Gate area

Antenna ratio divides metal area by gate area on the same net

The idea

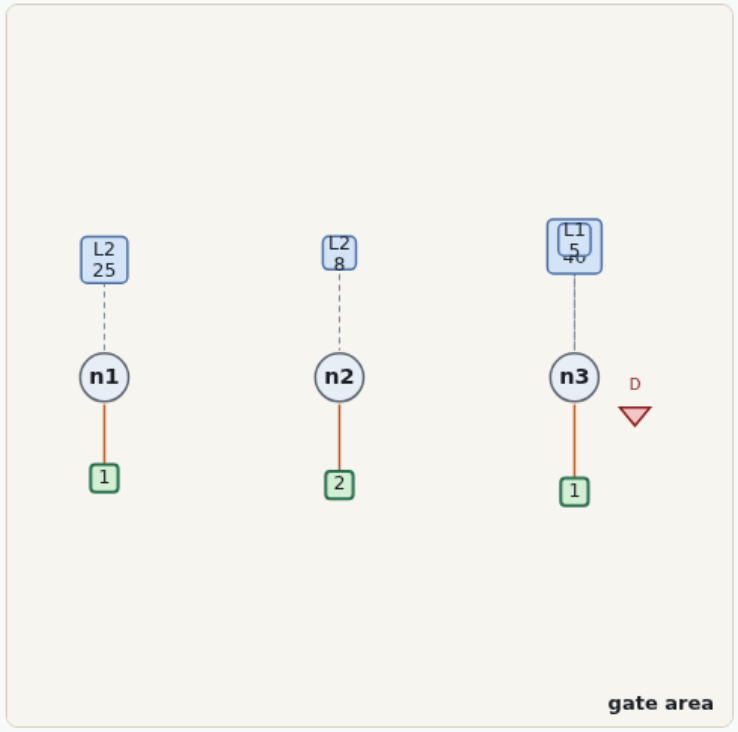

- GOLDEN: gate_area n1=1

Gate shapes

GATE AREA PER NET

Gate shapes

Step 1 / 5 · gates · module01-03-gate-area

Explanation

Each gate polygon contributes area on its net.

- gates

```
area
```

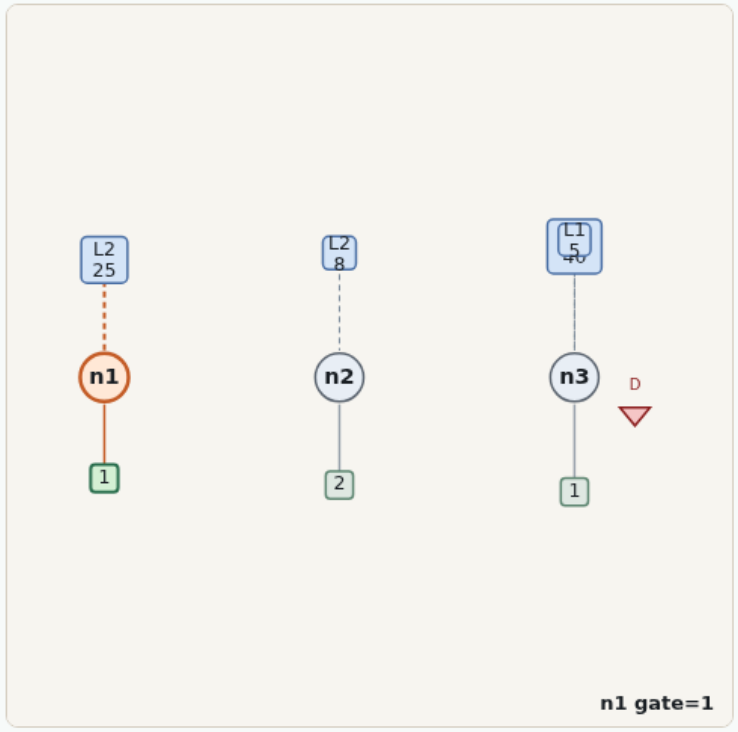

Gate shapes

n1 gate

GATE AREA PER NET

n1 gate

Step 2 / 5 · n1g · module01-03-gate-area

Explanation

g1 on n1 area 1.

- n1

```
1
```

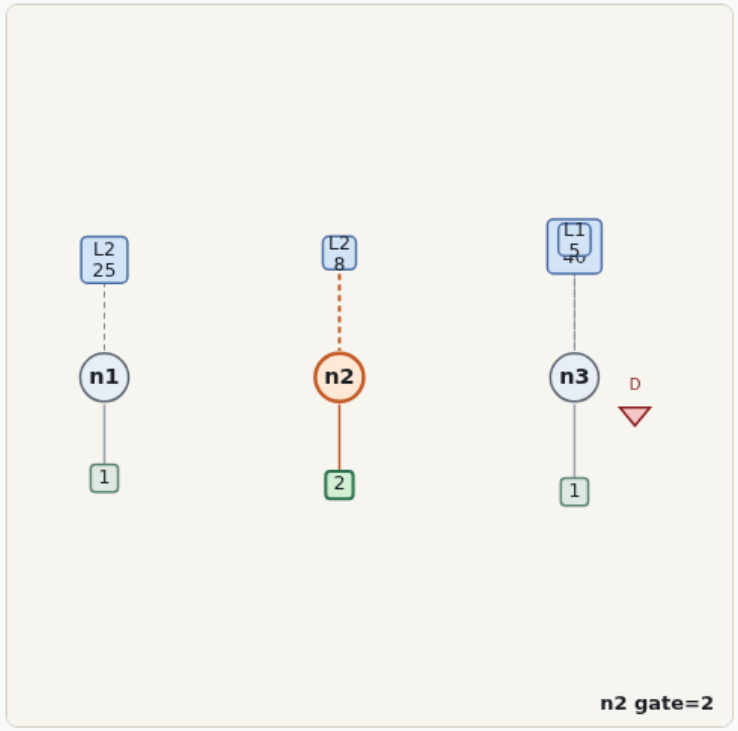

n1 gate

n2 gate

GATE AREA PER NET

n2 gate

Step 3 / 5 · n2g · module01-03-gate-area

Explanation

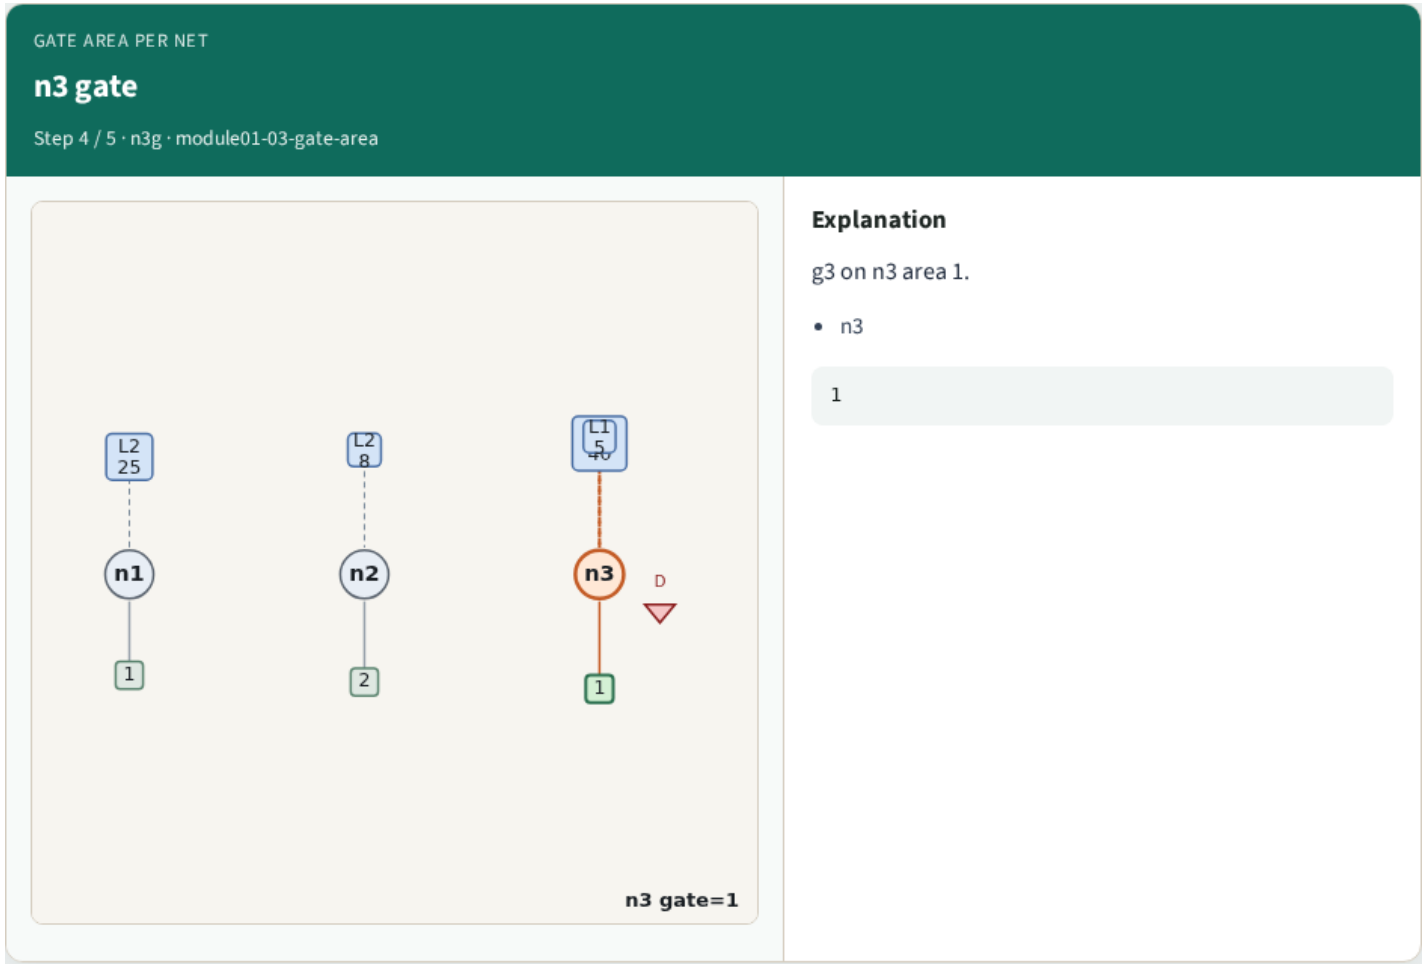

g2 on n2 area 2.

- n2

```
2
```

n2 gate

n3 gate

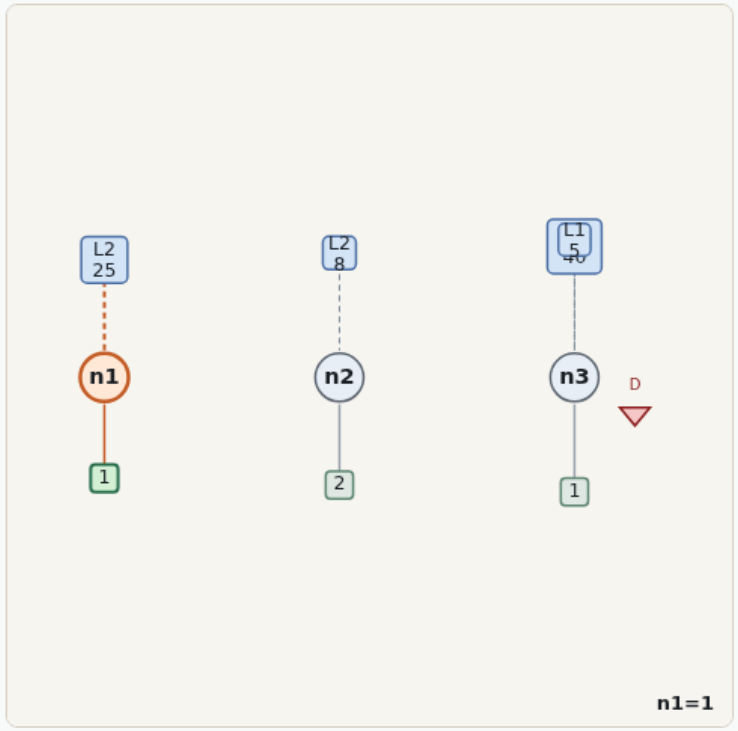

n3 gate

Golden

GATE AREA PER NET

Golden

Step 5 / 5 · golden · module01-03-gate-area

Explanation

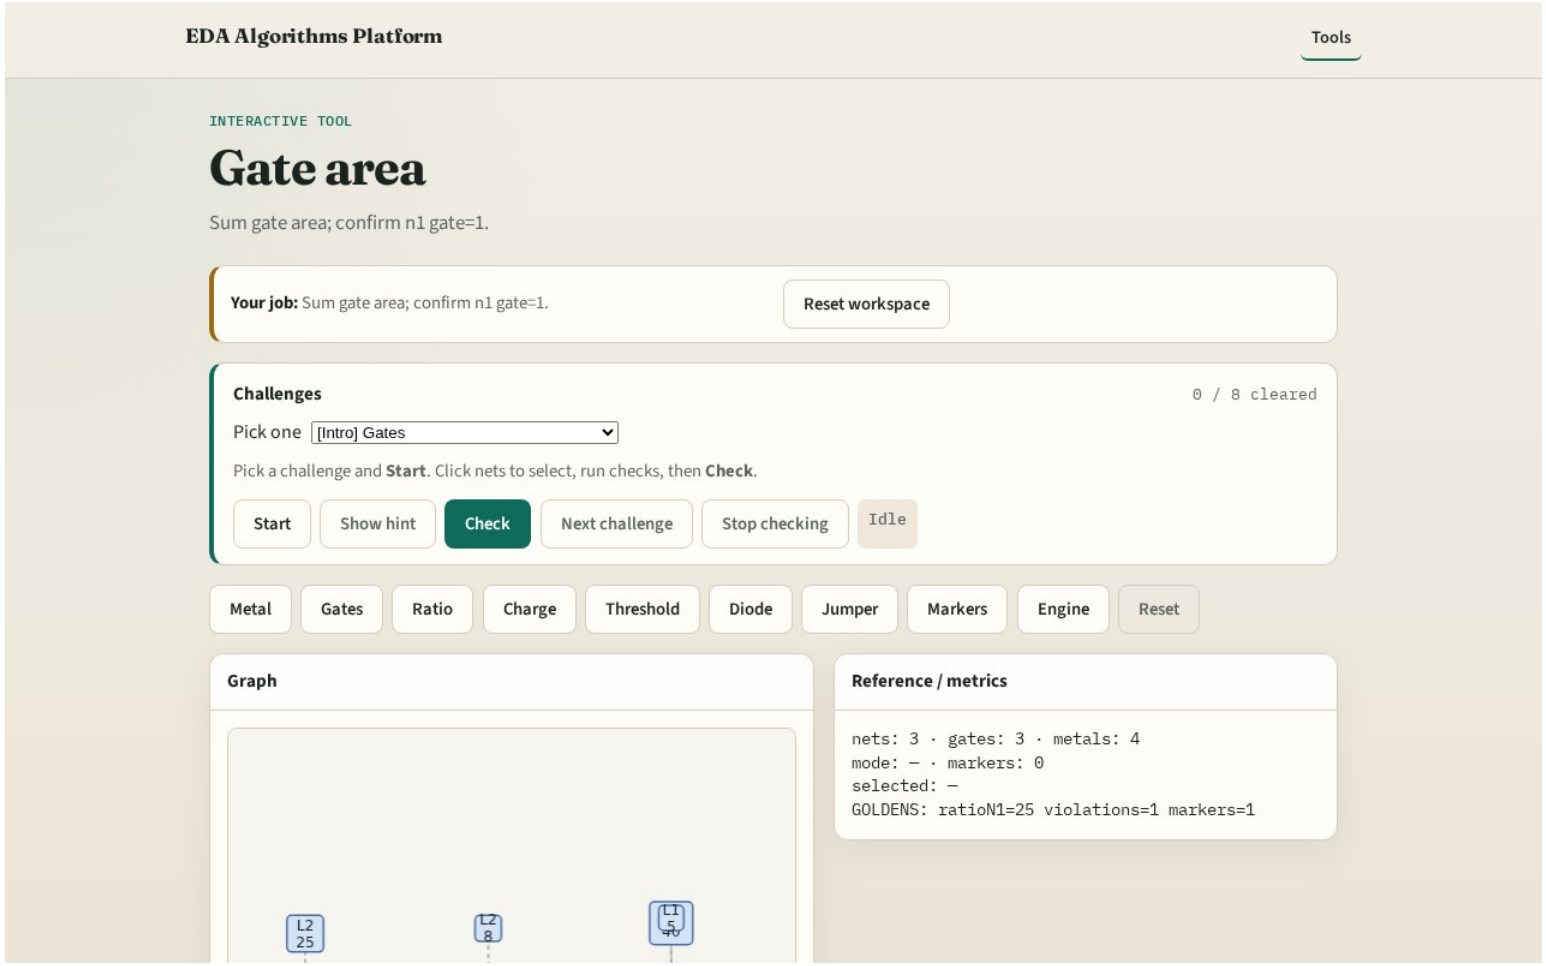

GOLDEN: gate_area n1=1.

- GOLDEN

```
1
```

Golden

Browser lab track

Browser lab starter

Implement track

- Call gate_area_by_net(); assert area['n1']==1

Pitfalls

- Mixing gate count with gate area
- Using wrong net id

Your turn

- Next: antenna ratio
