Why Magic

OpenLane and OpenROAD lean on Magic for layout, DRC, and GDS

Four parts

- Part A is the interactive layout map
- Part B drives real Magic with Tcl
- Part C binds algorithms to DRC/GDS goldens
- Part D orients you to the Tile/Plane C tree

Prereq

- You should already know layout basics from learn_digital
- Here those ideas become Magic commands and reports

Next

- Complete the quiz for this part
- Start with the paint layers lab
