Hook

You can prove tiny_equiv: truth-table CEC, miter PO=0 when equivalent, and 2-step sequential check

The idea

- Natural next: formal property checking courses or full industrial CEC tools

What you will do

- Recap spec/impl

Pitfalls

- Skipping goldens on tiny_equiv (8 rows, cex a=1,b=1,c=0)

Your turn

- Complete the checklist

Next

- Complete the quiz for this part
- Continue the path
