Geometry load

PEX starts from annotated layout segments , layers, nets, and segment ids

The idea

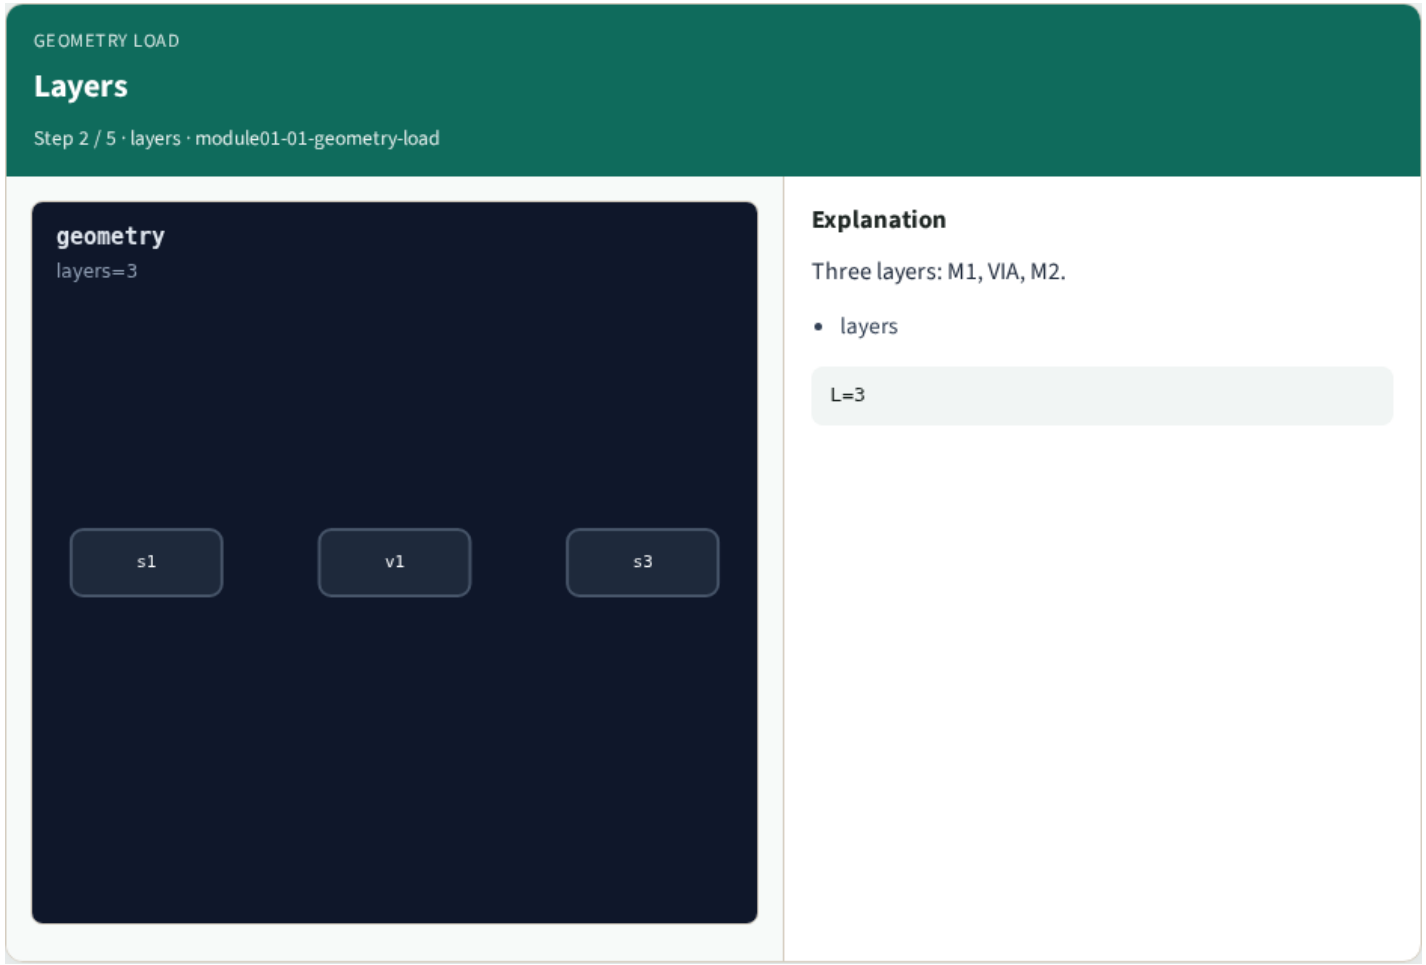

- GOLDEN: 4 segments, 3 layers

Segments

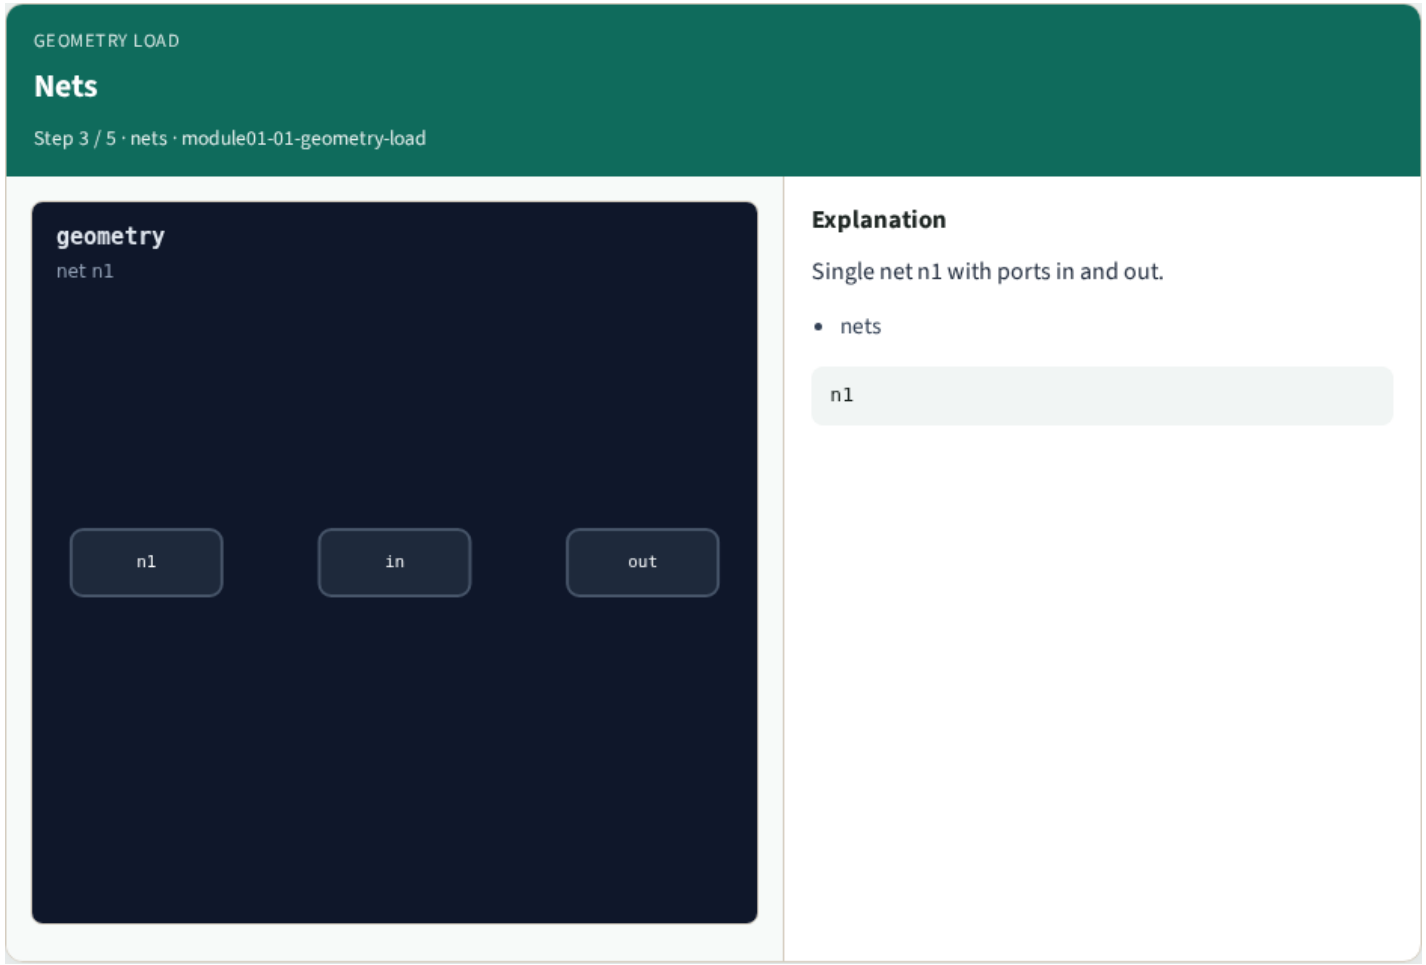

Segments

Layers

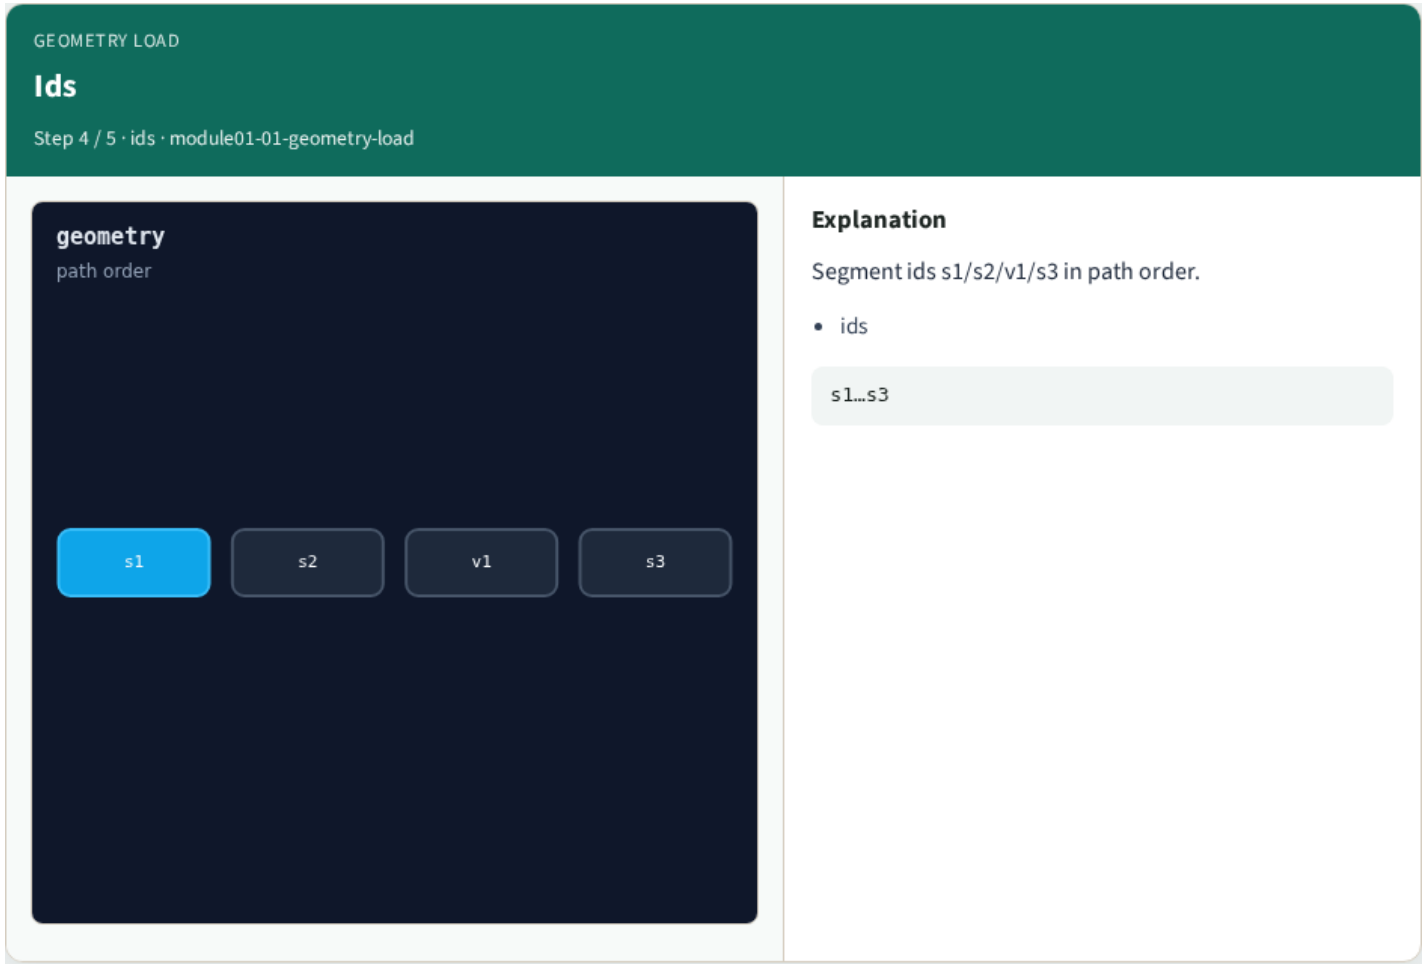

Layers

Nets

GEOMETRY LOAD
Nets
Step 3 / 5 · nets · module01-01-geometry-load
geometry
net n1
n1
in
out
Explanation
Single net n1 with ports in and out.

Browser lab track

Browser lab starter

Implement track

- Call load_geometry(); assert segment_count==4 and layer_count==3

Pitfalls

- Counting ports as segments
- Ignoring VIA layer in layer_count

Your turn

- Next: resistance extract
