# Welcome

After LVS you still need PEX , geometry load, R/C extract, RC network, reduce, back-annotate, SPEF-lite

# The idea

- Toy tiny_pex: four segments on net n1 → R_total=3.06, C_total=1.376, SPEF-lite emit

# Two tracks

- Implement track uses common/ solvers; browser lab track uses platform tools

# Toy design

- Tiny_pex: four segments on net n1; R_total=3.06; C_total=1.376

# Path

- Geometry → R extract → C extract → RC network → reduce → annotate → SPEF → engine

# Begin

- Next: geometry load
