Sequential CEC

Sequential CEC asks whether two FSMs agree on all input sequences , we check 2 unroll steps as literacy

The idea

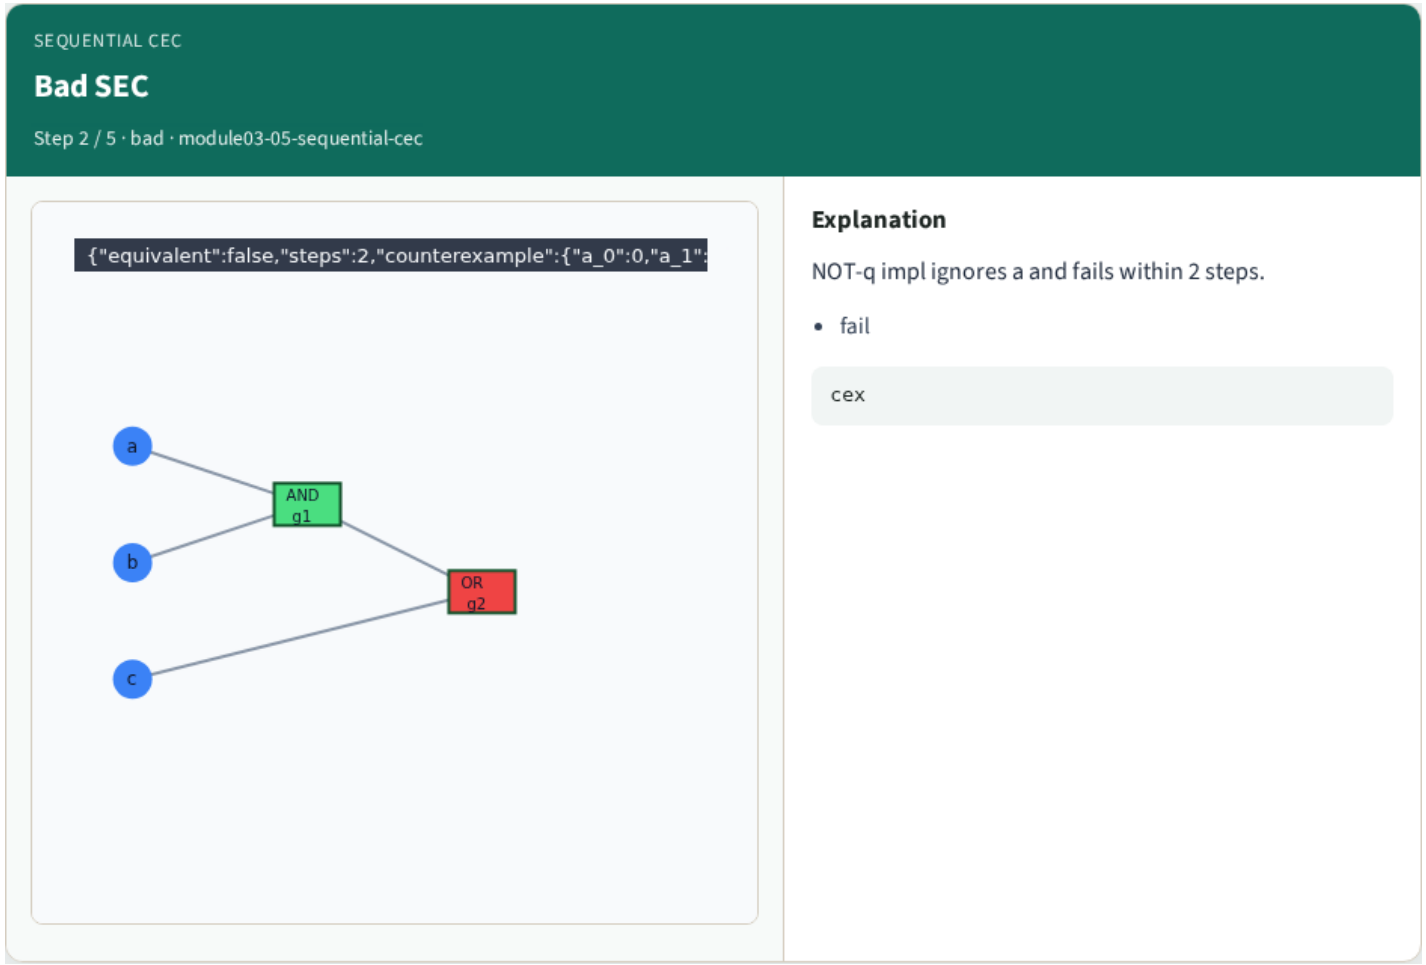

- Sequential_cec_lite enumerates input sequences

Good SEC

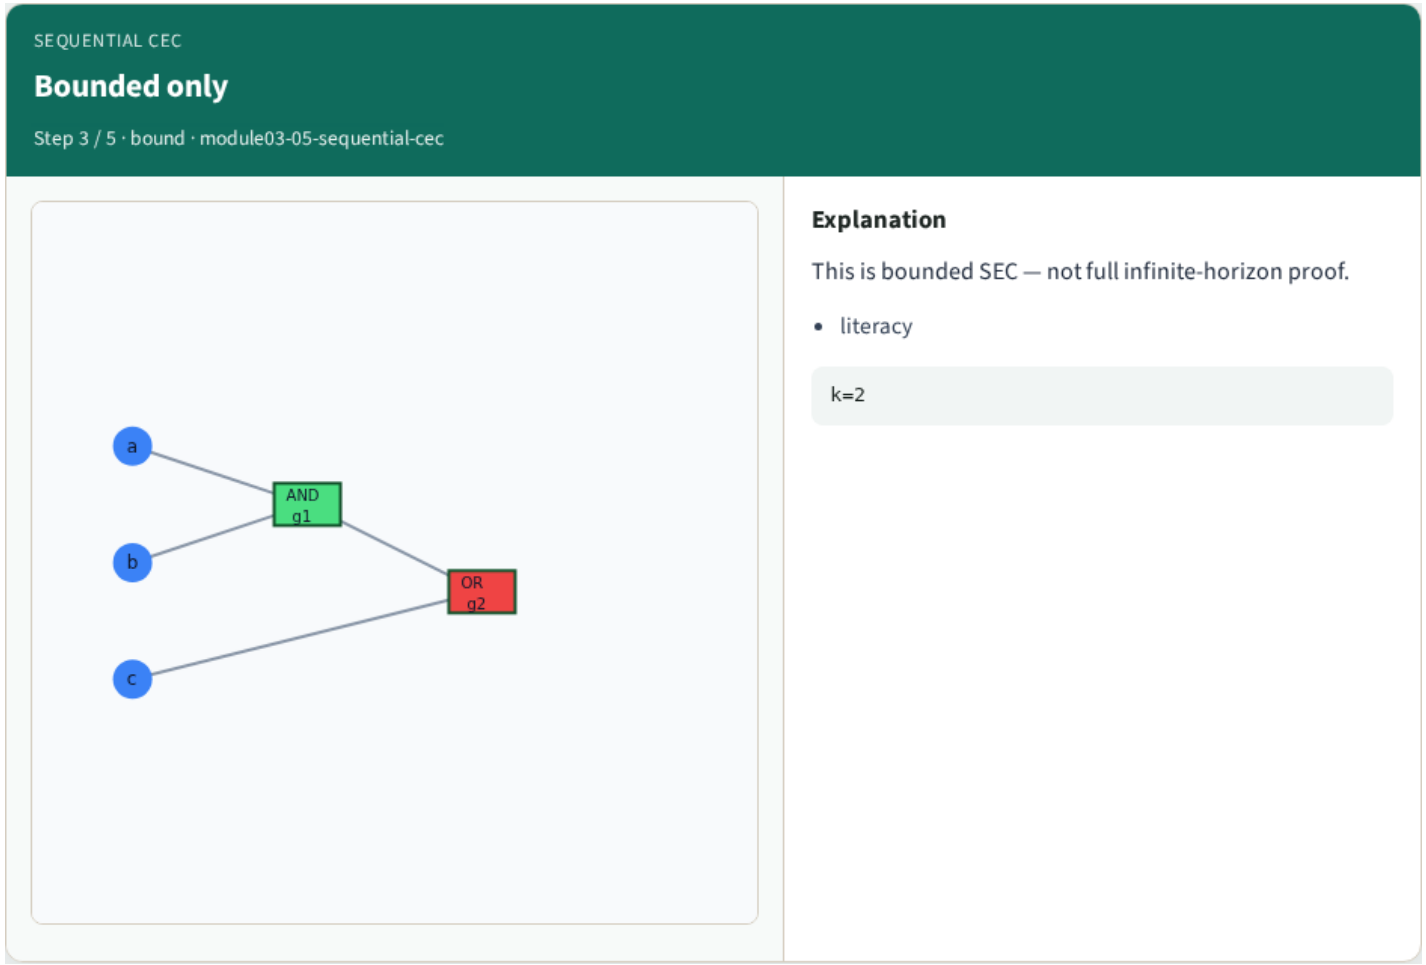

Good SEC

Bad SEC

Bad SEC

Bounded only

Same init

SEQUENTIAL CEC

Same init

Step 4 / 5 · init · module03-05-sequential-cec

Explanation

Both start from q=0.

- reset

```
fair
```

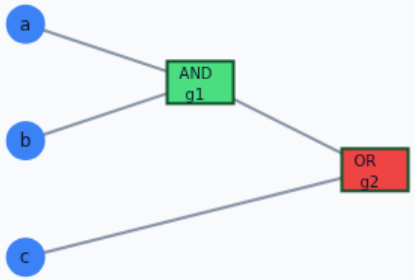

Same init

Done

SEQUENTIAL CEC

Done

Step 5 / 5 · done · module03-05-sequential-cec

Explanation

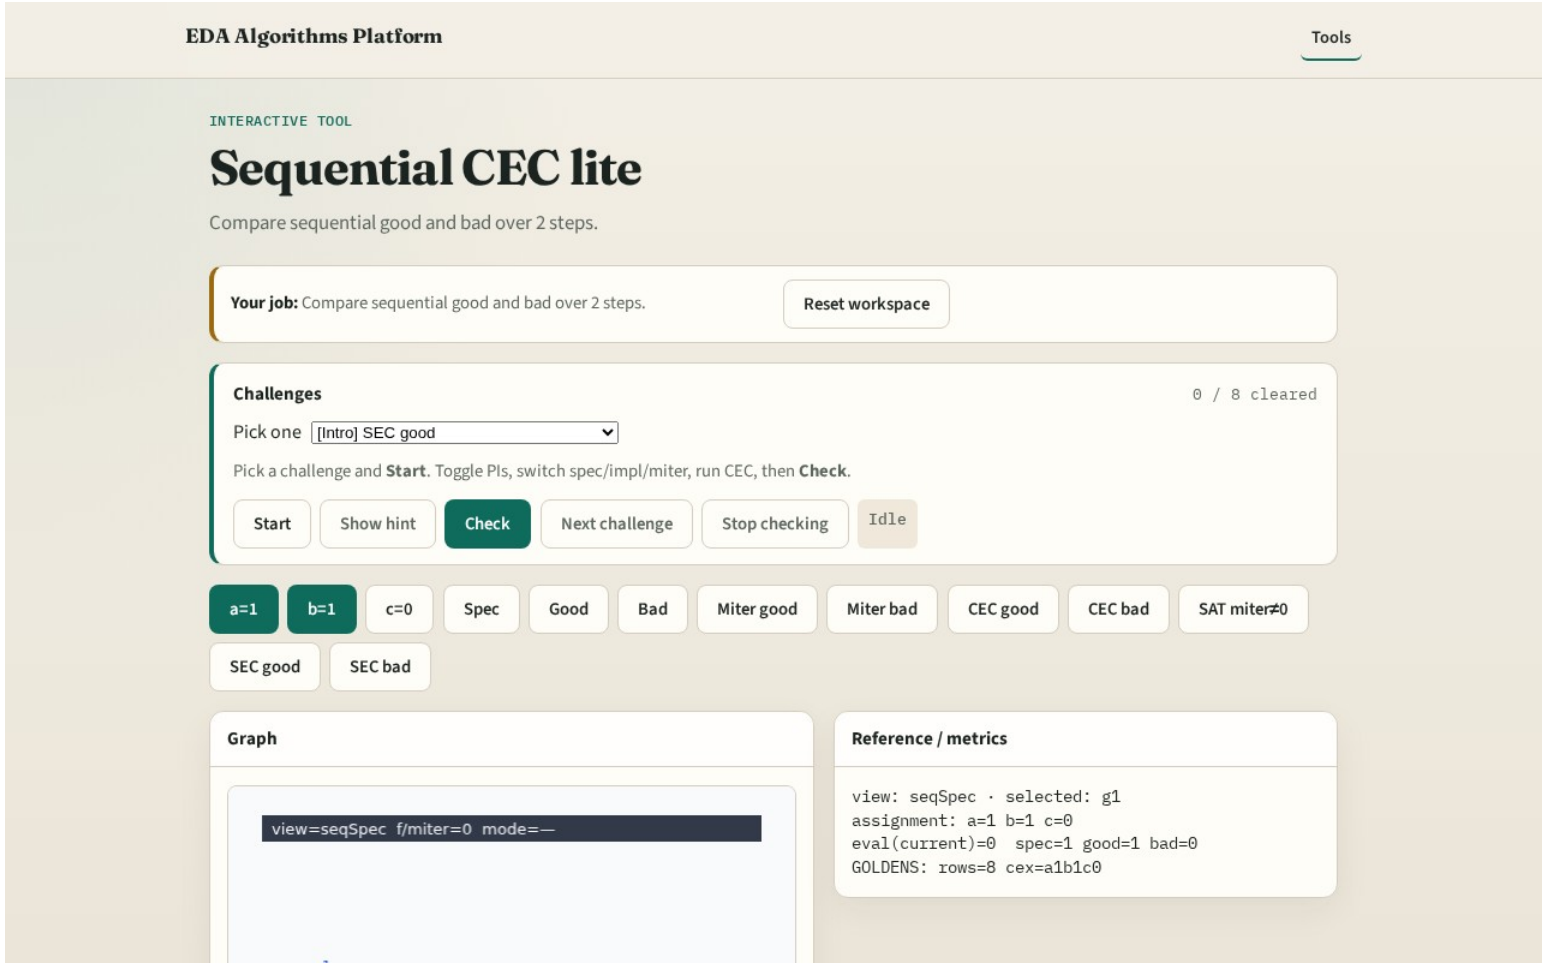

Next: offline compare, then wrap toward formal / STA.

- learn_formal

Browser lab track

Browser lab starter

Implement track

- Call sequential_cec_lite(seq_spec, seq_good, 2) True; seq_bad False

Pitfalls

- Checking one reset cycle only
- Comparing comb outputs without state update

Your turn

- Next: offline benchmark, then wrap
