Why Netgen internals

Read the compare flow bound to Part B goldens

The idea

- GOLDEN: read_sch→read_lay→hash→match→emit (matched=2/4)

read_sch

READ COMPARE C

read_sch

Step 1 / 5 · sch · module14-03-read-compare-c

Explanation

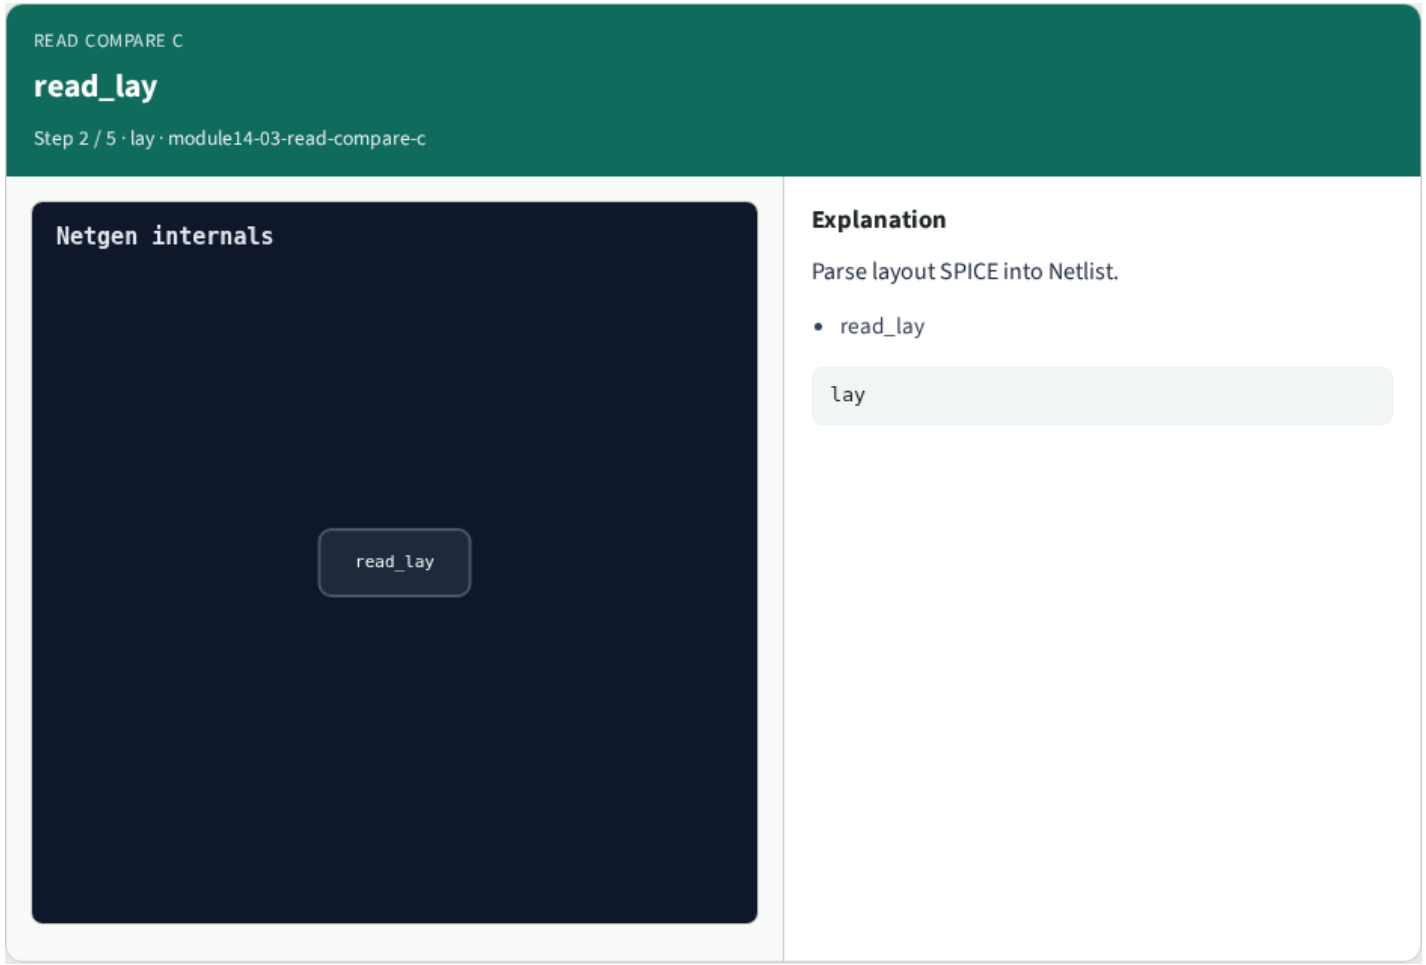

Parse schematic SPICE into Netlist.

- read_sch

```
sch
```

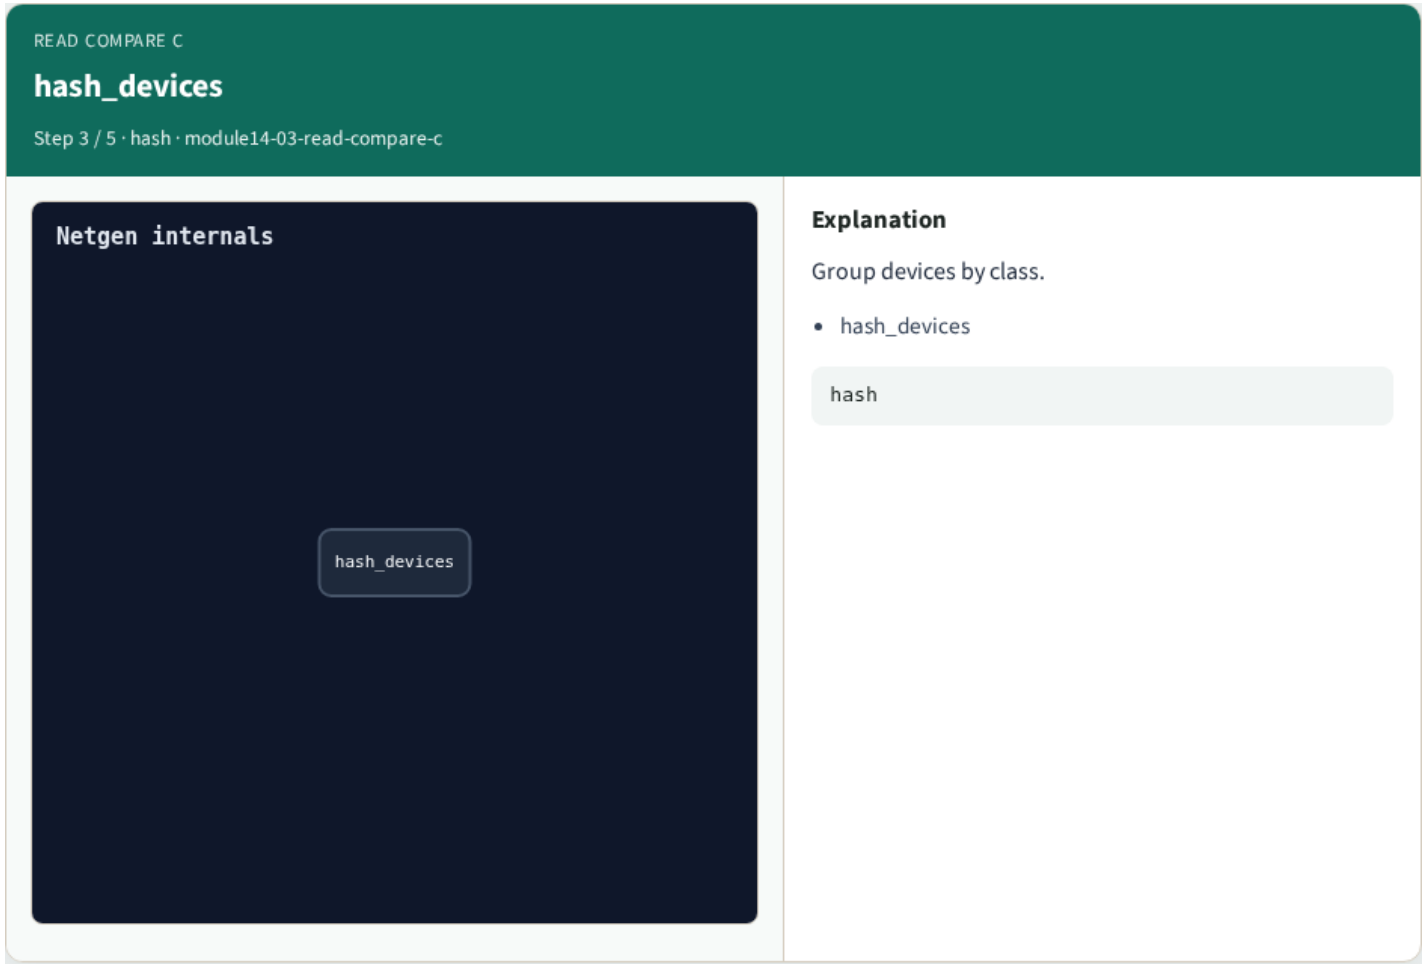

read_sch

read_lay

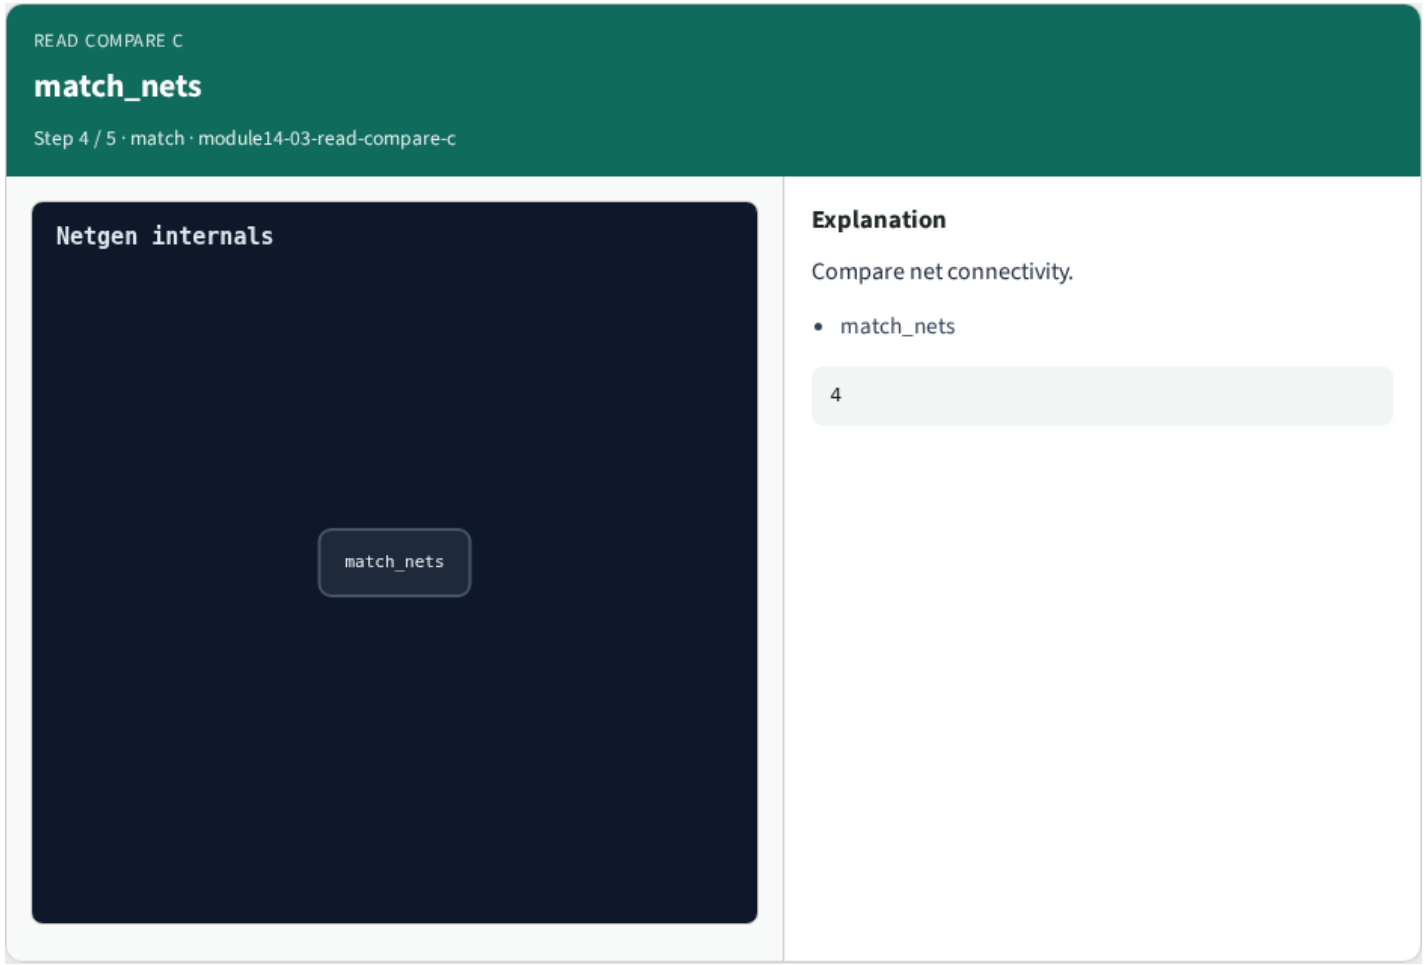

read_lay

hash_devices

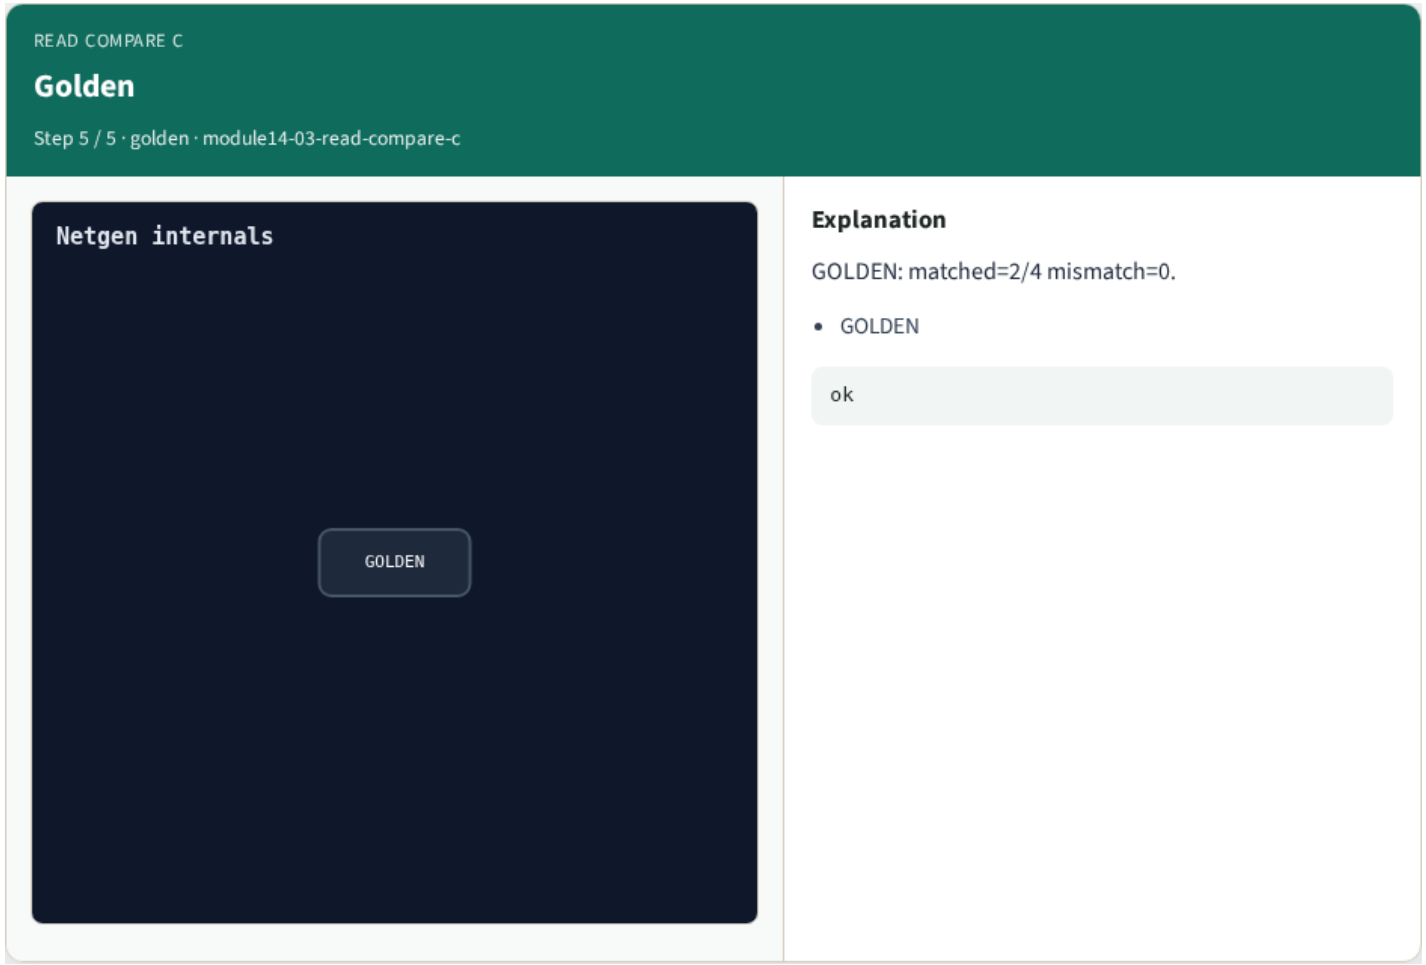

hash_devices

match_nets

match_nets

Golden

Golden

Browser lab

- Open **read-compare-c**

Implement track

- Call read_compare_c() in internals_solvers

Pitfalls

- Treating browser JSON as the C API

Try these

- From the common folder, run the internals self-test

Try these — try these

```
cd courses/learn_netgen/common
python3 internals_solvers.py
```

Pseudocode

- Here is the checklist in plain steps

Pseudocode — try these

```
read_sch→read_lay→hash→match→emit (matched=2/4).
ok if goldens match INTERNALS_GOLDENS
```

Next

- Complete the quiz for this part
- Wrap the Netgen path
