Why SDC

Declare create_clock period and name on clk

The idea

- GOLDEN: create_clock -period 10 → clk period=10

Clock port

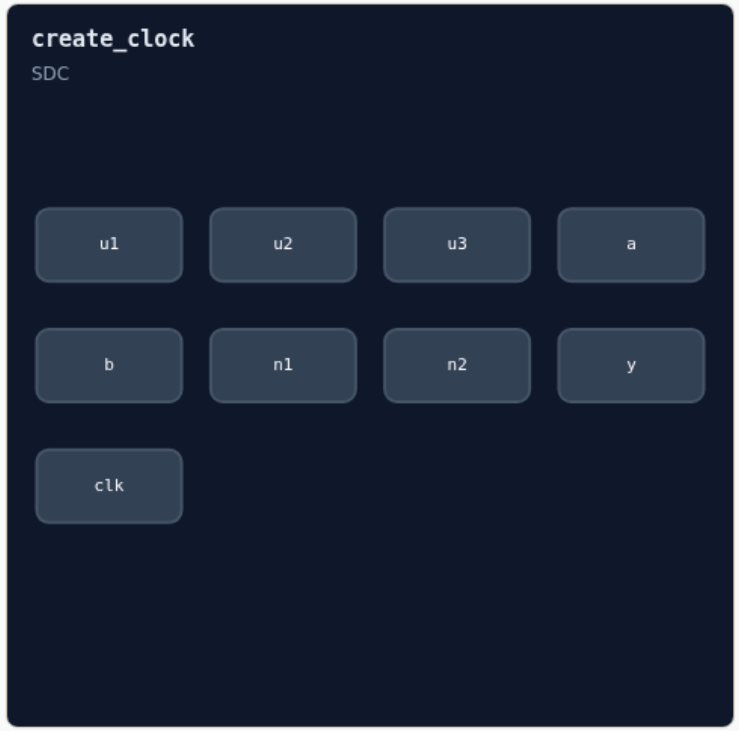

Clock port

create_clock

SDC CLOCKS

create_clock

Step 2 / 5 · create · module01-03-sdc-clocks

Explanation

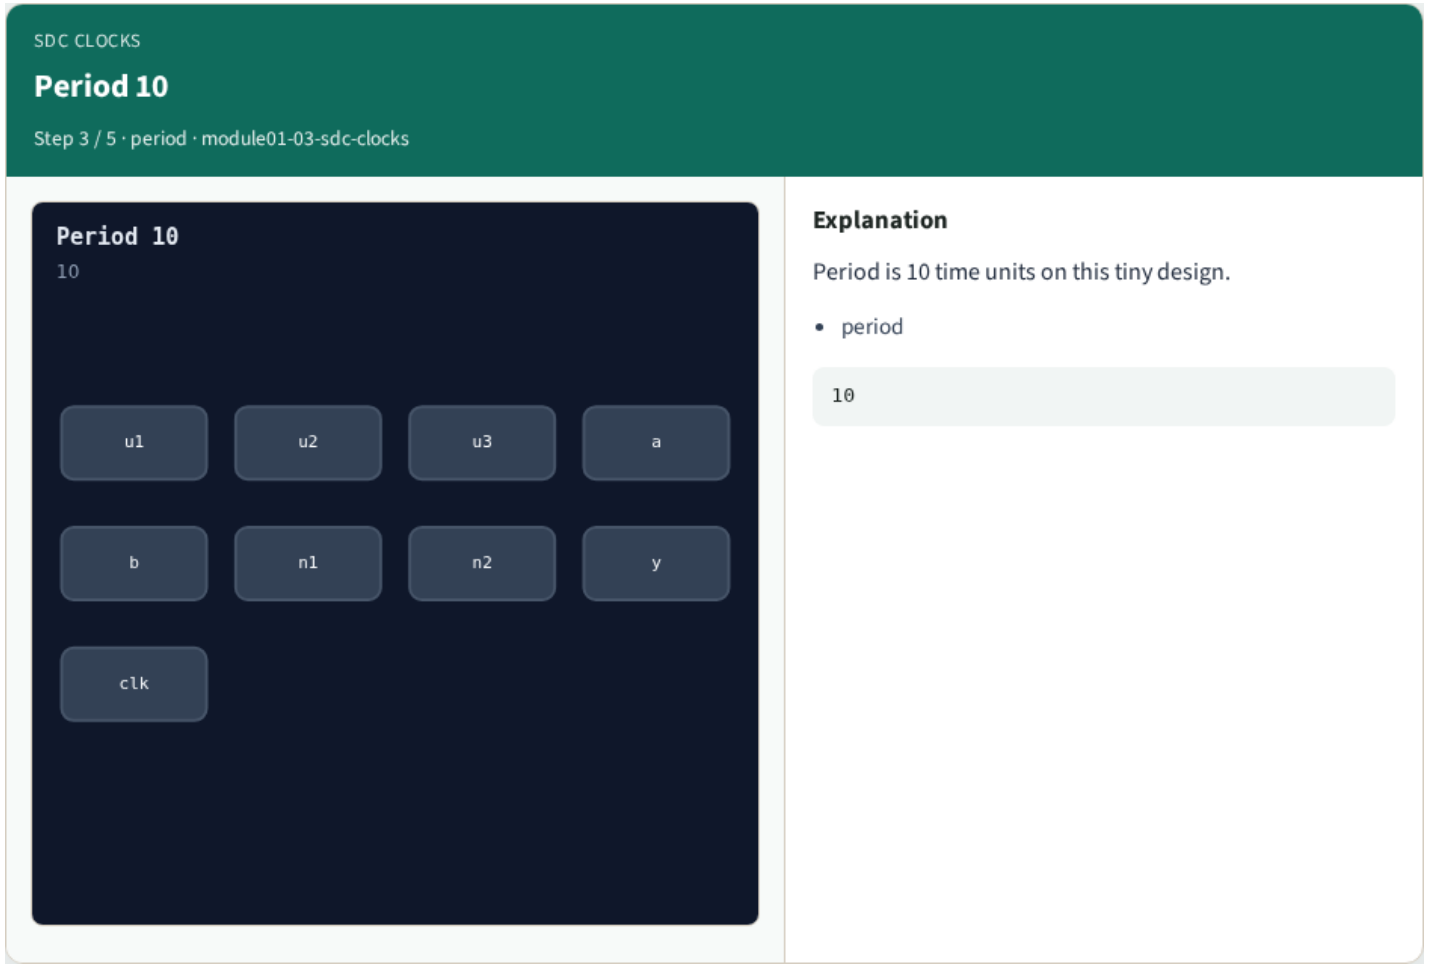

SDC create_clock names the clock and sets period.

- create_clock

```
SDC
```

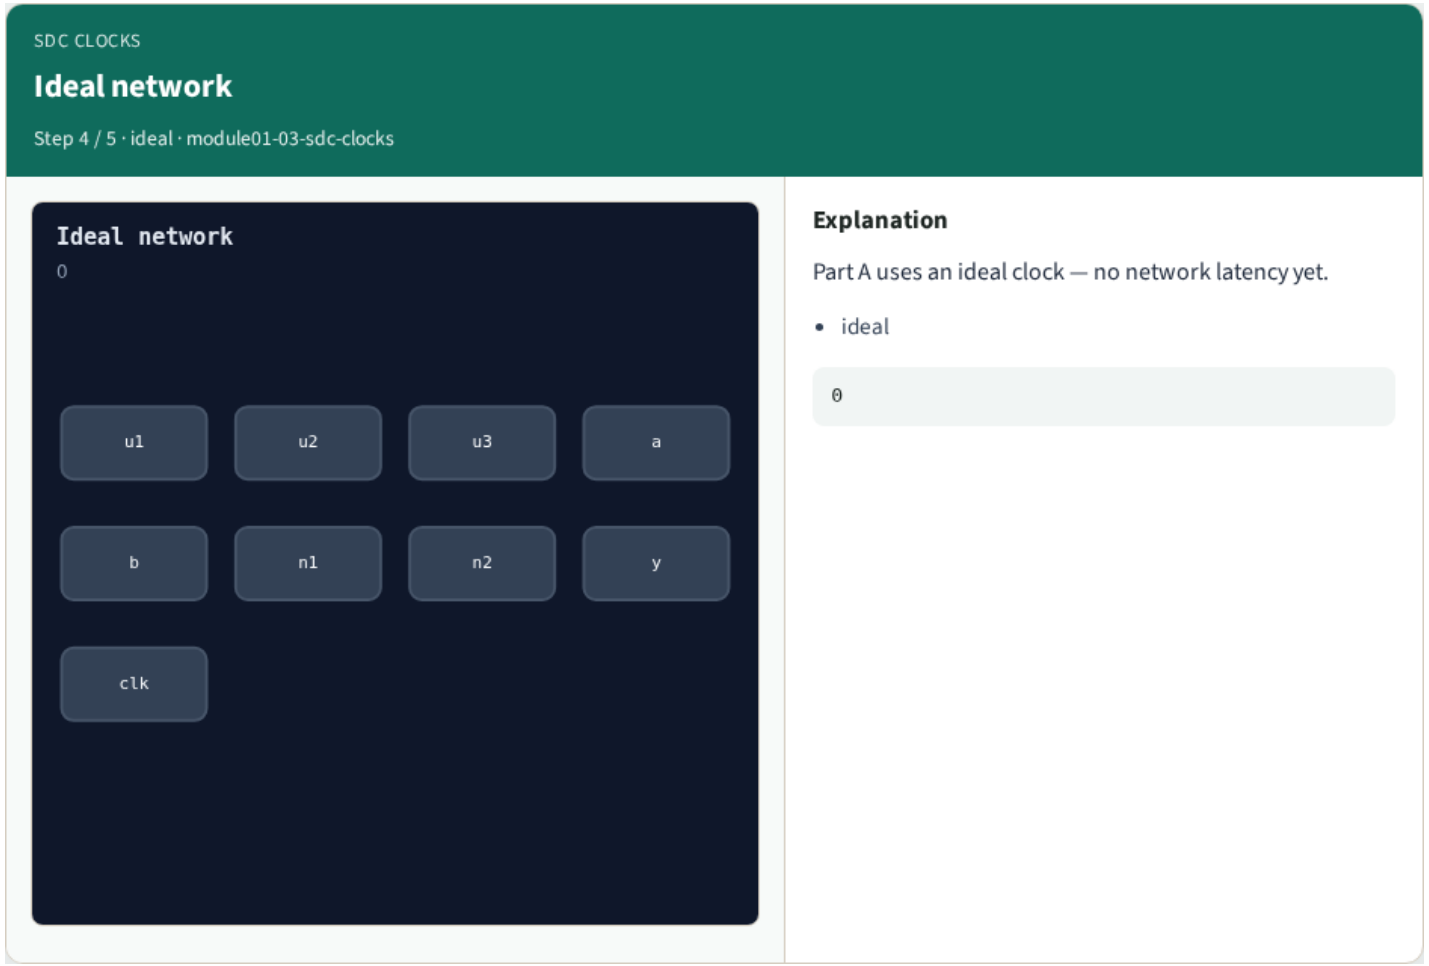

create_clock

Period 10

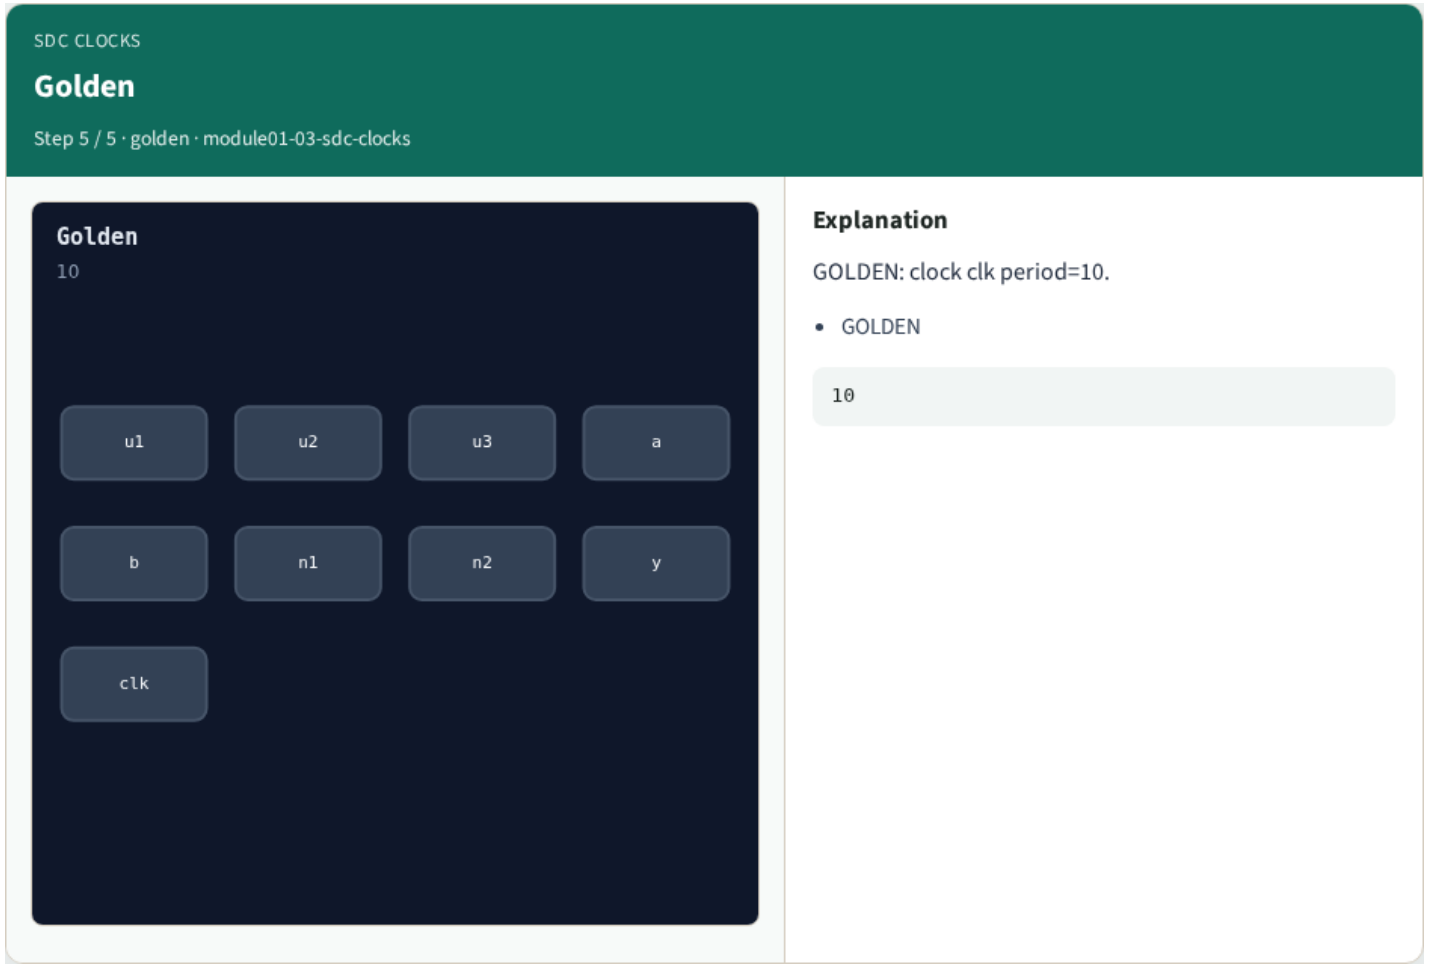

Period 10

Ideal network

Ideal network

Golden

Golden

Browser lab track

- Open **sdc-clocks**
- Run the stage buttons and Check the goldens

Implement track

- From common/, run solvers.py and confirm OPENSTA_MAP_OK

Pitfalls

- Mixing algorithm STA from learn_sta with OpenSTA command names
- Forgetting the clock period when reading slack

Try these

- From the common folder, run the OpenSTA map self-test

Try these — try these

```
cd courses/learn_opensta/common
python3 solvers.py
```

Pseudocode

- Here is the check in plain steps

Pseudocode — try these

```
create_clock -period 10 → clk period=10.
ok if goldens match
```

Next

- Complete the quiz for this part
- Continue the OpenSTA Part A map, then the real CLI track
