Why Netgen

OpenLane uses Netgen for LVS , comparing schematic and layout netlists

Four parts

- Part A is the interactive LVS map
- Part B drives real Netgen with Tcl
- Part C binds algorithms to LVS goldens
- Part D orients you to the netcomp C tree

Prereq

- You should know LVS basics from learn_lvs or layout from learn_magic

Next

- Complete the quiz for this part
- Start with the read netlists map lab, then device classes, then the real CLI modules
