Welcome

Same-mask spacing forces features onto multiple masks , double (DP), triple (TP), or quad (QP) patterning

The idea

- Features A–F; triangle A-B-C blocks DP; path D-E-F is 2-colorable; TP needs 3 masks

Two tracks

- Implement track uses common/ solvers; browser lab track uses platform tools

Toy layout

- Six features A–F; triangle A-B-C blocks DP; path D-E-F is 2-colorable; TP needs 3 masks

Path

- Conflict graph, LELE, bipartite check, SADP, stitch, triple/quad color, engine

Begin

- Next: conflict graph construction
