SPEF-lite

SPEF-lite records one *RES and one *CAP from the reduced network

The idea

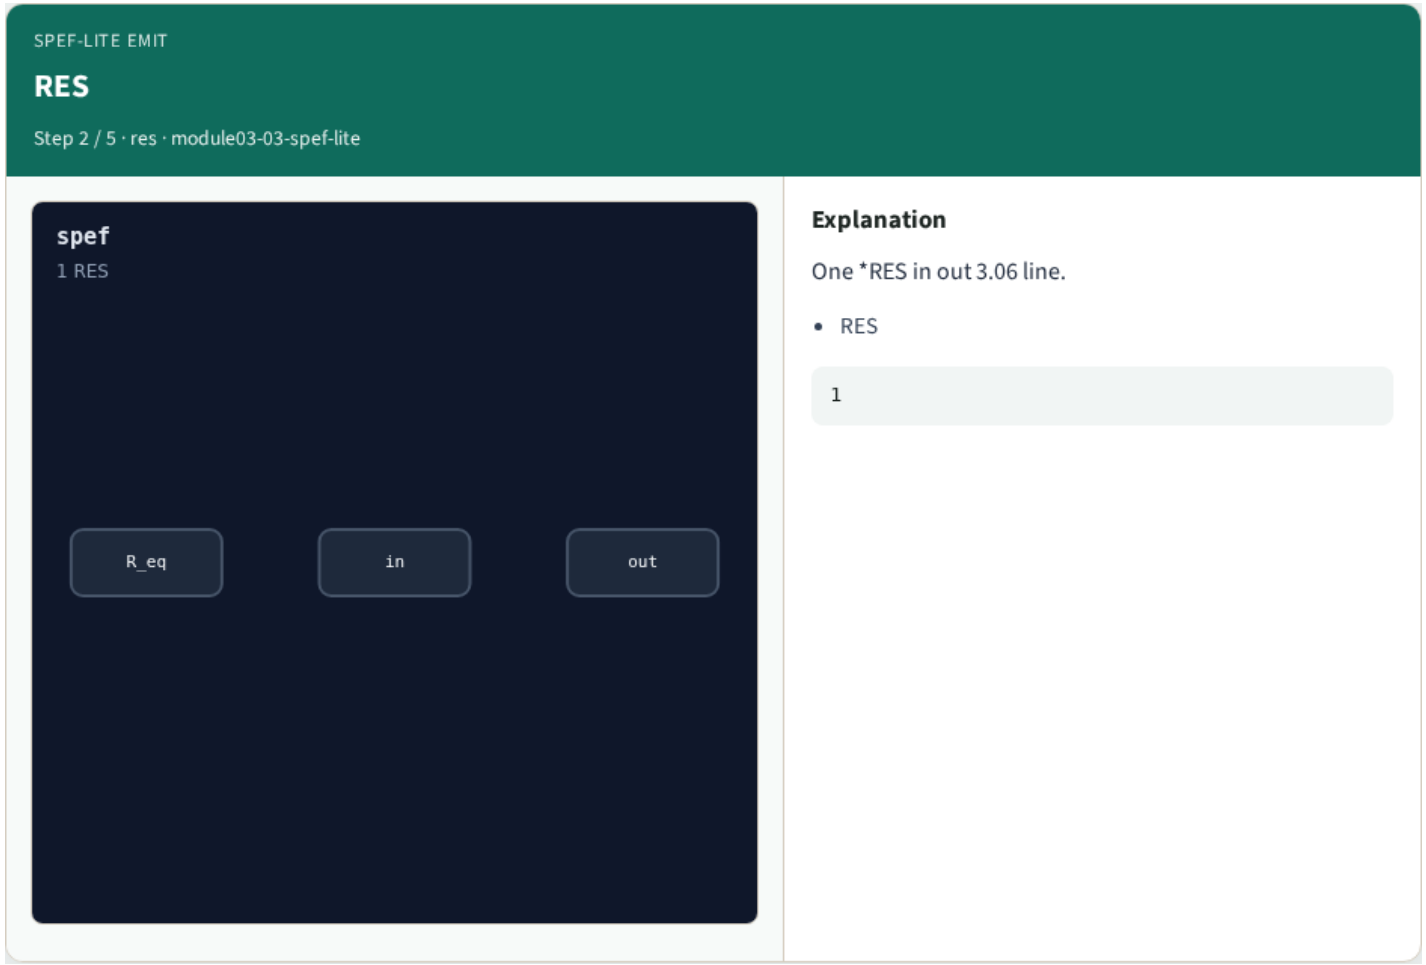

- GOLDEN: 1 RES + 1 CAP

Header

Browser lab track

Browser lab starter

Implement track

- Call emit_spef_lite(); assert res_count==1 and cap_count==1

Pitfalls

- Emitting per-segment instead of reduced
- Missing *NET line

Your turn

- Next: PEX engine integration
