Browser lab track

- Open **magic-algo-engine**
- Run connectivity / DRC / extract / bind, then Check

Implement track

- From common/, run algo_solvers.py and partc_bind.py

Pitfalls

- Changing tiny_algo_magic without updating Part B goldens
- Ignoring the bind side

Try these

- From the common folder, run the Part C self-tests

Try these — try these

```
cd courses/learn_magic/common
python3 algo_solvers.py
python3 partc_bind.py
```

Pseudocode

- Here is the check in plain steps

Pseudocode — try these

```
engine ok; bind drc 1↔1, gds 6↔6.
ok if goldens match and bind
```
