# Offline compare

Track A prints pex_compare without the browser

# The idea

- Load tiny_pex.json; print segments, r_total, c_total, r_eq, c_eq, ok

# Why offline

- Print pex_compare metrics offline without the browser

# Commands

- Python3 -c "from solvers import pex_compare; print(pex_compare())" in common/

# What to compare

- Load tiny_pex.json; print segments, r_total, c_total, r_eq, c_eq, ok
