Why ratio

Foundry antenna rules compare metal exposure to gate area

The idea

- GOLDEN: n1=25, n2=4, n3=45

Ratio formula

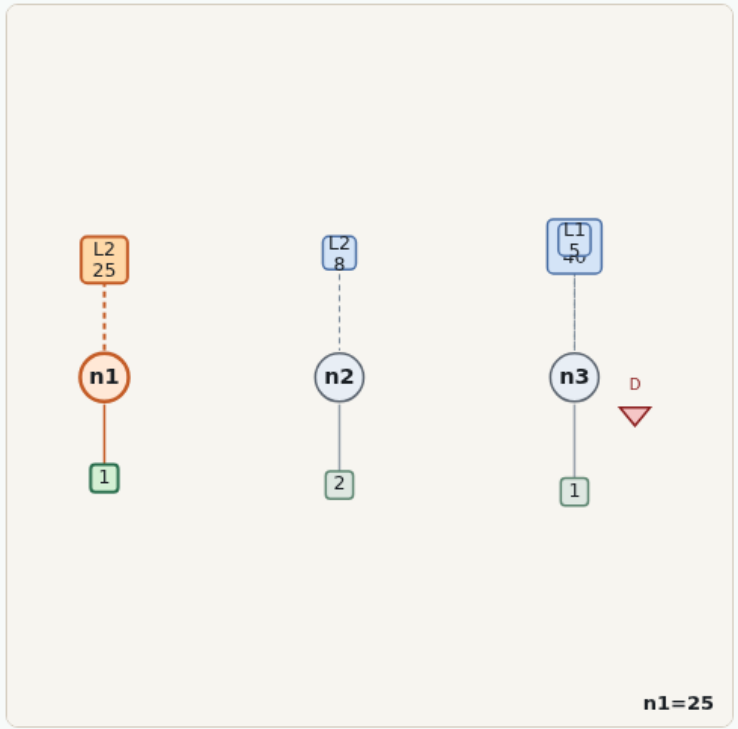

Ratio

n1

ANTENNA RATIO

n1

Step 2 / 5 · n1r · module02-01-antenna-ratio

Explanation

n1: 25/1 = 25.

- n1

```
25
```

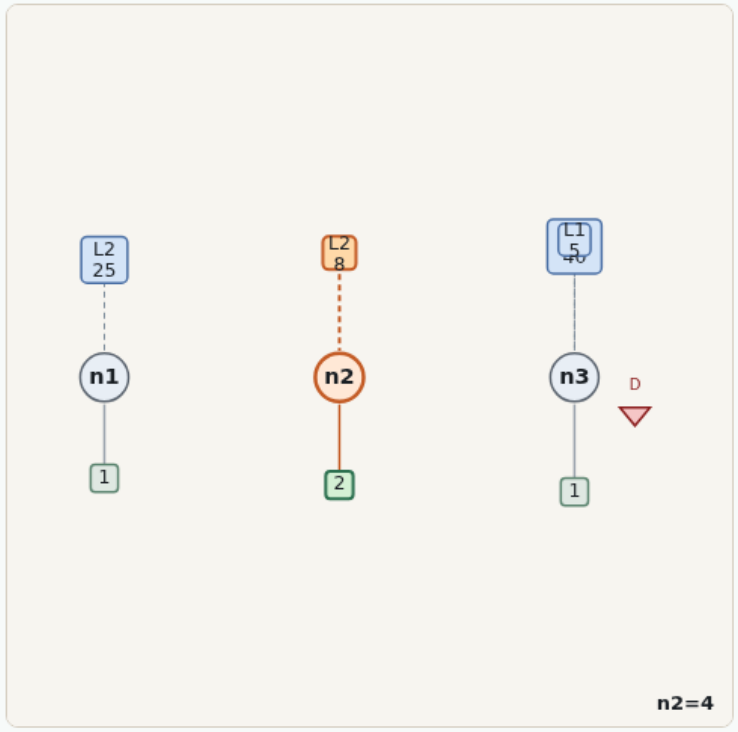

n1

n2

ANTENNA RATIO

n2

Step 3 / 5 · n2r · module02-01-antenna-ratio

Explanation

n2: 8/2 = 4.

- n2

4

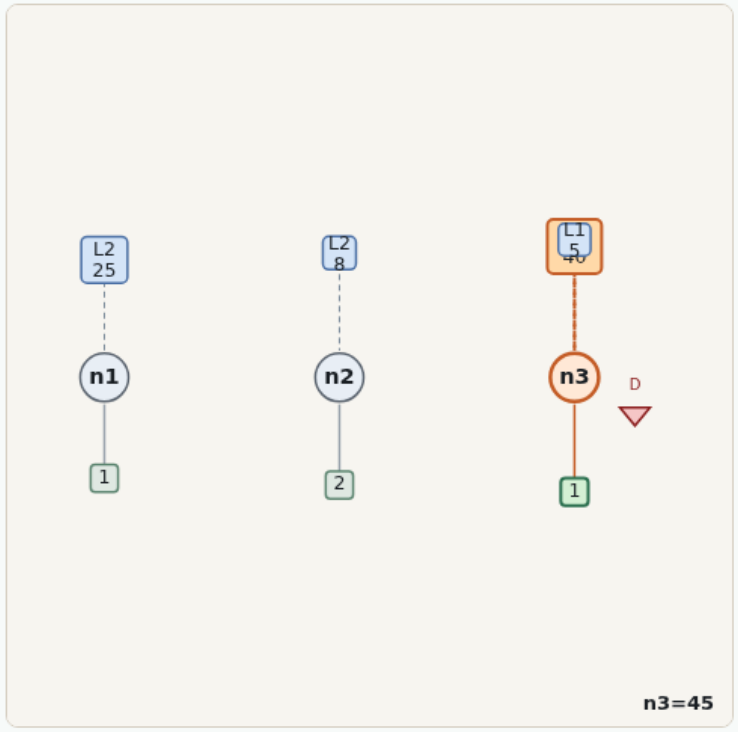

n2

n3

ANTENNA RATIO

n3

Step 4 / 5 · n3r · module02-01-antenna-ratio

Explanation

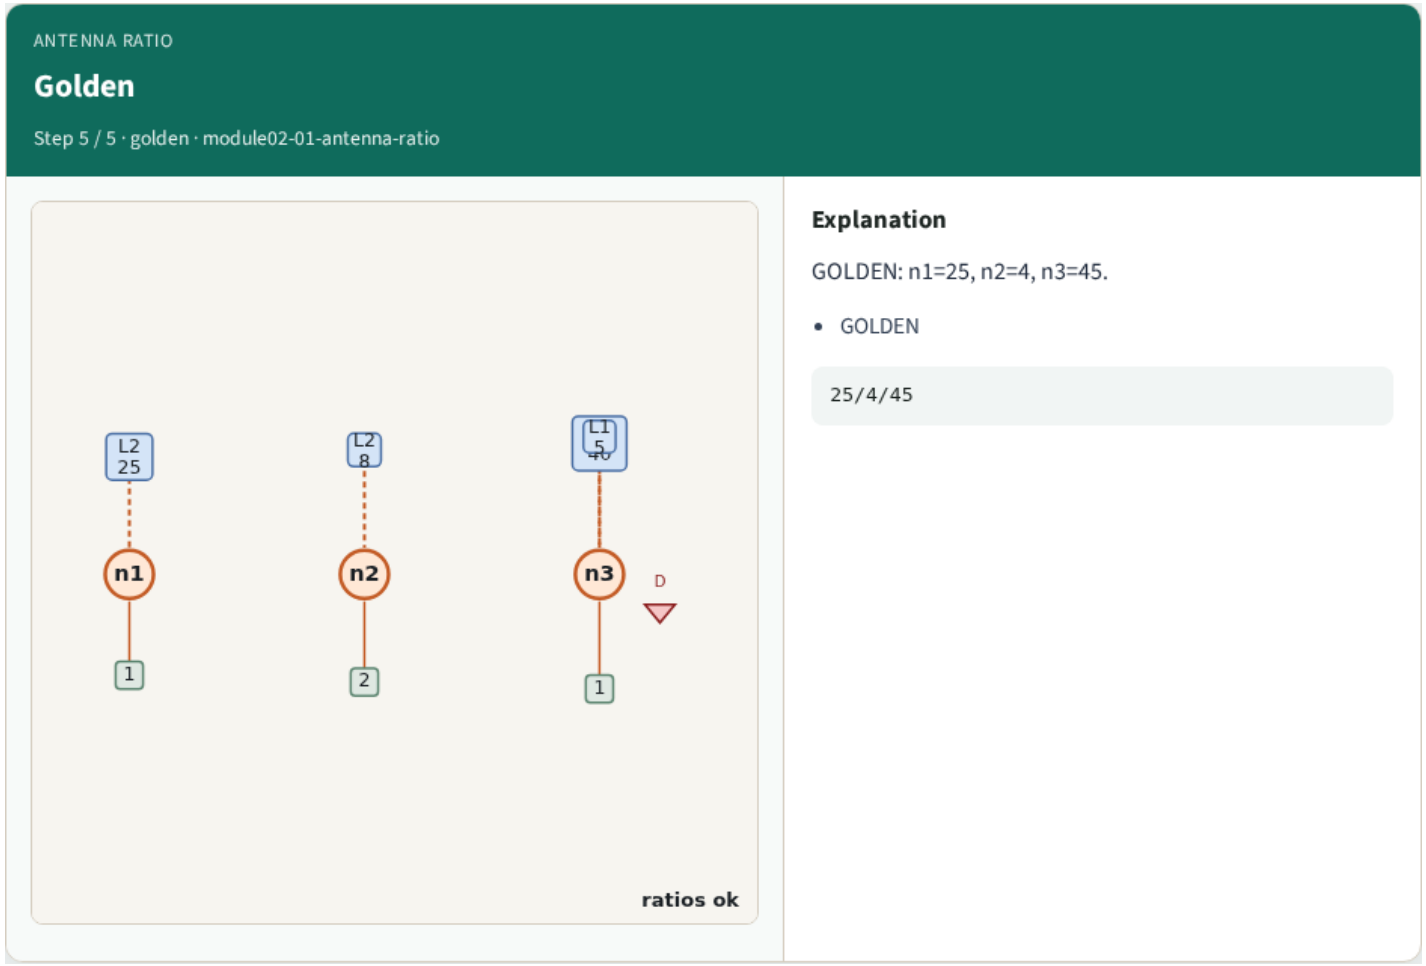

n3: 45/1 = 45.

- n3

45

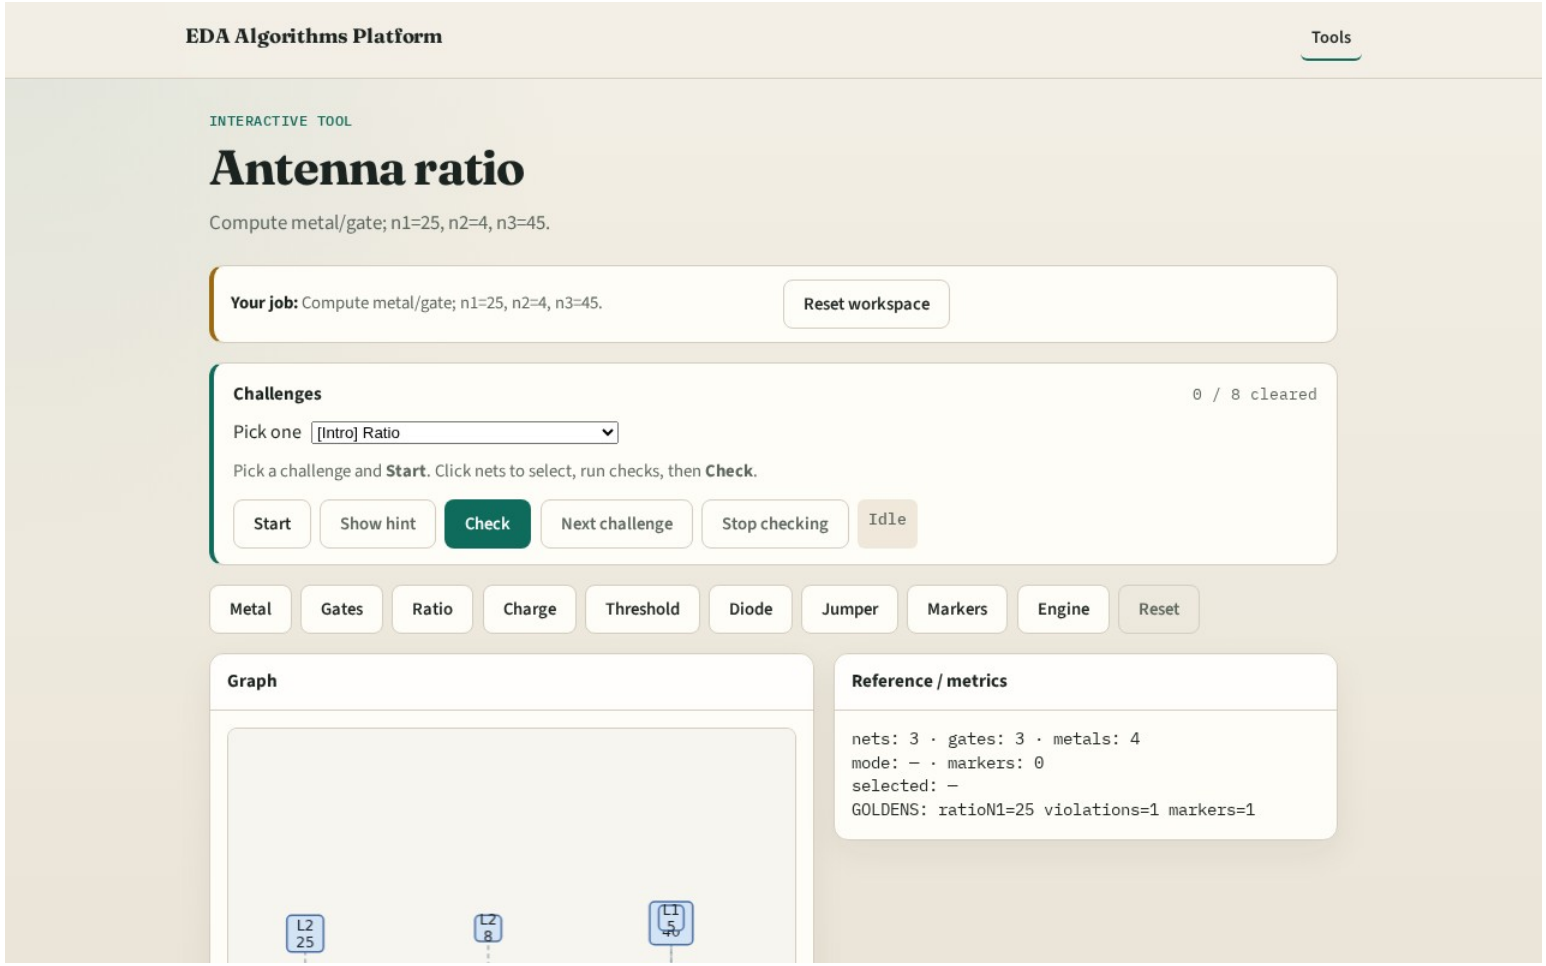

n3

Golden

Golden

Browser lab track

Browser lab starter

Implement track

- Call antenna_ratios(); assert ratios['n1']==25, ratios['n2']==4, ratios['n3']==45

Pitfalls

- Dividing gate/metal
- Forgetting multi-layer metal sum

Your turn

- Next: charge accumulation
