Offline compare

Track A prints drc_compare without the browser

The idea

- Load tiny_drc.json; print rule_count, violation_count, boolean_hits, ok

Why offline

- Print drc_compare metrics offline without the browser

Commands

- Python3 -c "from solvers import drc_compare; print(drc_compare())" in common/

What to compare

- Load tiny_drc.json; print rule_count, violation_count, boolean_hits, ok

Next

- Complete the quiz for this part
- Continue to the wrap module
