Why contribute

Reading is not enough

The idea

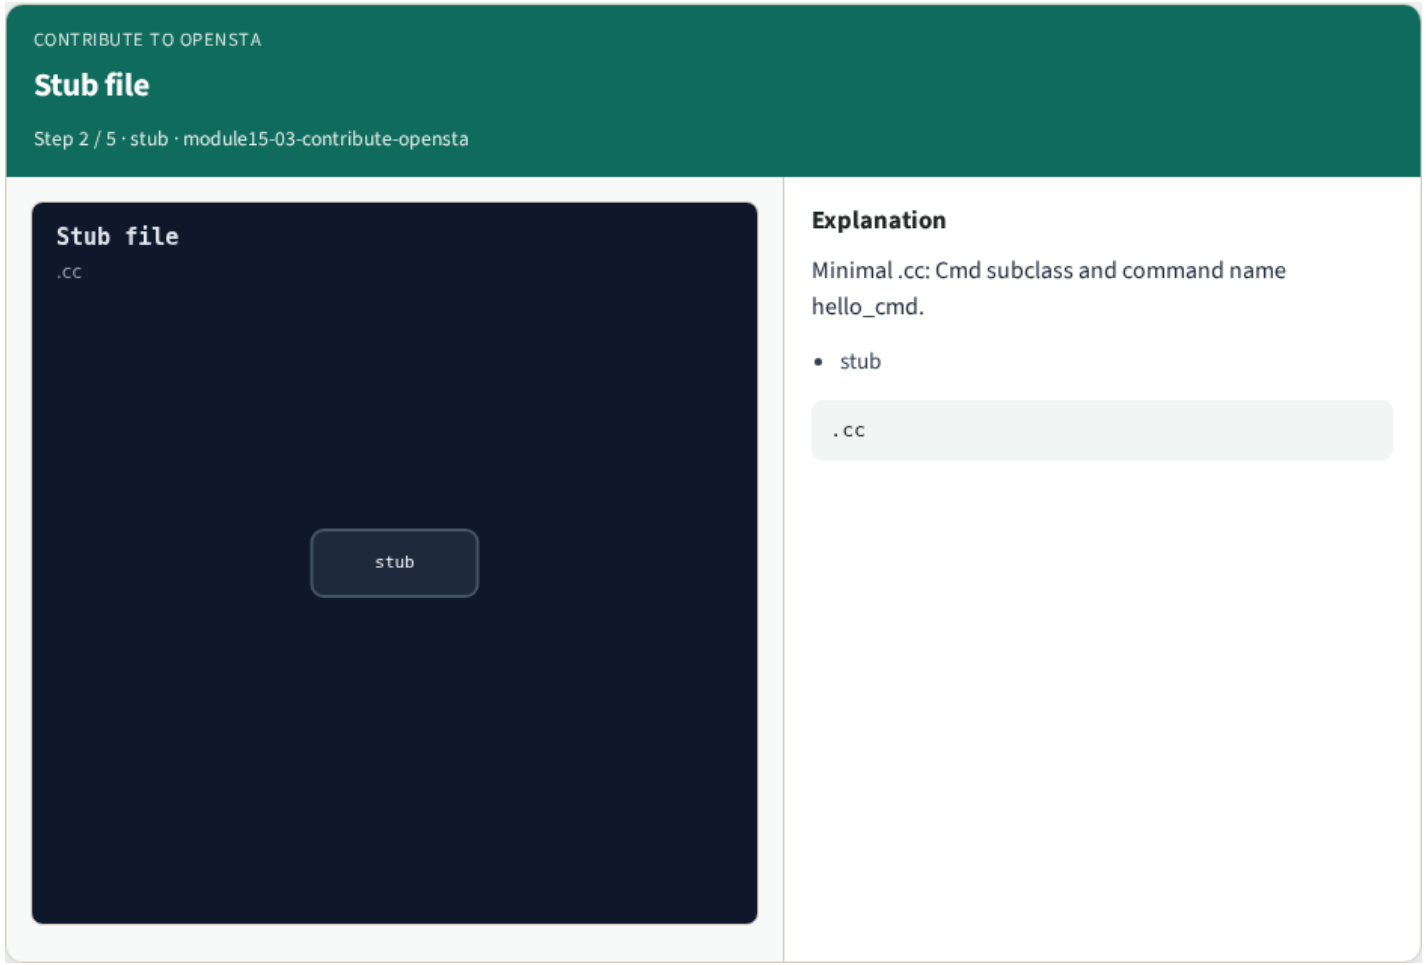

- Add app/HelloCmd.cc, register the Tcl command, hook CMake, rebuild, sta -help hello_cmd

CMake hook

Smoke

CONTRIBUTE TO OPENSTA
Smoke
Step 4 / 5 · smoke · module15-03-contribute-opensta
Smoke
smoke
sta -help
Explanation
sta -help hello_cmd proves the command exists.
sta -help
smoke

Smoke

Golden

Golden

Browser lab track

- Open **contribute-opensta**
- Assemble the contribute checklist and check

Implement track

- Call contribute_opensta(); assert checklist length and smoke cmd

Pitfalls

- Editing only docs
- Forgetting the CMake entry
- Skipping help smoke

Try these

- From the common folder, call contribute_opensta and print the checklist

Try these — try these

```
cd courses/learn_opensta/common
python3 -c "from internals_solvers import contribute_opensta;
print(contribute_opensta())"
```

Pseudocode

- Here is the contribute checklist in plain steps

Pseudocode — try these

```
path ← app/HelloCmd.cc
register Tcl cmd hello_cmd
add to CMake; rebuild
smoke ← sta -help hello_cmd
```

Next

- Complete the quiz for this part
- Wrap the OpenSTA path , you can use OpenSTA and open the C++ tree with intent
