Sequential

A full pass chains axis compaction and wire repair like a tiny cleaner

The idea

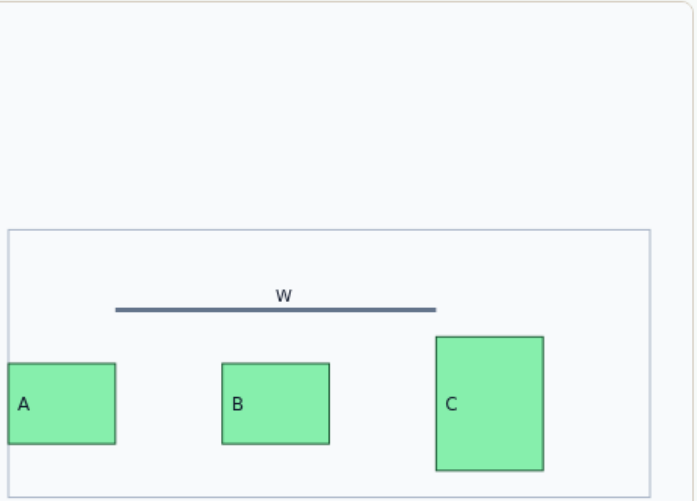

- GOLDEN: width 20→14, legal=True, improved=True

Pipeline

SEQUENTIAL

Pipeline

Step 1 / 5 · pipe · module03-05-sequential-compact

Explanation

X compact then Y compact then wire stretch.

- seq

```
full pass
```

Pipeline

Width

SEQUENTIAL

Width

Step 2 / 5 · width · module03-05-sequential-compact

20→14

Explanation

final_width=14.

- GOLDEN

```
14
```

Width

Legal

SEQUENTIAL

Legal

Step 3 / 5 · legal · module03-05-sequential-compact

legal=true

Explanation

legal flag True on the toy.

- ok

```
True
```

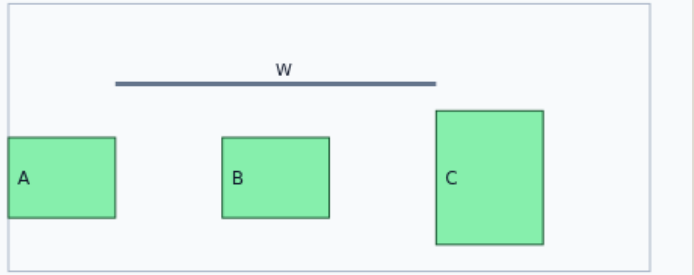

Legal

Improved

SEQUENTIAL

Improved

Step 4 / 5 · imp · module03-05-sequential-compact

Explanation

improved True vs initial span.

- delta

```
yes
```

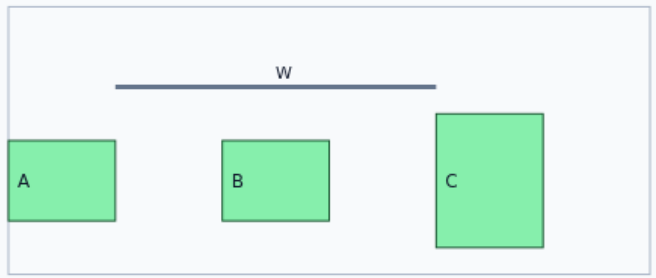

Improved

Done

SEQUENTIAL

Done

Step 5 / 5 · done · module03-05-sequential-compact

Explanation

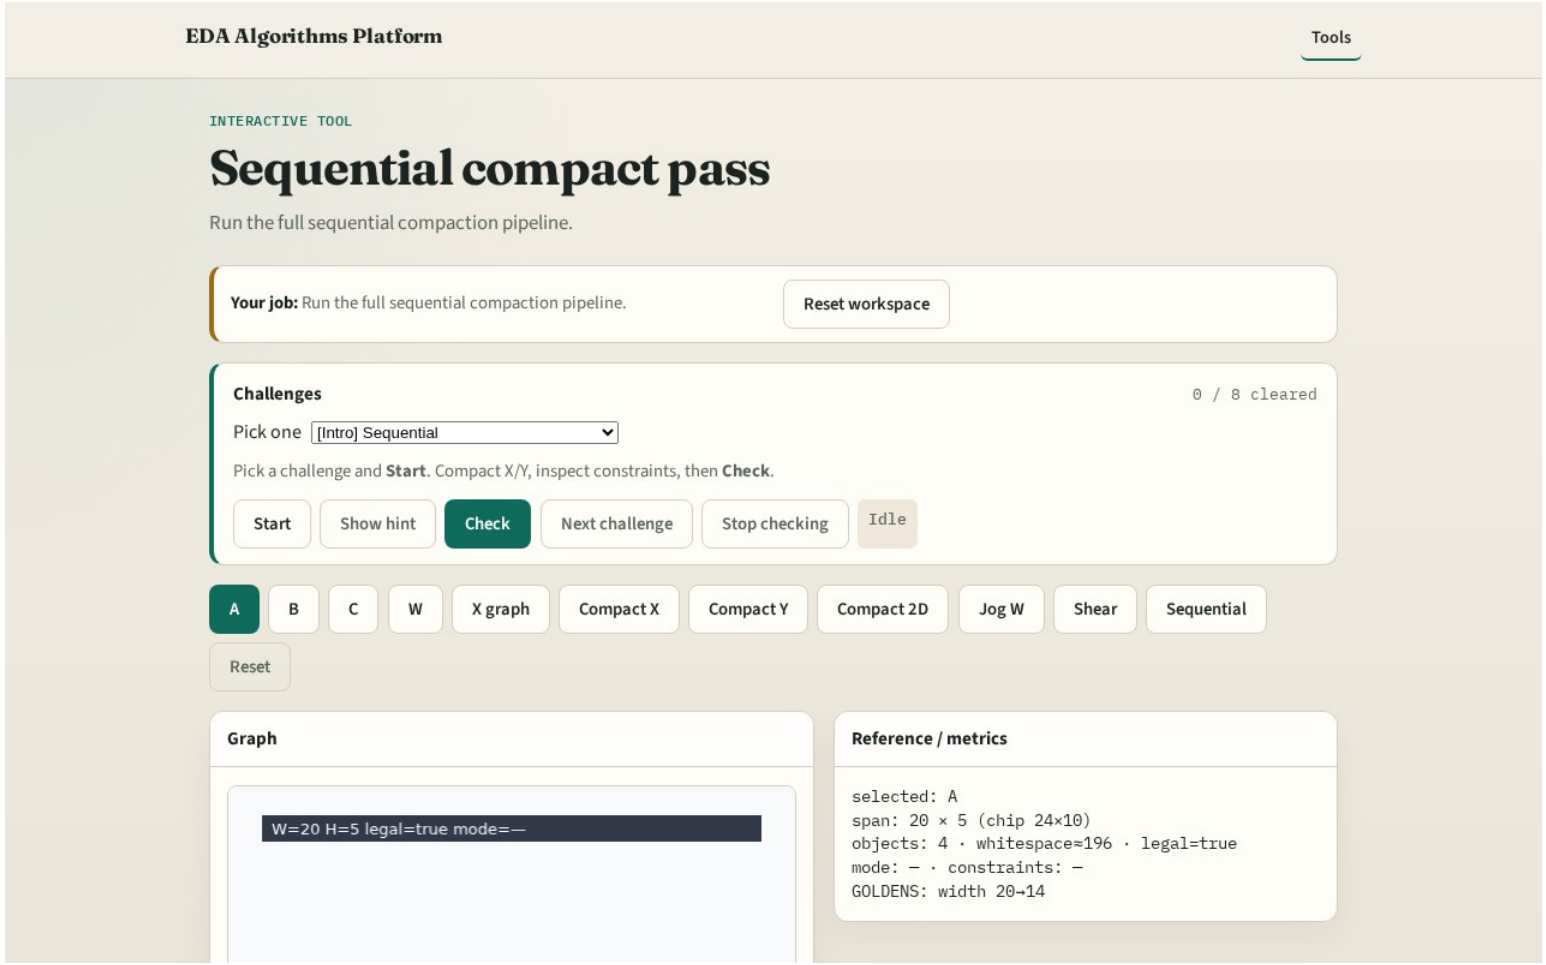

Next: offline compare, then wrap.

- pattern matching

```
Wrap
```

Done

Browser lab track

Browser lab starter

Implement track

- Call sequential_compact(DATA); assert final_width==14 and legal

Pitfalls

- Skipping wire stretch
- Claiming illegal layouts are OK

Your turn

- Next: offline benchmark, then wrap
