Why GDS

Map Magic layers to GDS layer numbers

The idea

- GOLDEN: gds_layer_count=6; metal1→49

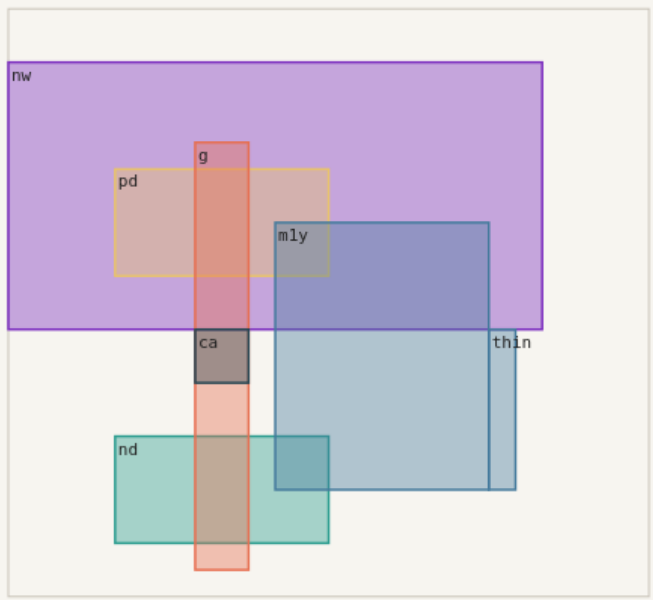

GDS map

GDS WRITE MAP

GDS map

Step 1 / 5 · map · module03-01-gds-write-map

map

Explanation

Magic gds write maps layer names to GDS numbers.

- gds_map

```
map
```

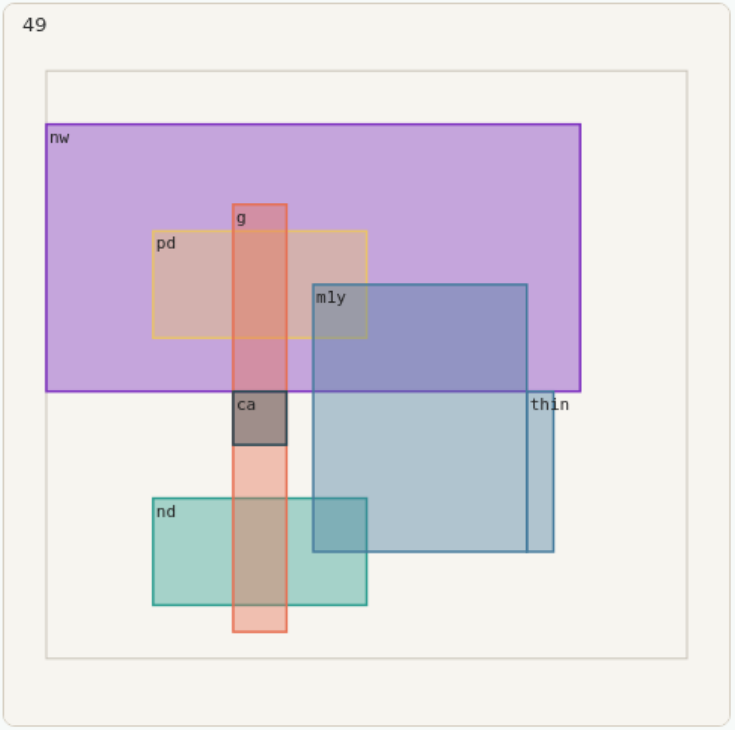

GDS map

metal1→49

GDS WRITE MAP

metal1 → 49

Step 2 / 5 · metal1 · module03-01-gds-write-map

Explanation

metal1 streams as GDS layer 49.

- metal1

```
49
```

metal1→49

Streamout

Golden

Golden

Browser lab track

- Open **gds-write-map**
- Run the stage buttons and Check the goldens

Implement track

- From common/, run solvers.py and confirm MAGIC_PARTA_OK

Pitfalls

- Mixing KLayout viewer shortcuts with Magic paint commands
- Forgetting min_width when reading DRC errors

Try these

- From the common folder, run the Magic map self-test

Try these — try these

```
cd courses/learn_magic/common
python3 solvers.py
```

Pseudocode

- Here is the check in plain steps

Pseudocode — try these

```
gds_layer_count=6; metal1→49.
ok if goldens match
```

Next

- Complete the quiz for this part
- Continue the Magic Part A map, then the real CLI track
