Why algorithms

Region scan for width violations on painted rects

The idea

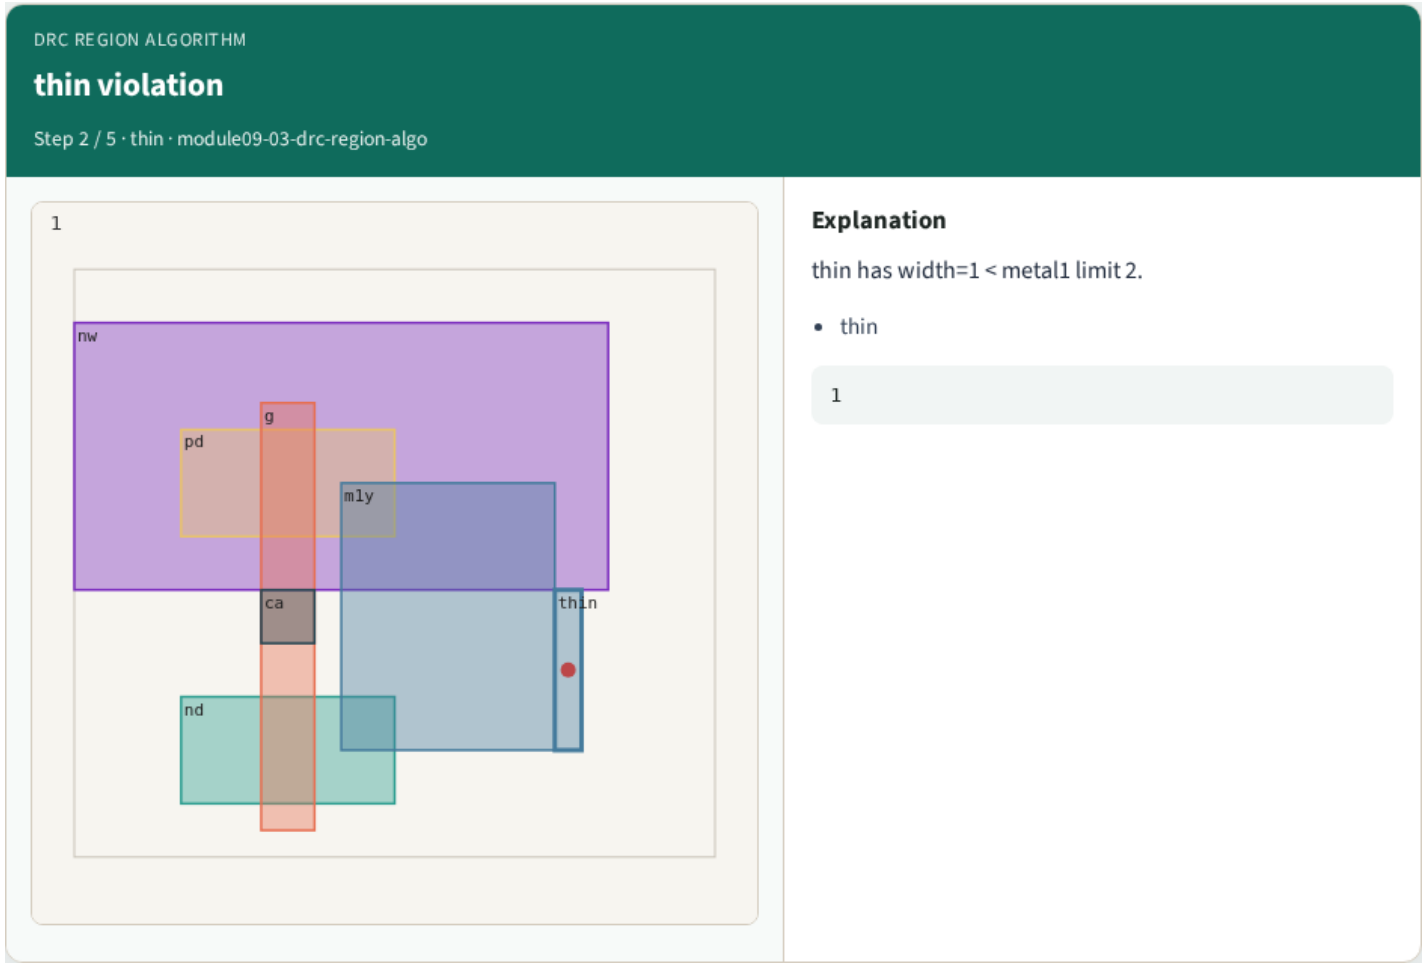

- GOLDEN: drc_error_count=1 on thin metal1

Region scan

Region scan

Golden

Step 5 / 5 · golden · module09-03-drc-region-algo

1

Explanation

GOLDEN: error on thin metal1.

- GOLDEN

```
1
```

Golden

Browser lab track

- Open **drc-region-algo**
- Run connectivity / DRC / extract / bind, then Check

Implement track

- From common/, run algo_solvers.py and partc_bind.py

Pitfalls

- Changing tiny_algo_magic without updating Part B goldens
- Ignoring the bind side

Try these

- From the common folder, run the Part C self-tests

Try these — try these

```
cd courses/learn_magic/common
python3 algo_solvers.py
python3 partc_bind.py
```

Pseudocode

- Here is the check in plain steps

Pseudocode — try these

```
drc_error_count=1 on thin metal1.
ok if goldens match and bind
```

Next

- Complete the quiz for this part
- Continue Part C, then internals literacy
