Why Arrival

Propagate arrivals and set required at the endpoint

The idea

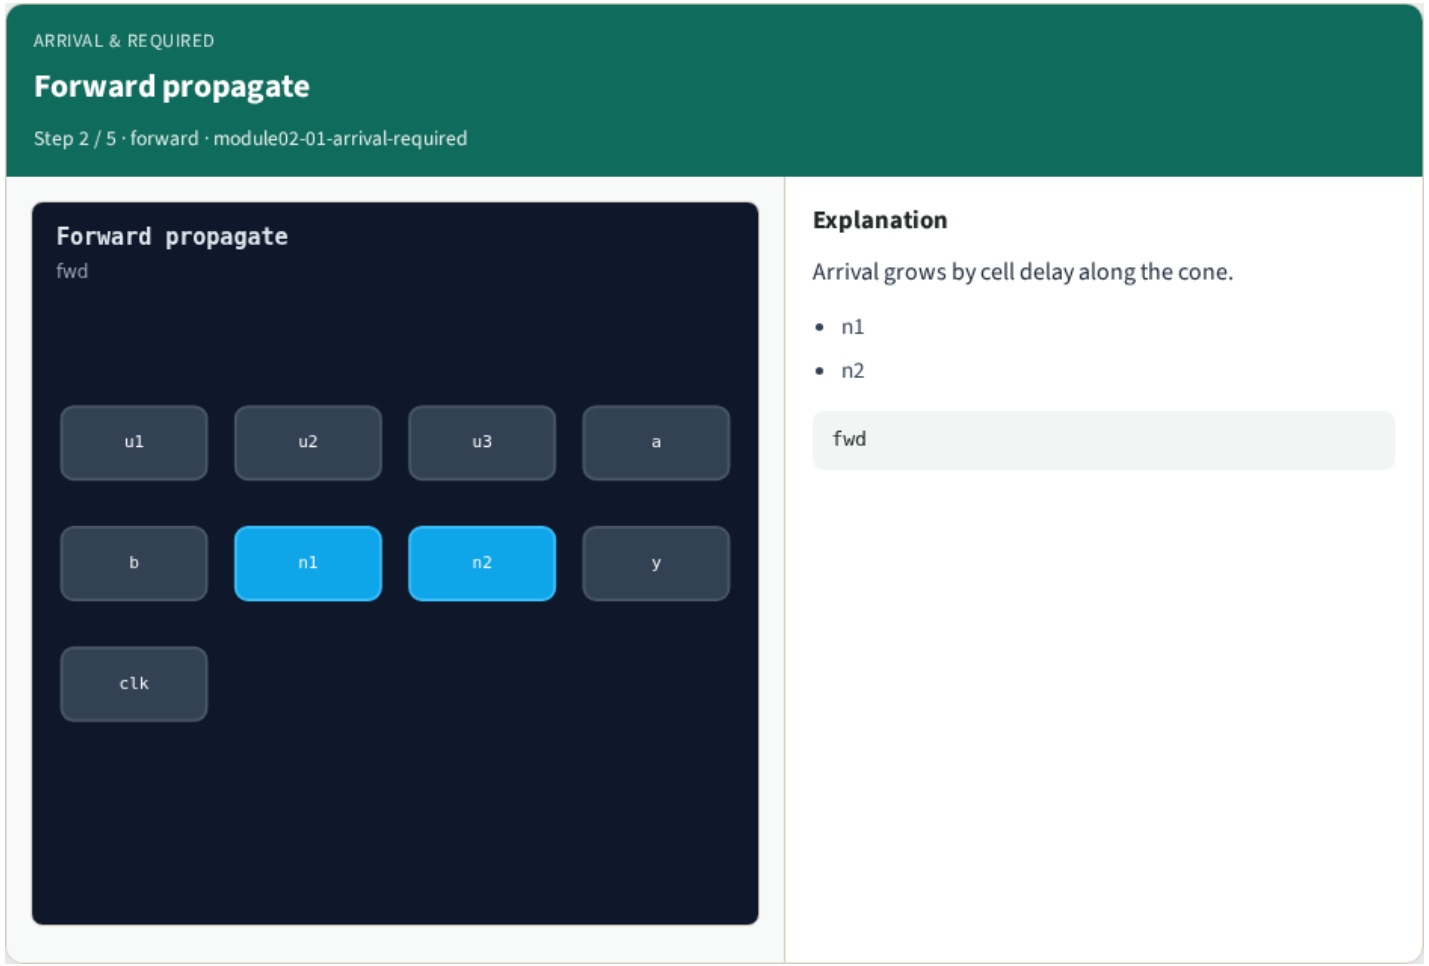

- GOLDEN: A(y)=2.0; R(y)=10.0

Input arrivals

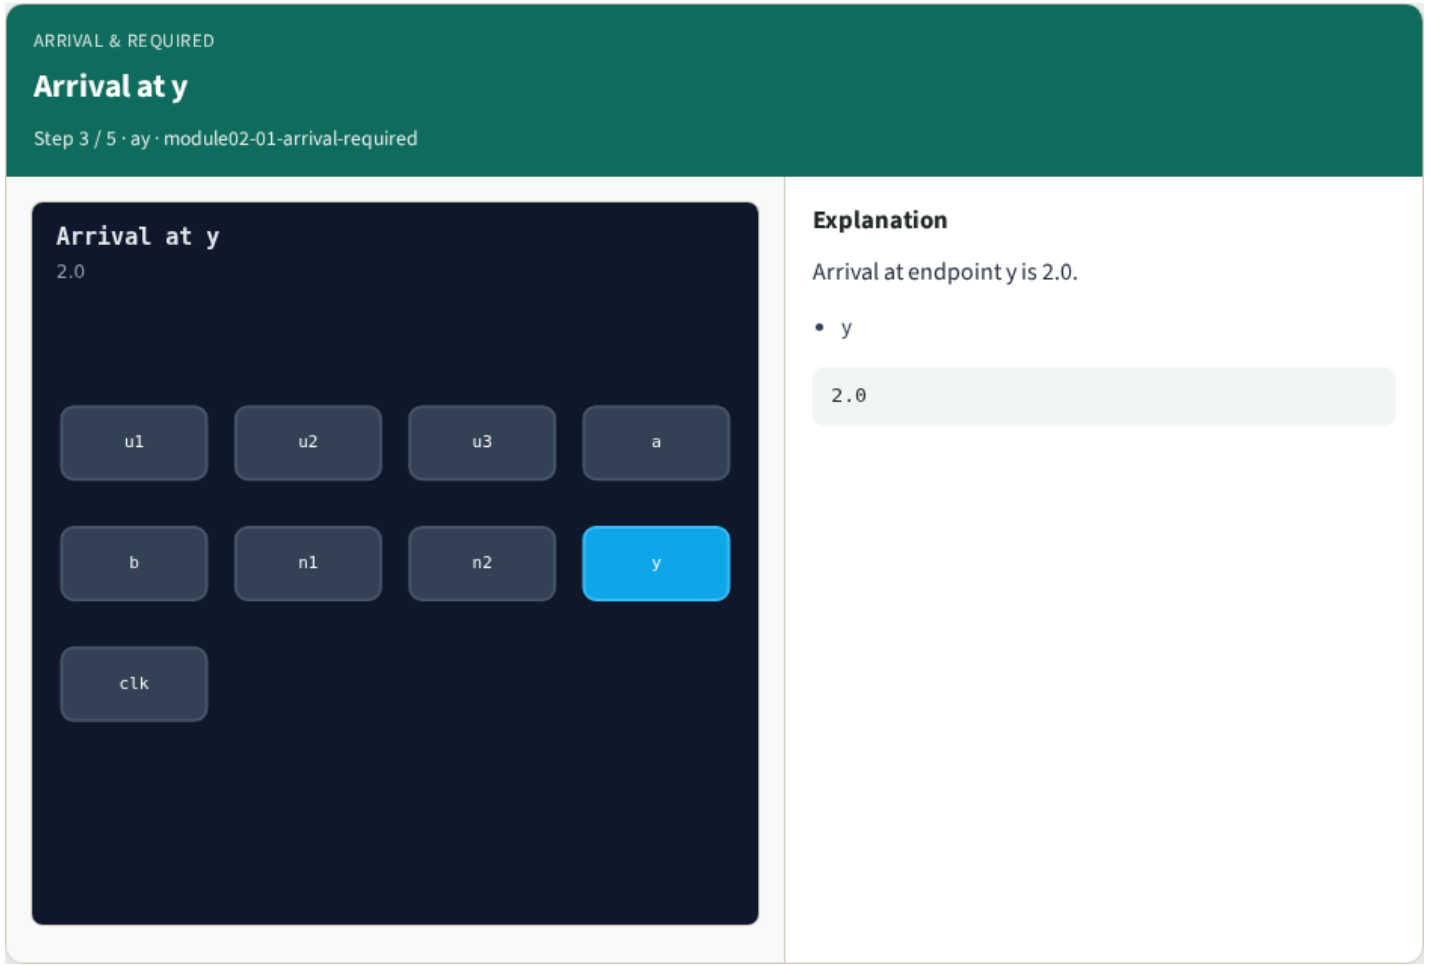

Input arrivals

Forward propagate

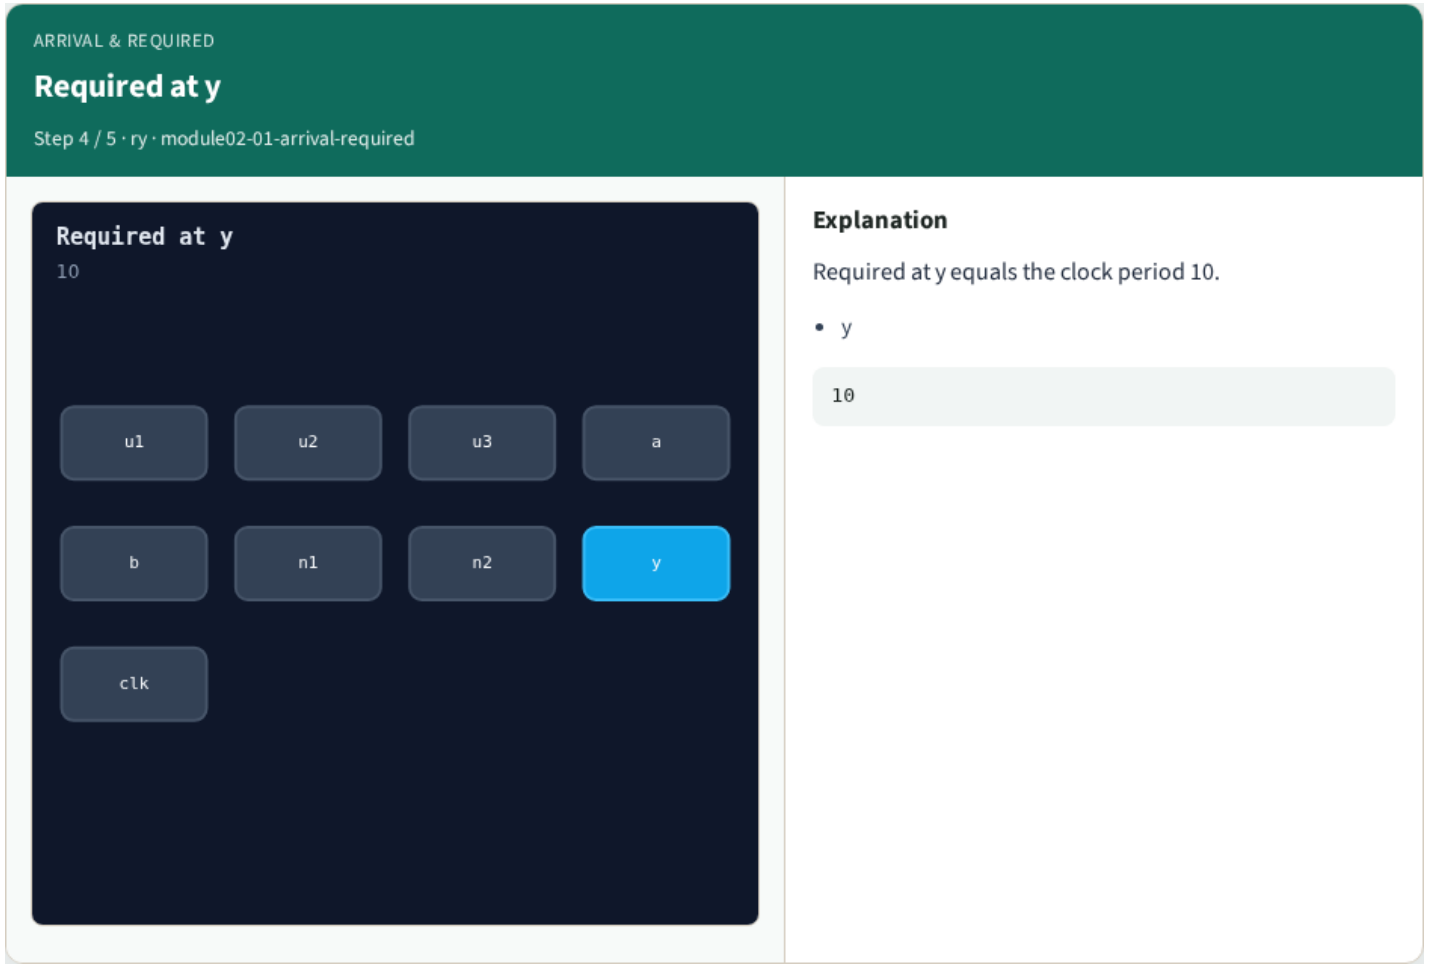

Forward propagate

Arrival at y

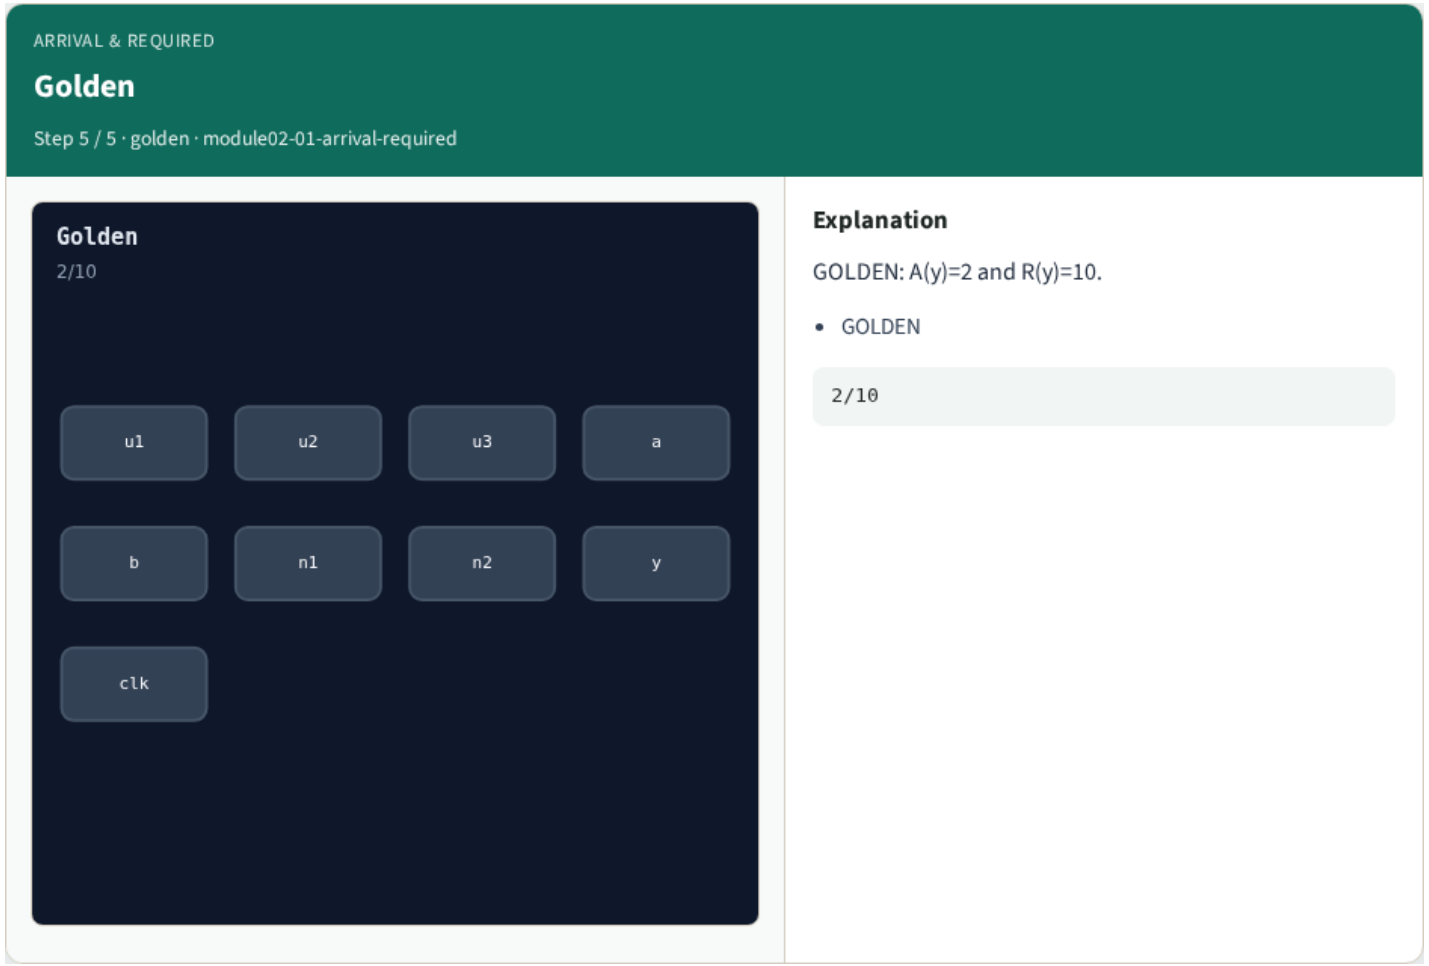

Arrival at y

Required at y

Required at y

Golden

Golden

Browser lab track

- Open **arrival-required**
- Run the stage buttons and Check the goldens

Implement track

- From common/, run solvers.py and confirm OPENSTA_MAP_OK

Pitfalls

- Mixing algorithm STA from learn_sta with OpenSTA command names
- Forgetting the clock period when reading slack

Try these

- From the common folder, run the OpenSTA map self-test

Try these — try these

```
cd courses/learn_opensta/common
python3 solvers.py
```

Pseudocode

- Here is the check in plain steps

Pseudocode — try these

```
A(y)=2.0; R(y)=10.0.
ok if goldens match
```

Next

- Complete the quiz for this part
- Continue the OpenSTA Part A map, then the real CLI track
