Wrap

You compacted tiny_compact from width 20 to 14 under min_gap=1

The idea

- Natural next: learn_pattern_matching or learn_signoff

Recap

- Recap constraint graphs, longest-path, 1-D/2-D, jogs

Goldens

- Width twenty to fourteen under min_gap one; sequential pass stays legal

Next

- Complete the quiz for this part
- Natural next: learn_pattern_matching or learn_signoff

Close

- Mark the wrap done when you can explain the constraint graph
