Browser lab track

- Open **real-gds**
- Build the Magic recipe or open evidence stages, then Check

Implement track

- From common/, run real_solvers.py and confirm REAL_MAGIC_OK

Pitfalls

- Editing goldens by hand without re-running scripts
- Confusing Part A map JSON with checked-in logs

Try these

- From the common folder, run the real Magic self-test

Try these — try these

```
cd courses/learn_magic/common
python3 real_solvers.py
```

Pseudocode
