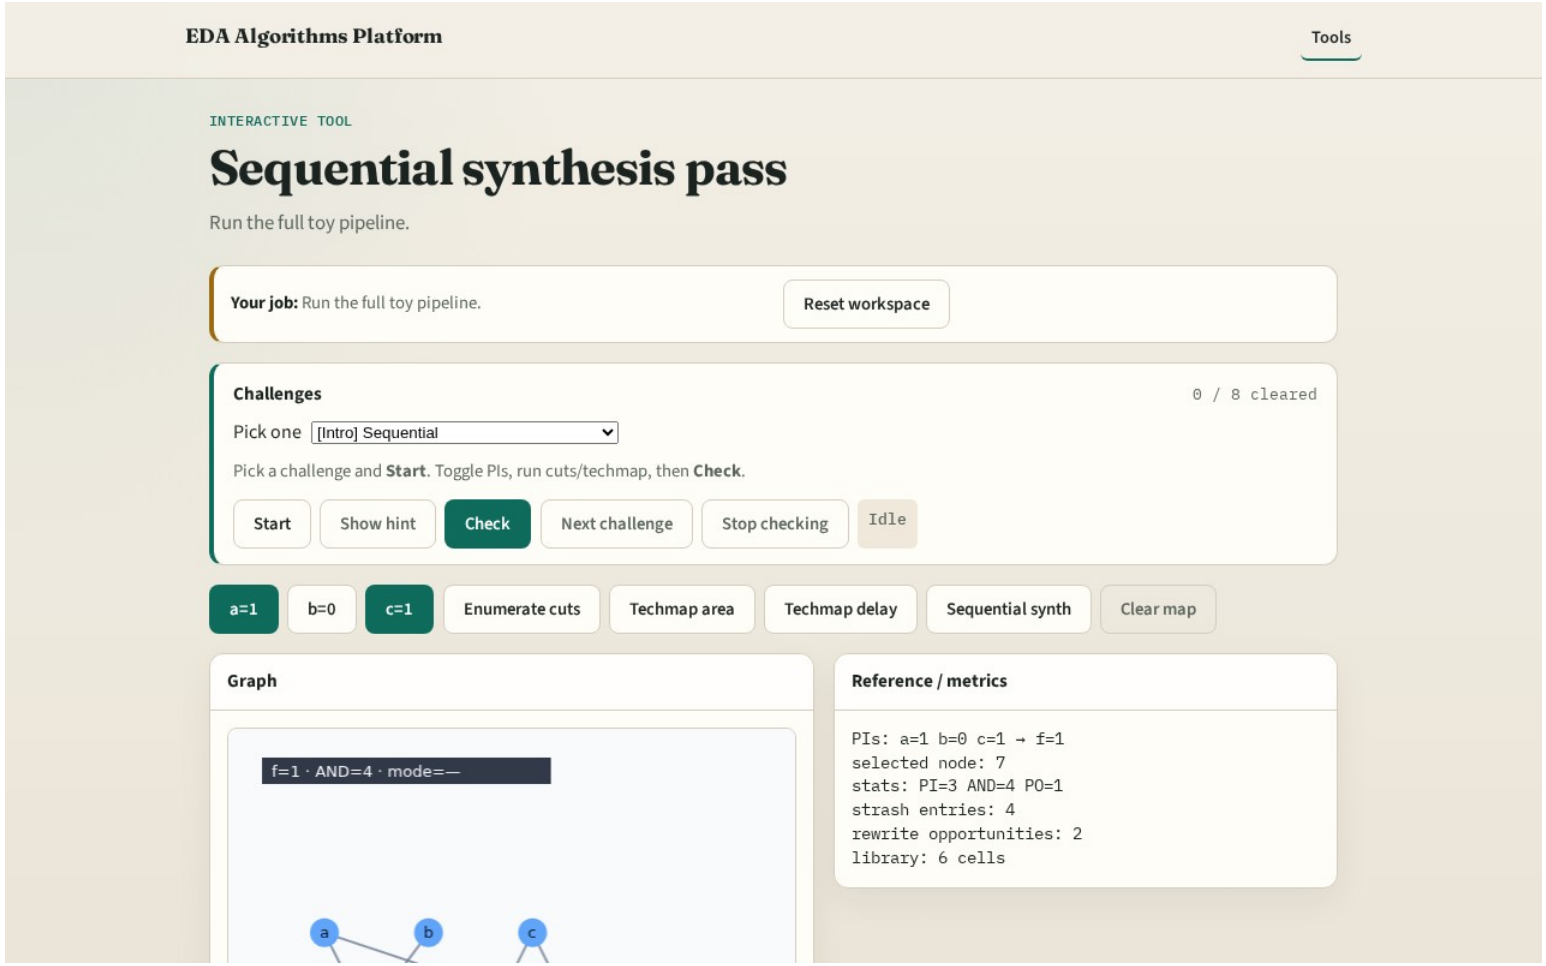

Next: offline compare, then wrap toward STA.

- learn_sta

```
Wrap
```

Done

Browser lab track

Browser lab starter

Implement track

- Call sequential_synth(data); assert mapping.area > 0

Pitfalls

- Skipping strash
- Mixing delay and area covers without clearing

Your turn

- Next: offline benchmark, then wrap
