Why Yosys

Learn_yosys has four parts

Part A pass map

- Pass map on tiny_yosys

Part B real Yosys

- Part B: real binary, RTLIL cells, and checked-in goldens from Yosys 0.9 on tiny_and_or.v

Part C algorithms

- Part C: proc_mux, proc_dff ($adff), opt, techmap, extract, memory, fsm

Part D internals

- Part D: RTLIL C++ pillars, Pass registration, reading opt_clean

Implement track

- Implement track
- Browser labs mirror each part

Browser lab track

- Open the course labs
- Start at the pass-map proc lab, continue into CLI, algorithms, then internals

Next

- Complete the quiz for this part
- Start with the pass-map proc lab for pass names, then CLI, algorithms, and internals
